

26 MILLION CARDS \$1 BILLION IN REVENUE ZERO INTERRUPTIONS

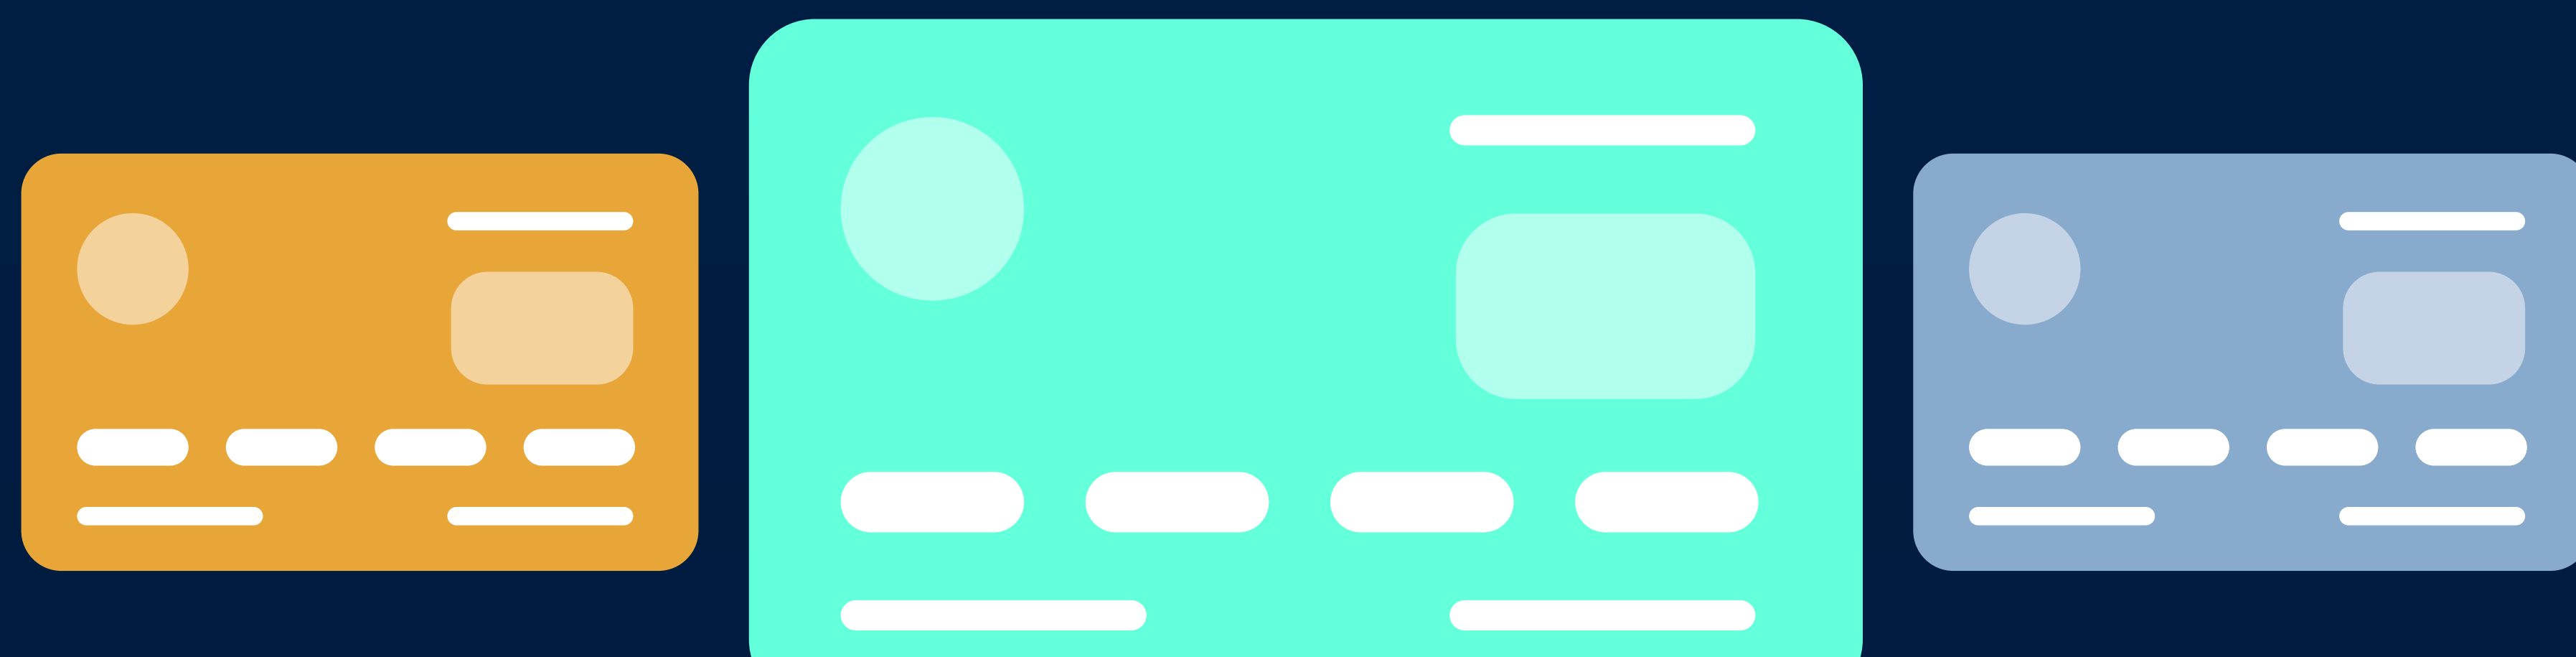

RevenueProtect keeps your billing on autopilot, even when your customers' cards change.

For subscription-based businesses, a single expired card can kill a customer relationship.

In fact,

1 OUT OF 3

cards are reissued

When that happens, most customers won't update their payment information.

THEY'LL JUST STOP BEING YOUR CUSTOMER.

