## P R E F A C I O

La publicación *External Trade Statistics, Puerto Rico, Estadísticas de Comercio Exterior* es un documento publicado anualmente por la Junta de Planificación en donde se presentan las estadísticas del comercio exterior de Puerto Rico. Estas son recopiladas por el Negociado del Censo federal utilizando en ese proceso las declaraciones de embarque y los formularios que se requiere sometan las empresas a la Oficina de Aduana Federal. La presente edición corresponde al año fiscal 1982 y consiste de un volumen con secciones separadas para las importaciones y exportaciones.

Las importaciones y exportaciones constituyen en Puerto Rico una alta proporción de la producción económica originada, por lo cual son uno de los insumos más importantes para medir el movimiento de nuestra economía. En este sentido, la información que proveen las empresas al llenar sus declaraciones de embarque se convierte en una estadística de gran utilidad para el gobierno y el sector privado.

Consciente de la gran importancia de estas series, la Junta de Planificación y el Negociado del Censo federal trabajan conjuntamente para mejorar la calidad y el contenido de las mismas. En particular se han dado los pasos correspondientes para lograr una mayor colaboración de las empresas del sector privado con el fin de que éstas den una mayor rigurosidad al requisito de llenar las declaraciones de embarque. Por otro lado, se ha solicitado enmendar el formato de la misma, de suerte que ésta incluya información adicional necesaria que actualmente no cubre o no mide en forma adecuada. Se espera que estos esfuerzos permitan continuar disponiendo gradualmente de estadísticas de comercio exterior más completas.

Agradecemos la colaboración recibida a través de los años de la División de Comercio Exterior del Negociado del Censo federal, quien mediante un acuerdo firmado al efecto nos ha provisto estadísticas mensuales del comercio exterior de Puerto Rico. Damos también las gracias a la Oficina de Programación y Sistemas y a otras unidades del Área de Planificación Económica y Social, como también a la División de Servicios Auxiliares de la Junta de Planificación, quienes han participado en la preparación de esta publicación.

## P R E F A C E

The publication *External Trade Statistics, Puerto Rico, Estadísticas de Comercio Exterior* is an annual document prepared by the Puerto Rico Planning Board for presenting the external trade statistics of Puerto Rico. These statistics are compiled by the U.S. Bureau of the Census from the Shipper's Exports Declarations (SED) submitted by business enterprises to the U.S. Customs and from copies of the import entry and warehouse withdrawal forms that importers are required to file. The present edition of this publication corresponds to the fiscal year 1982 and consists of one volume with separate sections for imports and exports.

In Puerto Rico imports and exports statistics constitute a very high proportion of the value of economic production, being in this way one of the most important inputs used for measuring changes in our economy. Thus, it is significant that the data obtained by the U.S. Bureau of the Census from the shipper's export declarations is translated in information of great usefulness for the government and for the private sector.

Due to the importance of this source of information the Puerto Rico Planning Board and the U.S. Bureau of the Census are working in conjunction to insure the most coverage and best quality for them. In this sense, some steps have been initiated in order to obtain a greater collaboration from enterprises of the private sector by filling out the Shipper's Export Declaration. Besides, they have requested to ammend the format of this document so to incorporate certain necessary information not being presented now and other included partially.

We are confident that all these efforts will permit us to have external trade statistics of a growing quality.

We appreciate the assistance given by the Foreign Trade Division of the U.S. Bureau of the Census that under an agreement has been supplying us monthly external trade statistics of Puerto Rico. We also give our thanks to the Office of Systems and Programming and to other units of the Area of Economic and Social Planning, and also to the Division of Auxiliary Services of the Puerto Rico Planning Board, that have participated in the preparation of this publication.

Los datos sobre el comercio exterior de Puerto Rico son recopilados por el Negociado del Censo del Departamento de Comercio de Estados Unidos. Estos son suministrados mensualmente a la Junta de Planificación en cintas magnéticas y en publicaciones que contienen estadísticas sobre el comercio exterior, detalladas por producto y por país. Las mismas constituyen la fuente de información utilizada para preparar esta publicación.

El Negociado de Análisis Económico dispone de estadísticas mensuales del comercio exterior de Puerto Rico y cualquier persona interesada puede obtenerlas mediante solicitud a este negociado. Además, el Negociado del Censo de Estados Unidos en su informe mensual FT800 (U.S. Trade with Puerto Rico and U.S. Possessions) publica información sobre el comercio entre Puerto Rico y Estados Unidos.

