Waste Nothing with Reusables

Reusables.com is a technology-driven platform that addresses single-use packaging waste by offering a reusable "packaging-as-a-service" solution for businesses and consumers. Our system utilizes advanced tracking technology, to manage the checkout and return of reusable containers. This allows businesses, including major partners like Uber Eats and universities, to seamlessly adopt sustainable packaging solutions.

The platform not only tracks and reports environmental impacts but also simplifies reuse by integrating with existing systems, such as campus ID cards, making it an accessible and cost-effective way for food service providers to reduce waste

CONTAINER AGNOSTIC

Don't see what you're looking for? Or have you found containers that work better for your customers? We are container agnostic to remain as sustainable as possible. We can help source containers that are as close to your facilities as possible or help you decide on the best option based on your customer needs.

GET IN TOUCH

Our mission is to replace single-use packaging with reusables. Founded in Vancouver, BC by Anastasia Kiku & Jason Hawkins, we now provide reusables as a service to universities, offices, hospitals, restaurants, cafes, grocery stores, film productions, and venues. Contact us and one of our team members will help you achieve your sustainability goals.
