about portable fabric wavetube displays

What's a WaveTube display, and is the right fit for your needs?

Consider your space, message, and setup requirements.

WHAT IS A WAVETUBE DISPLAY?

WaveTube displays features a pillowcase-style graphic that slips over a lightweight aluminum tube frame. The frame assembles easily using push-pin connectors, while the graphic zips closed at the bottom to keep the material taut and smooth.

Graphics are produced with dye-sublimation printing, meaning they won't crack, peel, or fade for long-lasting durability and colour vibrancy.

ADD-ON WAVETUBE FEATURES

- **Connector panel add-ons** that join multiple displays together for a sleek & scalable setup, with the ability to integrate monitors
- **Canopy or half-walls** to create defined, branded zones within your display space
- **Shelving units** to showcase products, literature & promotional materials
- **Portable fabric podiums** to greet visitors & create workspace

WHAT'S THE DIFFERENCE BETWEEN A WAVETUBE AND OTHER PORTABLE FABRIC DISPLAYS?

The main difference between a WaveTube display and other portable fabric systems is the hardware and setup process.

WaveTube frames tubes use hollow aluminum tubes that connect similarly to tent poles. The fabric graphic must be slipped on and removed each time the display is assembled or dismantled.

Other portable fabric displays such as Hop-Ups feature graphics that remain attached to an expandable accordion-style frame, reducing setup time.

WaveTube displays offer the advantage of being lightweight with a compact, narrow side profile.

where your wavetube budget goes

WHAT'S INCLUDED

All WaveTube displays regardless of shape and size include the following:

- Premium dye-sublimated stretch-fit graphics, with a black or white backing
- Aluminum frames & base feet
- Carrying bag with handles
- One-year limited warranty against manufacturer defects

Extra costs to consider:

- Shipping
- Additional features such as podiums & hard-sided shipping cases
- Design time

TURNAROUND TIMES (3 WEEKS)

- 3 weeks for print-ready artwork added to our graphic templates
- If we are designing your graphics, please allow an additional 1–2 weeks

PHASES & STAGES

Phase 1 – Design:

A. Pre-Design

- Establish deadlines, budget, scope of work

B. Initial Design (1 Draft)

- Gather assets, key messages & content to put on display
- Graphics proof is developed for your review

C. Final Design (1 – 2 Drafts)

- Refine graphic elements
- Edit, proofread, review to finalize (client sign-off)

Phase 2 – Production and Shipping:

D. Production

- Print production
- Set up the display for final review

E. Shipping

- Pack up elements
- Coordinate shipping & logistics

Project Completion