Aun cuando las personas interesadas pueden obtener definiciones específicas y descripciones del contenido de estas estadísticas en publicaciones del Negociado del Censo de Estados Unidos, consideramos que el siguiente resumen de definiciones de los datos podría serles útil.

## I. EMBARQUES DE MERCANCIA DE ESTADOS UNIDOS A PUERTO RICO

Estas estadísticas están basadas en las declaraciones de embarques sometidas por los exportadores al momento de efectuar las mismas en Estados Unidos. El valor informado incluye, además del precio de la transacción, los costos de transportación interna, el seguro y otros cargos que se añaden por llevar las mercaderías hasta la frontera o el puerto marítimo. Este se conoce como el precio libre a bordo en el puerto de embarque y no debe incluir el flete marítimo, el seguro marítimo y otros costos que se añaden más allá del puerto desde el cual se envía la mercancía. Se incluyen aquí los embarques procedentes de los 50 estados a través de todos los medios de transportación. Los embarques a Puerto Rico de Islas Vírgenes y de otros territorios y posesiones se incluyen en los embarques de esas áreas a Estados Unidos publicados por el Departamento de Comercio federal.

Los embarques de equipo militar y naval y los suministros para las fuerzas armadas de Estados Unidos, así como los embarques de muebles de oficina, equipo y suministros de las agencias del Gobierno de Estados Unidos para su uso, no están incluidos en estas estadísticas.

Los datos de los embarques provenientes de los Estados Unidos se presentan de acuerdo a la clasificación por producto que provee el manual de clasificación conocido en inglés como el "Schedule B" (Statistical Classification of Domestic and Foreign Commodities Exported from the United States). El mismo no provee detalle por producto para los embarques individuales valorados en menos de 500 dólares. El valor total de estos embarques se estima a base de por cientos establecidos de totales agregados. A partir de enero de 1978 estos embarques aparecen incluidos en el número de clasificación 8189000 (anterior a esta fecha en el 9310040), perteneciente al "Schedule B".

## II. IMPORTACIONES DE PUERTO RICO DE PAISES EXTRANJEROS

Estas estadísticas están basadas en los documentos sobre mercaderías que tienen que someter los importadores a la Oficina de Aduana federal a través del Distrito de Aduana de Puerto Rico. Las series presentadas se refieren a "Importaciones para el Consumo", o sea, incluyen importaciones de mercaderías para consumo directo y aquellas retiradas de los almacenes de adeudo. Estas estadísticas incluyen tanto embarques del gobierno como del sector privado procedentes de países extranjeros. Sin embargo, se excluye la mercancía devuelta por las fuerzas armadas de Estados Unidos para su propio uso. El valor informado se basa generalmente en el valor de la transacción libre a bordo (en inglés f.a.s.) en el país de exportación. No se incluyen los cargos por derechos de aduana de Estados Unidos.

El país de origen se define como el país en donde la mercancía o producto fue cultivado, extraído o manufacturado. Cuando se desconoce el país de origen se presenta el país de embarque. Las estadísticas de importaciones de países extranjeros se presentan de acuerdo a las descripciones

de productos a siete dígitos del manual de clasificación conocido por las siglas T.S.U.S.A. (Tariff Schedules of the United States Annotated), publicado por el Departamento de Comercio de Estados Unidos.

### III. EMBARQUES DE MERCANCIA DE ISLAS VIRGENES A PUERTO RICO

Estas estadísticas están basadas en los documentos de importación que se requiere a los importadores rendir en el Distrito de Aduana de Puerto Rico. El valor informado corresponde al valor estimado por el Servicio de Aduana de Estados Unidos para propósitos aduaneros. El detalle de la información por producto se prepara siguiendo las clasificaciones establecidas en el manual de clasificación T.S.U.S.A. (Tariff Schedules of the United States Annotated).

