

RIVIX CASE STUDY

METRO SAFETY TRAINING • INDUSTRIAL AND SAFETY • CANADA • 12 DAYS • 1,600 UNITS

OVERVIEW

Metro Safety Training needed uniforms for their instructors that looked professional and passed CSA visibility requirements.

CHALLENGES

- Correct tape placement for CSA
- Comfortable enough for long training days
- Matching brand colours on multiple garment types

SOLUTION

We tested reflective tape and logo embroidery on several fabrics before the final set. The fabric choices, trims and tape placement were reviewed together to make sure every garment met CSA requirements. Each site received the ranges they needed so instructors could put everything into use right away.

RESULT

The 1,600-unit order finished in 12 days. Everything passed CSA checks and was ready for immediate use.