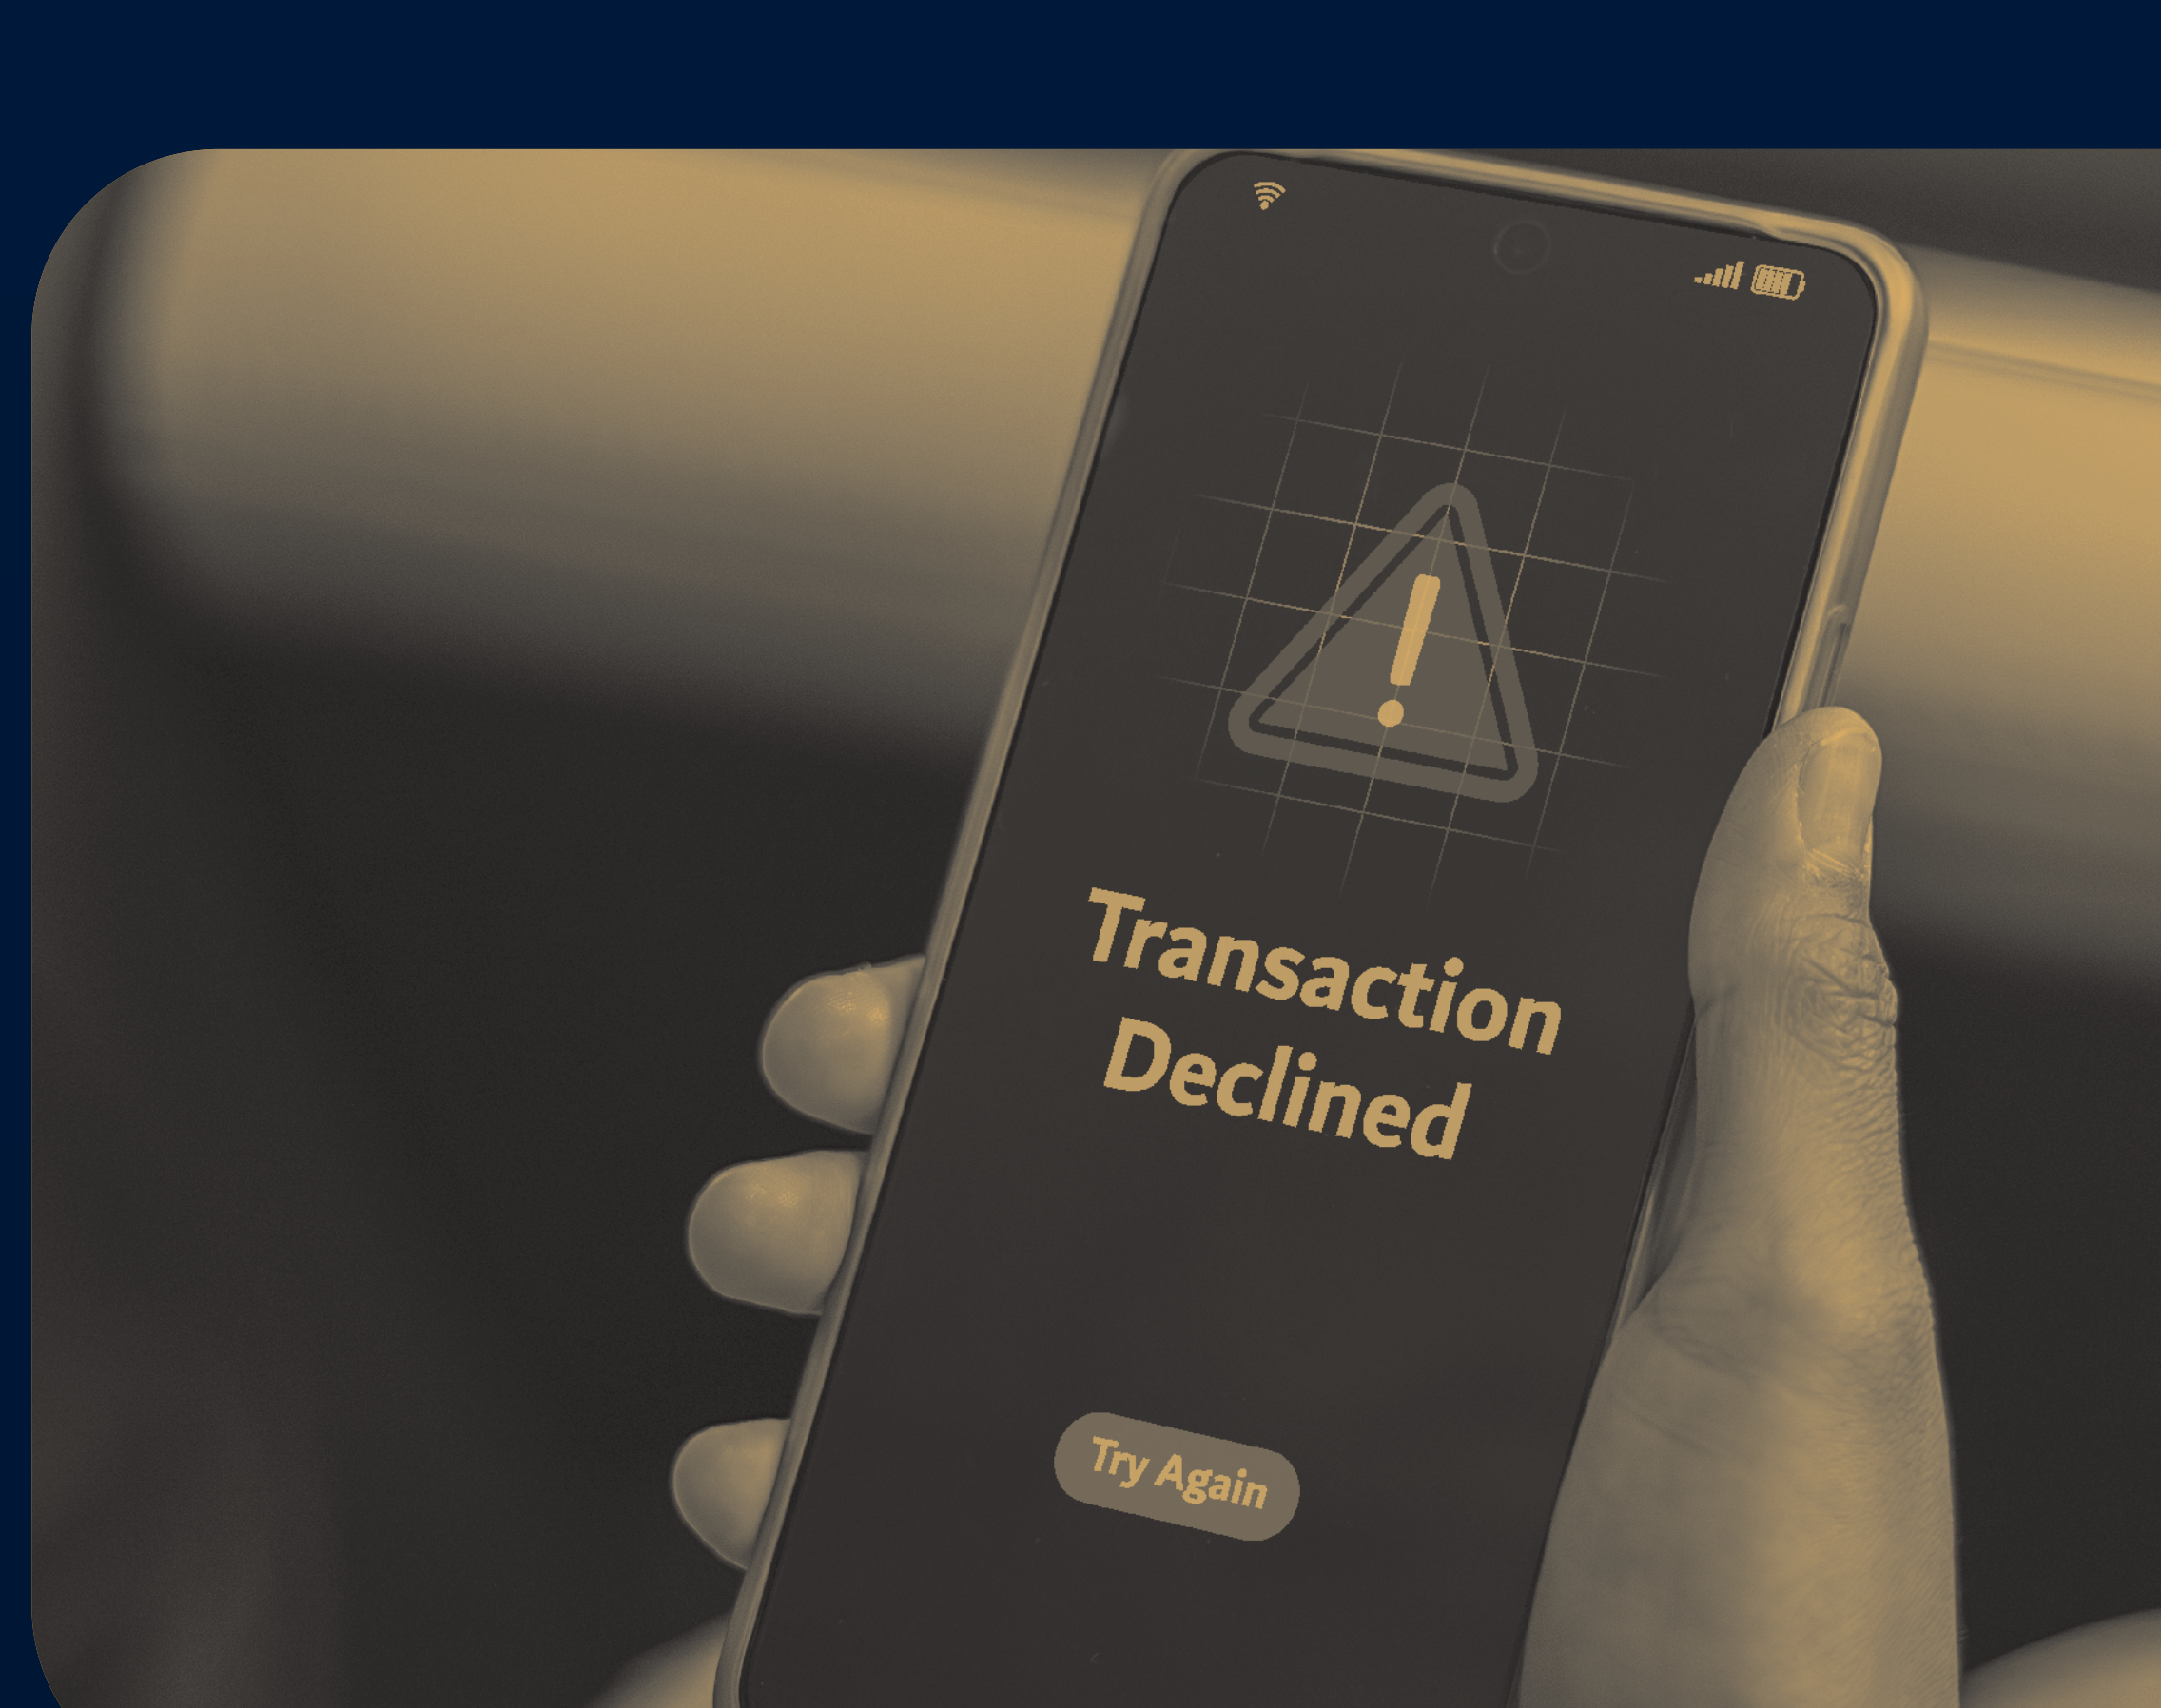

And you'll never know it was preventable.

THAT'S INVOLUNTARY CHURN.

It accounts for

10-20%

OF ALL CUSTOMER LOSSES

Industry churn already averages **15% PER YEAR.**

Eliminating involuntary churn is one of the fastest ways to move the needle:

REVENUEPROTECT CAN ADD UP TO 3% BACK TO YOUR ANNUAL GROWTH RATE

without acquiring a single new customer.

