

RIVIX

CASE STUDY

CAREMED SUPPLY • HEALTHCARE AND MEDICAL • CANADA • 17 DAYS • 3,200 UNITS

OVERVIEW

CareMed supplies uniforms to hospitals, long-term care homes, and distribution teams. They wanted everything to look good across clinical staff, admin teams, and warehouse crews.

CHALLENGES

- Fabrics needed to stay practical for long shifts
- Navy and teal had to match across multiple departments
- Deliveries had to line up with new facility start dates

SOLUTION

We sourced an antimicrobial stretch fabric that worked well for both clinical and logistics teams. We made sure the base materials stayed accurate across departments without creating extra variations. Navy and teal were tested in small rounds to keep the style predictable. The outfits were checked across a broad size range before the full production started.

RESULT

- 3,200 units completed in 17 days
- The colours and fabrics stayed accurate across all categories
