

RIVIX

CASE STUDY

TACH • FASHION AND RETAIL APPAREL • USA • 17 DAYS • 3,100 UNITS

WHAT THEY NEEDED

Tach needed a natural-fiber collection with precise pattern control. The styles had very little room for error and had to come in clean for retail.

WHAT MADE IT TOUGH

- Natural fibres react differently in bulk
- Pattern accuracy had to stay accurate across all sizes
- Several items shared the same colours, so dyeing needed to be handled carefully

HOW WE HANDLED IT

We tested their fabrics early and ran daily pattern checks so the shapes came out the way they intended. Each style was finished and shipped in its own run.

WHAT CAME OUT OF IT

- 3,100 units finished in 17 days
- Patterns stayed consistent across all pieces
- Collection was approved for the next retail cycle
