

MAXX 302

ULTRA-CONCENTRATED OXYGEN DESTAINER

MAXX 302 is an ultra-concentrated oxygen destainer designed for professional laundry operations requiring powerful stain removal and brightening without the limitations associated with chlorine bleach. Its oxygen-based bleaching action helps protect fabric tensile strength while delivering consistent results across demanding textile applications. Stable in storage and designed for use with an alkali builder, MAXX 302 provides commercial laundries with an effective solution for maintaining linen quality and appearance. Ultra-concentrated oxygen bleaching agent.

FEATURES & BENEFITS

- **Powerful Oxygen Destaining** — Concentrated bleaching action helps remove difficult stains and enhance brightness
- **Protects Textile Quality** — Helps preserve fabric tensile strength compared to chlorine bleaching
- **Consistent Performance** — Stable formulation provides dependable bleaching action in professional laundry systems
- **Commercial Laundry Versatility** — Well suited for hospitality, shirt and other professional textile care operations
- **System Compatible** — Recommended for use with an alkali builder for effective bleaching performance
