

WET CLEANING SYSTEM

The **VITA-BLUE** environmentally friendly line offers a complete solution to wet cleaning. The gentle but powerful detergent, degreaser and finisher compress cleaning time from hours to minutes while saving you money over traditional dry cleaning methods.

VITA-CLEAN • Neutral Wet Clean Detergent

- Unusually effective on a variety of soils keeping whites white and colors bright
- Biodegradable blend from renewable resources for low environmental impact
- Superior cleaning quality with controlled costs

VITA-PRO • Degreaser

- Extraordinarily effective on stubborn stains and tough grease
- Super concentrated broad spectrum degreaser with low environmental impact
- Safe as a pre-spotter and in the wash wheel during wet cleaning

VITA SHIELD • Finisher

- Concentrated conditioning finisher adds crispness and hand to garments
- Protects against shrinkage while leaving garments soft and reducing wrinkles
- Superior adhesion to all fibers lending to decreased time during finishing

With increased regulation and consumer environmental concerns, Wet Cleaning is the future of the garment cleaning industry. The **VITA-BLUE** Wet Cleaning System offers a safe and highly effective alternative to traditional dry cleaning methods.

Industry professionals now offering Wet Cleaning have discovered the time and cost saving benefits of the process. The **VITA-BLUE** Wet Cleaning System allows users to realize these benefits while offering customers superior quality cleaning with very low environmental impact.

*Ask your U.N.X. representative how your operation can benefit from the **VITA-BLUE** Wet Cleaning System to save time, reduce cost and be kinder to the environment.*

VITA-CLEAN

NEUTRAL WET CLEAN DETERGENT

VITA-CLEAN is a concentrated neutral detergent designed for use in the wet cleaning process.

VITA-CLEAN *is unusually effective on a variety of soils and designed for equal performance in hard and soft water.*

Use **VITA-CLEAN** in all wet cleaning operations where the finest quality is desired!

- **VITA-CLEAN** contains a biodegradable blend of multiple surfactants derived from renewable resources and offers special resistance to effects of high water hardness and high bicarb.
- **VITA-CLEAN** possesses a proprietary blend of naturally derived wetting agents that not only facilitate strong interactions with a variety of commonly encountered soils, but aids in maintaining that relationship throughout the wash cycle, thereby preventing redeposition and graying over time.
- **VITA-CLEAN** keeps whites white and colors bright!
- **VITA-CLEAN** is the 2nd generation of *NPE-free detergents and Prop 65 compliant.*
- **VITA-CLEAN** *offers superior quality with controlled costs.*

VITA-PRO

DEGREASER

VITA-PRO is a *super concentrated degreaser* designed to meet the demands of all sized wet cleaning operations.

VITA-PRO is extraordinarily effective on those stubborn stains yielding whiter and brighter results on those heavily soiled garments.

Use **VITA-PRO** when you need to attack those tough grease and grime stains!

- **VITA-PRO** is an excellent broad spectrum degreaser offering a very low environmental impact.
- **VITA-PRO** breaks down the grease and grime and suspends the soils during the washing process and prevents redeposition.
- **VITA-PRO** can be used as a pre-spotter and in the wash wheel during the wet cleaning process.
- **VITA-PRO** is safe on stainless steel and safe with most dyes.

VITA-SHIELD

FINISHER

VITA-SHIELD is a concentrated conditioning finisher that adds crispness and hand to garments in the wet cleaning process.

VITA-SHIELD adds body to the garments, thus improving the finishing process.

- **VITA-SHIELD** leaves garments soft and supple after the finishing process, while reducing wrinkles before and during wear.
- **VITA-SHIELD** protects against shrinkage by minimizing fabric damage.
- **VITA-SHIELD** is safe and effective on all fabrics from natural fibers to synthetics.
- **VITA-SHIELD** demonstrates superior adhesion to all fibers (natural, synthetic and recycled) which will lend to decreased time during the finishing process.
