PLATFORM FOR SAP®

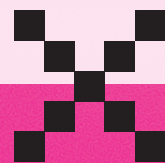

# THE DATA DISCOVERY PLATFORM FOR SAP®

I AM IN CHARGE  
OF MIGRATING  
MY COMPANY'S  
SAP BUSINESS  
DATA TO THE  
CLOUD.

WE HAVE SOLD  
ONE OF OUR  
BUSINESSES  
AND NEED TO  
SEPARATE OUR  
SAP SYSTEMS.

I AM RESPONSIBLE  
FOR MIGRATING  
ALL OUR SAP  
BUSINESS DATA  
TO S/4HANA.

## WHERE DO I START?

The average SAP system has billions of lines of business data in a highly complex data model.

For companies who need to split out a divested entity, upgrade their environment or move to the cloud, identifying what data they have and what they need to migrate often requires significant resources, time and cost.

**Get started with Pioneer.**

# REDUCE DATA DISCOVERY BY >90%

- ❖ Full inventory of business data in SAP
- ❖ Visibility by organisation and business area
- ❖ Analyses billions of records across over 100,000 database tables
- ❖ Simulates scope and size of a data migration
- ❖ Easy to consume reporting
- ❖ Carve-outs, S/4HANA and cloud

## A HEAD START

The Pioneer data discovery platform provides a complete and accurate view of a company's business data in SAP broken down by organisation, business area and time period.

It reduces the time and effort for data discovery by over 90%, helping customers to get a head start on their SAP transformation.
