GREEN'R Rinse Solid

Automatic dishwasher rinse aid. Solid

- **SUPER-CONCENTRATED**
- **FOR ALL WATER HARDNESS CONDITIONS**

GREEN'R offers an answer to the new, ecological hygiene standards with an extensive range of well-performing eco labelled products. The products are nontoxic and do not harm the environment. Even in lower doses and at lower temperatures they show impeccable results and maximum efficiency while saving on water, transportation costs and packaging.

PROPERTIES

GREEN'R Rinse Solid is an additive for automatic injection in the final rinse of automatic dishwashing machines. Due to its composition, it does not foam and provides good drying and polishing of the washed parts. Its active ingredients reduce the surface tension of water, forming a uniform film that drains off without leaving marks or stains on the surface. In this way, drying is achieved in a few seconds. Due to its high concentration, it is a very economical product, due to the low doses of use and the high yields achieved. It is suitable for all water hardness conditions.

GREEN'R Rinse Solid should be used in combination with GREEN'R Autodish solid.

INSTRUCTIONS FOR USE

Recommended dosages:

Every water hardness 0.04 g / L - 0.08 ml / L

Please check if the dishwashing machine work properly, the water pressure and the Hardness of the water.

This product is used in automatic dosage in combination with GREEN'R Autodish Solid. It is important to also respect the temperature of recommended rinsing: 75-85 ° C. Large waste should be removed by removing it with a hand shower, before sorting the dishes and placing them in a basket for machine use. Start the machine program or pass the basket through the washing tunnel. Let dry and put away dishes after washing your hands. The CHRISTEYNS team (technical sales and technicians) are available to help your team in the field to optimize the use of this product.

CHARACTERISTICS

- blue compact solid

ENVIRONMENT

Strictly respect the recommended doses, dose according to the degree of soiling and the hardness of the water. Make sure the machine is working properly to save water and energy. Use of softened water makes it possible to reduce the doses while optimizing the results. It is imperative to check the correct functioning of the softener and / or the hardness of the water. (Contact the local water distributor in order to know the exact values of the water hardness). By using this product with EU Ecolabel and the recommended dosages, you contribute in the reduction of water pollution and waste generation. Do not overdose the product. Optimize loading of the machines.

100% recyclable packaging.

Dispose of the packaging via the waste collection circuit.

LEGISLATION

This product complies with:

Regulation (EC) No 1272/2008 on classification, labelling and packaging of substances and mixtures (CLP Regulation). The product is packaged and labelled according to the criteria laid down in this Regulation.

Regulation (EC) No. 648/2004 on detergents (Detergents Regulation). The surfactant(s) contained in this preparation complies(comply) with the biodegradability criteria as laid down in this Regulation.

Regulation (EC) No 1907/2006 concerning the Registration, Evaluation, Authorisation and Restriction of Chemicals (REACH). All substances in this product are registered for their use under REACH. The product doesn't contain any candidate Substance of Very High Concern. A Safety Datasheet compliant with REACH is available to the user upon request.

STORAGE

Store between 5 and 40°C

Shelf life 36 months

PACKAGING

3x 3.6kg box

*Please contact your Christeyns representative for available packaging types in your country.