### IV. EMBARQUES DE MERCANCIA DE PUERTO RICO A ESTADOS UNIDOS

Estos están basados en las declaraciones de embarques sometidas por los exportadores a las Oficinas del Servicio de Aduana de Estados Unidos en Puerto Rico. En la radicación de estas declaraciones y en la cobertura de estas estadísticas se siguen las mismas reglas y procedimientos que en los embarques de Estados Unidos a Puerto Rico. Hasta diciembre de 1977 los embarques de Puerto Rico a los Estados Unidos fueron agrupados por producto de acuerdo al manual de clasificación conocido como "Schedule P" (Commodity Classification for Reporting Shipments from Puerto Rico to the United States), preparado por el Negociado del Censo de Estados Unidos. A partir de enero de 1978 estos embarques se presentan de acuerdo a las clasificaciones por producto provistas en el manual de clasificación "Schedule B" (Statistical Classification of Domestic and Foreign Commodities Exported from the United States).

### V. EXPORTACIONES DE MERCANCIA DE PUERTO RICO A PAISES EXTRANJEROS

Al igual que en los casos anteriores estas estadísticas están basadas en las declaraciones de embarques sometidas por los exportadores en el puerto de exportación en Puerto Rico. El valor de los embarques está basado en el precio de la transacción que incluye el flete de transportación interna, los seguros, y otros cargos que se añaden al llevar la mercancía al lugar de exportación. La mercancía en tránsito que se envía a través de Puerto Rico de un país extranjero a otro no se informa como exportación. Sin embargo, aquella mercancía importada que pasa a través de la Aduana y que es reexportada sin ser procesada, se considera separadamente como una exportación de mercancía extranjera y se incluye en esta tabla dentro de las clasificaciones correspondientes por producto. Las exportaciones de Puerto Rico a países extranjeros están clasificadas de acuerdo al manual de clasificación conocido como el "Schedule B" (Statistical Classification of Domestic and Foreign Commodities Exported from the United States). No se presenta información detallada por producto para los embarques con un valor menor de 500 dólares. El valor total de dichas exportaciones aparece bajo la codificación de producto número 8189000 en las estadísticas publicadas a partir de enero de 1978 (con anterioridad a esa fecha la clasificación era 9310040).

El país destinatario se define como el lugar donde la mercancía será consumida, procesada posteriormente o manufacturada. En caso que el exportador no disponga de información concreta sobre el destino último del embarque, para propósitos estadísticos éste se acredita al país hacia donde está consignado.

### VI. EMBARQUES DE MERCANCIA DE PUERTO RICO A ISLAS VIRGENES

Estas estadísticas están basadas en las declaraciones de embarques sometidas por los exportadores al oficial de aduana al momento de realizar los embarques de Puerto Rico a Islas Vírgenes. Se incluyen los embarques a través de todos los medios de transportación. El valor está basado en el precio de la transacción, incluyendo el flete de transportación interna, los seguros y otros cargos que se añaden al llevar la mercancía al lugar de embarque.

Las cifras que se presentan en este documento fueron clasificadas de acuerdo al manual de clasificación conocido como "Schedule B" (Statistical Classification of Domestic and Foreign Commodities Exported from the United States). No se incluye información detallada sobre embarques con un valor menor de 500 dólares. Las estadísticas que cubren dichos embarques aparecen dentro de la clasificación número 8189000 del "Schedule B" desde enero de 1978 (con anterioridad a esta fecha se clasificaba bajo el número 9310040).

The data on the external trade of Puerto Rico are compiled by the Bureau of the Census of the United States Department of Commerce. The Planning Board is the recipient of monthly magnetic tapes and other media containing detailed statistics on foreign trade by commodities and by countries, which were the source used to prepare the data as presented here.

Monthly statistics are maintained in the Bureau of Economic Analysis and will be furnished to any interested person upon request. Data on trade between Puerto Rico and the United States are also published by the U.S. Bureau of the Census in the monthly report number FT 800 (U.S. Trade with Puerto Rico and U.S. Possessions).

The reader may refer to publications of the United States Bureau of the Census for specific definitions and statements of what is included in these statistics. However, the following summary description of the data may be helpful:

## I - SHIPMENTS OF MERCHANDISE FROM THE UNITED STATES TO PUERTO RICO

These statistics are based on shipper's export declarations filed at the time of shipment from the United States. The value is based on the transaction price including inland freight, insurance and other charges to border point or seaport. It is f.a.s. (free alongside ship) in the port of embarkation. It should not include ocean freight, marine insurance or other charges incurred beyond the port of exportation. Shipments by all methods of conveyance from the 50 States are included here. Shipments from Virgin Islands and other territories and possessions to Puerto Rico are included in data on shipments to United States from those areas as published by the U.S. Department of Commerce.

