With over 4 years of experience in UI/UX design, I specialize in transforming complex challenges into intuitive digital experiences. Leveraging expertise in design systems, front-end implementation knowledge, and problem-solving, I deliver solutions that effectively balance user needs, business goals, and technical feasibility.

Experiences

Navio Technology Applications Co., Ltd.
Freelance UX/UI Designer 06/2024 - 03/2026

- Conducted competitor analysis and gathered product requirements with the Founder to define information architecture and product structure before designing UX/UI for mobile apps, web apps, and websites.
- Collaborate with the development team to ensure front-end implementation aligns with the design language. Additionally, provide specifications and design assets to support during the development and handoff process.
- Collaborated closely with the development team to ensure front-end implementation aligned with the established design language. Provided design specifications, assets, and technical documentation throughout the development and handoff process to maintain design accuracy and feasibility. Supported staging environment testing, identifying and refining issues prior to production release.

DOL English Co., Ltd
UX/UI Designer 02/2024 - 06/2024

- UX/UI design for TOEIC and SAT online tests integrated into the LMS platform, optimizing test flow, result feedback features, and user-friendly interfaces to improve learning and test-taking experience.
- Collaborate with teachers to design IELTS and TOEIC books for learners, ensuring clear and easy-to-read layouts with visual elements to support better understanding.

HR1Vietnam Holdings Co., Ltd
UX/UI Designer 06/2022 - 01/2024

- Collaborate with the CTO and stakeholders to ensure the effectiveness and quality of the final product. Additionally, research competitors and continuously update on new design trends to apply and develop the company's products.
- UX/UI design for the company's websites and internal systems such as ATS, CRM, HRM. Provided specifications, design assets,... for developers and handoff documents to ensure clear communication during product development.
- Manage and develop the Design System to maintain consistency across all products during the design process.

Mai Linh Corporation Joint Stock Company
Product Development Specialist 06/2021 - 06/2022

- Designed website for the MPass project including web, mobile app, and internal portal interfaces.
- Collaborated with the product team to review and improve product workflows and user experience.
- Conducted market and user research to identify opportunities for product improvement.

Strategic Management Staff 12/2020 - 06/2021

- Worked with the product team to research and propose UX/UI improvements for the Smartcar product.
- Collected and analyzed feedback from drivers and customers to support product development decisions.
