

**Company Name:** Procure4Health

**Industry:** Healthcare

**Timeline:** 20 Days

**Location:** Canada & UK

**Quantity:** 6,500 units

## Overview

Procure4Health supports hospitals and clinics across Canada and the UK. They needed uniforms that had a modern, professional look across multiple locations.

## Challenges

- Fabrics had to stay intact for full hospital days
- Navy and teal needed to match across different garment types
- Deliveries had to line up with each facility's start date

## Solution

We tested several antimicrobial fabrics until one felt right for both clinical and admin teams. The navy and teal were checked in small rounds to prevent shade changes.

## Result

- 6,500 units finished in 20 days
- Color matching held across all departments
- Facilities put everything into use right away without delays
