

United States of Kindness

Press Release for Education

(School Name / School District) Joins National United States of Kindness Initiative

Students, staff, and families will work toward completing 250 Acts of Kindness during America's 250th anniversary celebration

(City, State) - This school year, (School Name / School District) is proud to participate in the United States of Kindness, a nationwide initiative encouraging individuals, schools, businesses, and communities to complete 250 Acts of Kindness in honor of America's 250th anniversary.

Throughout the year, students and staff will look for simple ways to demonstrate kindness, strengthen relationships, and create a positive school environment. Acts of kindness may include welcoming a new student, writing thank-you notes, helping classmates, recognizing staff members, volunteering in the community, or supporting local service projects.

Participation is designed to fit naturally into the school day and build on the positive work already happening throughout the school community.

"Kindness has always been part of who we are," said (representative of school). "The United States of Kindness gives our students another opportunity to practice empathy, show respect, and recognize that even small actions can have a meaningful impact on others."

The initiative also encourages families and community members to participate by completing acts of kindness at home, at work, and throughout the community.

The United States of Kindness was created by Kindland as a national call to action leading up to America's 250th anniversary in 2026. Schools across the country are being invited to participate by encouraging students to practice kindness, share stories, and celebrate the positive impact those actions have on others.

Throughout the year, (School Name / School District) will share stories and photos highlighting acts of kindness taking place across the school. Community members are encouraged to follow the school's social media channels and celebrate the positive examples being set by students and staff.
