

Company Name: North Sea Energy

Industry: Energy and Industrial Safety

Timeline: 21 days

Location: UK and Norwegian

Quantity: 4,800 units

Overview

North Sea Energy needed cold-weather and flame-resistant workwear for offshore crews in harsh North Atlantic conditions.

Challenges

- Meeting EN/ISO visibility and weather requirements
- Balancing insulation and breathability
- Coordinating timing across several drop points

Solution

We tested the insulated shells early, verified the compliance requirements through outside labs, and kept the work organized so the certification could stay accurate across the batch. The delivery plan was set early so their logistics teams could move everything quickly.

Result

All 4,800 units were completed in 21 days and passed compliance without any issues.
