

**Company Name:** Buildpro Basement Builders

**Industry:** Construction

**Timeline:** 13 Days

**Location:** Canada

**Quantity:** 2,000 pieces

## Overview

BuildPro needed uniforms that could handle concrete dust, cramped basement spaces, and long hours. They also wanted a cleaner brand look across their job sites.

## Challenges

- Clothing needed to handle rough work without feeling heavy
- Logos had to look the same on tees, hoodies, and outerwear
- Multiple teams needed their sizes packed separately

## Solution

We tested a few heavier fabrics until one handled the jobsite without feeling stiff. The logo placement was checked across all styles so nothing looked mismatched.

## Result

The full 2,000 units were finished in 13 days, and their teams looked more professional across their job sites.