Shipments of military and naval equipment and supplies for the United States Armed Forces and shipments by U.S. Government agencies of office furniture, equipment and supplies for the use of such agencies are not included in the statistics.

Data on shipments from United States are presented according to the commodity classifications provided in Schedule B (Statistical Classification of Domestic and Foreign Commodities Exported from the United States). There is no commodity detail available on individual shipments valued under \$500. The total value of these shipments is estimated based on established percentages of overall totals and shown under Schedule B commodity classification 8189000 effective with the January, 1978 statistics (under 9310040 prior to that date).

## II - IMPORTS INTO PUERTO RICO FROM FOREIGN COUNTRIES

These import statistics are based on regular U.S. Custom entries of merchandise filed by importers through the Customs District of Puerto Rico. The series presented here refer to "Imports for Consumption", that is, it includes imports for direct consumption plus withdrawals from bonded warehouses. These statistics include government as well as nongovernment shipments of merchandise from foreign countries. However, U.S. goods returned by the U.S. Armed Forces for their own use are excluded. The value is in general based on the transaction value f.a.s. the exporting country. United States imports duties are excluded.

The country of origin is defined as the country where the merchandise was grown, mined or manufactured. Where the country of origin is not known, the country of shipment is shown. Data on imports from foreign countries are presented according to the seven digit commodity descriptions established in Schedule T.S.U.S.A. (Tariff Schedules of the United States Annotated), published by U.S. Department of Commerce.

### III - SHIPMENTS OF MERCHANDISE FROM VIRGIN ISLANDS TO PUERTO RICO

These import statistics are based on the import entry, which importers are required to file at the Custom District of Puerto Rico.

The value shown is the Customs value, which is the value of imports as appraised by the U.S. Customs Service. Commodity information is reported according to the classifications established in T.S.U.S.A. (Tariff Schedules of the United States Annotated).

### IV - SHIPMENTS FROM PUERTO RICO TO THE UNITED STATES

These are based on shipper's export declarations filed with the U.S. Custom in Puerto Rico. The principle governing the filing of these declarations and the coverage of these statistics are the same of those on shipments from the United States to Puerto Rico. The shipments to United States up to December, 1977 were tabulated according to the commodity classifications published by the U.S. Bureau of the Census in Schedule P (Commodity Classification for Reporting Shipments from Puerto Rico to the United States). Since January, 1978 these shipments are presented according to the commodity classifications provided in the Schedule B. (Statistical Classification of Domestic and Foreign Commodities Exported from the United States).

### V - EXPORTS FROM PUERTO RICO TO FOREIGN COUNTRIES

These are likewise based on shipper's export declarations filed by the exporters at the port of exportation in Puerto Rico. The value of shipments is based on the transaction price including inland freight, insurance and other charges to the place of export. Merchandise shipped through Puerto Rico in transit from one foreign country to another is not reported as export, but imported merchandise which has cleared through Customs and which is re-exported without processing is covered separately as exports of foreign merchandise and included in this table in the corresponding commodity classifications. Exports from Puerto Rico to foreign countries are classified according to Schedule B (Statistical Classification of Domestic and Foreign Commodities Exported from the United States). There is no commodity detail available for shipments valued under \$500 and the total value of such exports appears under commodity number 8189000 effective with the January, 1978 statistics (under 9310040 prior to that date).

The country of destination is defined as the place where merchandise is to be consumed, further processed or manufactured. In the event the exporter does not have definite information as to the country of ultimate destination for a shipment, it is credited for statistical purposes to the country to which it is consigned.

### VI - SHIPMENTS OF MERCHANDISE FROM PUERTO RICO TO VIRGIN ISLANDS

These statistics are based on shipper's export declarations, filed with collector of Customs at the time the merchandise is shipped from Puerto Rico to Virgin Islands. Shipments by all methods of transportation are included. The value is based on the transaction price including inland freight, insurance and other charges to the place of shipment.

The figures shown in this report are presented according to the commodity classification provided in Schedule B (Statistical Classification of Domestic and Foreign Commodities Exported from the United States). Detailed information on individual shipments valued under \$500 are excluded. Statistics covering such shipments are combined under Schedule B commodity number 8189000 effective with the January, 1978 statistics (under 9310040 prior to that date).