THE COST OF DOING IT MANUALLY

When a card doesn't go through, the clock starts running and it adds up fast:

- ✗ Merchants typically have to reach out **2-3 TIMES** when a card doesn't process
- ✗ It takes **12 MINUTES** to update a customer's information, on average
- ✗ The median cost of updating a customer's account is **\$50**

MULTIPLY that across your subscriber base and it becomes a significant drag on your team's time and your bottom line.

What's Included With **REVENUEPROTECT:**

AUTOMATED ACCOUNT UPDATER:

Credentials updated in sync with your specific billing and service dates, 3x more effectively than the industry average.

FRAUD PREVENTION:

Built-in protection that stops bad transactions before they become your problem.

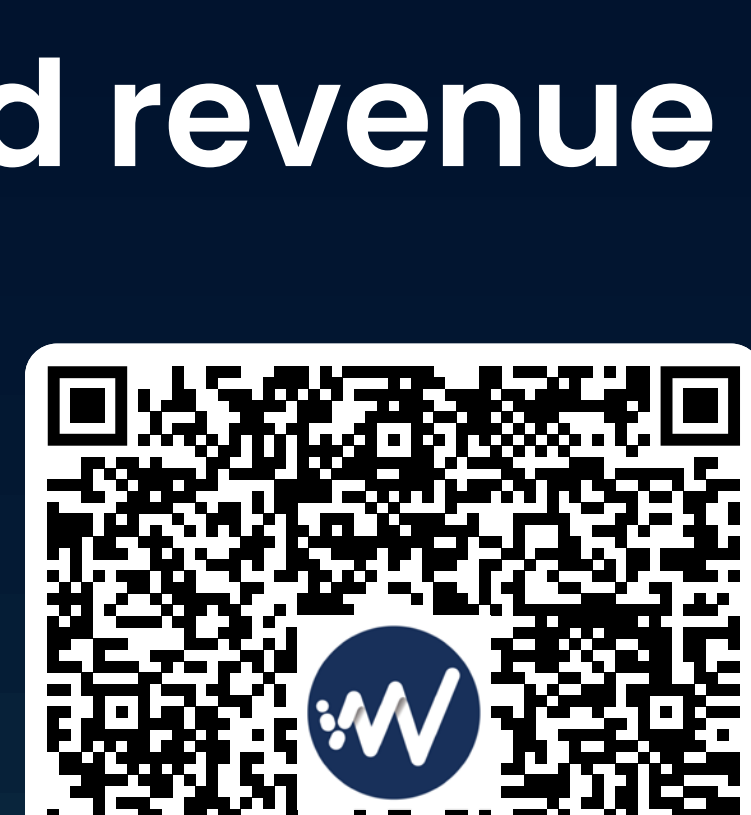

PCI-COMPLIANT CREDENTIAL STORAGE & TOKEN MANAGEMENT:

Secure, compliant handling of every card on file, every billing cycle.

RevenueProtect protects the lifetime value of your subscribers by eliminating the friction of expired or reissued cards.

Turn a \$50 manual headache into a seamless, automated revenue safeguard.
