ECONOMIC AND SOCIAL PLANNING AREA**

**Elias Maldonado, Director
BUREAU OF STATISTICS**

**Luz Maria Arce, Acting Director
DIVISION OF STATISTICS**

JUNE, 1977

FOREWORD

This publication presents detailed information on the external trade of the Commonwealth of Puerto Rico for fiscal year 1975.

The data on the external trade of Puerto Rico are compiled by the Bureau of the Census of the United States Department of Commerce. The Planning Board is the recipient of monthly summary machine tabulations and the respective punched cards containing detailed statistics on foreign trade by commodities and by countries. The data here presented were prepared from these cards. The work on foreign trade statistics is under the direct supervision of Miss Luz Maria Arce with the help of Mrs. Olga E. Rodriguez. Acknowledgement is given to the Electronic Machine Center, specially to Mrs. Alegria Davila, for their help in preparing this publication.

Monthly statistics are maintained in the Economic Indices Section, Bureau of Statistics, Economic and Social Planning Area of the Planning Board and will be furnished to any interested person upon request. New products exported by Fomento Plants are published in the "Economic Indicators", a monthly publication. Data on trade between Puerto Rico and the United States are also published by the U. S. Bureau of the Census in the monthly report number FT 800 (U. S. Trade with Puerto Rico and U. S. Possessions).

The reader may refer to publications of the United States Bureau of the Census for specific definitions and statements of what is included in these statistics. However, the following summary description of the data may be helpful:

I-SHIPMENTS OF MERCHANDISE FROM THE UNITED STATES TO PUERTO RICO

These statistics are based on shipper's export declarations filed at the time of shipment from the United States. The value is based on the selling price (or on cost if not sold) including inland freight, insurance and other charges to border point or seaport. It is f.a.s. (free alongside ship) in the port of embarkation. It should not include ocean freight, marine insurance or other charges incurred beyond the port of exportation. Shipments by all methods of conveyance are included. Only shipments from Continental United States are included. Shipments from Virgin Islands and Guam to Puerto Rico are included in data on shipments to United States from those areas as published by the U. S. Department of Commerce.

Shipments of military and naval equipment and supplies for the United States Armed Forces and shipments by U. S. Government agencies of office furniture, equipment and supplies for the use of such agencies are not included in the statistics.

Data on shipments from United States are presented according to the commodity classifications provided in Schedule B, (Statistical Classification of Domestic and Foreign Commodities Exported from the United States). There is no commodity detail available on individual shipments valued under \$250. The total value of these shipments estimated on a sample basis is shown under Schedule B commodity classification 931.0040.

II-IMPORTS INTO PUERTO RICO FROM FOREIGN COUNTRIES

These import statistics are based on regular U. S. Custom entries of merchandise filed by importers through the Customs District of Puerto Rico. The series presented here refers to "Imports for Consumption", that is, it includes imports for direct consumption plus withdrawals from bonded warehouses. These statistics include government as well as nongovernment shipments of merchandise from foreign countries. However, American goods returned by the U. S. Armed Forces for their own use are excluded. The value is in general based on market or selling prices, f.o.b. the exporting country. Transportation cost to Puerto Rico may inadvertently be included in case of merchandise which is not subject to an import duty based on value. United States imports duties are excluded.

The country of origin is defined as the country where the merchandise was grown, mined or manufactured. Where the country of origin is not known, the country of shipment is shown. Data on imports from foreign countries are presented according to the seven digit commodity descriptions established in Schedule T, S.U.S.A. (Tariff Schedules of the United States Annotated), published by U.S. Department of Commerce.

III - SHIPMENTS FROM PUERTO RICO TO THE UNITED STATES

These are based on shipper's export declarations filed with the U.S. Custom in Puerto Rico. The principle governing the filing of these declarations and the coverage of these statistics are the same of those on shipments from the United States to Puerto Rico. The shipments to United States are tabulated according to the commodity classification published by the U.S. Bureau of the Census in Schedule P (Commodity Classification for Reporting Shipments from Puerto Rico to the United States).

IV - EXPORTS FROM PUERTO RICO TO FOREIGN COUNTRIES

These are likewise based on shipper's export declarations filed by the exporters at the port of exportation in Puerto Rico. The value of shipments is based on the selling price (or on cost if not sold) including inland freight, insurance and other charges to the place of export. Merchandise shipped through Puerto Rico in transit from one foreign country to another is not reported as export, but imported merchandise which has cleared through Customs and which is re-exported without processing is covered separately as exports of foreign merchandise and included in this table in the corresponding commodity classifications. Exports from Puerto Rico to foreign countries are classified according to Schedule B, which is the schedule regularly used to classify United States exports. There is no commodity detail available for shipments valued under \$250 and the total value of such exports appears under commodity number 931.0040.

The country of destination is defined as the place where merchandise is to be consumed, further processed or manufactured. In the event the exporter does not have definite information as to the country of ultimate destination for a shipment, it is credited for statistical purposes to the country to which it is consigned.

V - SHIPMENTS OF MERCHANDISE FROM PUERTO RICO TO VIRGIN ISLANDS

These statistics are based on shipper's export declarations, filed with collector of Customs at the time the merchandise is shipped from Puerto Rico to Virgin Islands. Shipments by all methods of transportation are included. The value is based on the selling price (or on cost if not sold) including inland freight, insurance and other charges to the place of shipment.

The figures shown in this report are presented according to the commodity classification provided in Schedule B (Statistical Classification of Domestic and Foreign Commodities Exported from the United States). Detailed information on individual shipments valued under \$250 are excluded. Statistics covering such shipments are combined under Schedule B commodity number 931.0040.

VI - SHIPMENTS OF MERCHANDISE FROM VIRGIN ISLANDS TO PUERTO RICO

These import statistics are based on the import entry, which importers are required to file at the Custom District of Puerto Rico.

The value is in general based on market or selling price, and is f.o.b. Commodity information is reported according to the classifications established in T.S.U.S.A. (Tariff Schedules of the United States Annotated).
