

FOR SALE

COMPLETE HIGH-END CNC/HSC DIE MAKING FACILITY

WITH HIGH-SPEED MILLING MACHINERY,
WIRE EDM AND FINISHING

From the Hammer Forging
facility KMS...
Now introducing the die
making facility Horst Klein

PROJECT DETAILS

This sale comprises high-end CNC and HSC die making machinery, such as Rödgers, DOOSAN and TOYODA, as well as Wire EDM from AGIE and Laser Welding machinery from ALM in Germany.

As a result of non-related closures on the clientele side, Horst Klein GmbH has been shut down and is now available for sale in its entirety incl. all production machinery, software and other systems, and also the real estate in an industrial area in Velbert, close to Düsseldorf, Germany. Many market leaders in Germany and Asia relied on the precision parts from Horst Klein as the company manufactured high-precision and ready-to-use drop-forging and hot-forging dies with highly complex shapes and detailed geometries.
