about portable fabric hop-up displays

What's a Hop-Up display, and is it the right fit for your needs?

Consider your space, message, and setup requirements.

WHAT IS A HOP-UP DISPLAY?

Hop-Up fabric displays offer integrated graphics, making it one of the fastest and easiest portable setups on the market.

Graphics are produced with dye-sublimation printing, meaning they won't crack, peel, or fade for long-lasting durability and colour vibrancy.

ADD-ON HOP-UP FEATURES

- **Double-sided graphics** that offers flexibility within your space & for your messaging
- **Portable fabric counters** to greet visitors & create workspace
- **Other accessories** like hard-sided shipping cases & overhead lights to complete your display

WHAT'S THE DIFFERENCE BETWEEN A HOP-UP AND OTHER PORTABLE FABRIC DISPLAYS?

The main difference between a Hop-Up display and other portable fabric systems comes down to the hardware and setup process.

Hop-Up displays expand in seconds, with the graphic already attached to the collapsible frame using Velcro edges.

With other portable displays, like WaveTube systems, the frame is assembled using push-pin connectors, and the fabric graphic is manually pulled over the structure. Tradewinds displays feature multiple tensioned graphics for a more dimensional look, without endcaps.

The key advantage of Hop-Up displays is their fast, simple setup.

where your hop-up budget goes

WHAT'S INCLUDED

All Hop-Up displays regardless of shape and size include the following:

- Integrated dye-sublimated graphic with endcaps secured with Velcro edges
- Accordion-style frame with locking magnetic arms
- Carrying bag with handles
- One-year limited warranty against manufacturer defects

Extra costs to consider:

- Shipping
- Additional features
- Design time

TURNAROUND TIMES (3-4 WEEKS)

- 3 weeks for print-ready artwork added to our graphic templates
- If we are designing your graphics, please allow an additional 1–2 weeks

PHASES AND STAGES

Phase 1 – Design:

A. Pre-Design

- Establish deadlines, budget, scope of work

B. Initial Design (1 Draft)

- Gather assets, key messages & content to put on display
- Graphics proof is developed for your review

C. Final Design (1–2 Drafts)

- Refine graphic elements
- Edit, proofread, review to finalize (client sign-off)

Phase 2 – Production and Shipping:

D. Production

- Print production
- Set up the display for final review

E. Shipping

- Pack up elements
- Coordinate shipping and logistics

Project Completion

hop-up 8 ft.

PORTABLE FABRIC HOP-UP DISPLAYS

Single-sided wrap-around fabric graphic that stays connected to the frame with Velcro-edges. Bottom right image shows add-on banner stands.

hop-up 8 ft.
