The publication *External Trade Statistics, Puerto Rico*, presents detailed information on the external trade of Puerto Rico. The objective of this document is to serve the needs of both government and nongovernment users, regarding the statistics on the foreign trade movement of Puerto Rico.

This edition consists of one volume, containing the figures corresponding to fiscal year 1984. The data is presented in a summary table for the value of imports and exports, by country of origin and destination, and the balance of trade for Puerto Rico with these countries. Separate sections for imports and exports provide data in commodity-by-country detail, with totals for major commodity groupings.

In view of the importance of these statistics, the Puerto Rico Planning Board, in conjunction with the U.S. Bureau of the Census, are continuously directing their efforts toward obtaining the proper filing of the Shipper's Export Declarations, which are the primary source of the information, for more accurate statistics.

We acknowledge the collaboration received from the Foreign Trade Division of the U.S. Bureau of the Census that under an agreement has been providing the monthly external trade statistics used to prepare this publication. We also appreciate the cooperation granted by the Office of Systems and Programming and by other units of the Area of Economic and Social Planning, and by the Division of Auxiliary Services of the Puerto Rico Planning Board.

8 - Special Classification Provisions	476

EXPLANATION OF STATISTICS

The data on the external trade of Puerto Rico are compiled by the Bureau of the Census of the United States Department of Commerce. The Planning Board is the recipient of monthly magnetic tapes and other media containing detailed statistics on foreign trade by commodities and by countries, which were the source used to prepare the data as presented here. Monthly statistics are maintained in the Bureau of Economic Analysis and will be furnished to any interested person upon request.

Puerto Rico is a customs district within the U.S. Customs territory. The statistics on trade of Puerto Rico with foreign countries represent exports and imports through the Puerto Rico Customs District and do not necessarily represent exports of commodities originating in Puerto Rico or imports of commodities for direct consumption in Puerto Rico. Data on trade between Puerto Rico and the United States are also published by the U.S. Bureau of the Census in the monthly report number FT 800 (U.S. Trade with Puerto Rico and U.S. Possessions).

The reader may refer to publications of the United States Bureau of the Census for specific definitions and statements of what is included in these statistics. However, the following summary description of the data may be helpful:

I - SHIPMENTS OF MERCHANDISE FROM THE UNITED STATES TO PUERTO RICO

These statistics are based on Shipper's Export Declarations filed at the time of shipment from the United States. The value is based on the transaction price including inland freight, insurance and other charges to border point or seaport. It is f.a.s. (free alongside ship) in the port of embarkation. It should not include ocean freight, marine insurance or other charges incurred beyond the port of exportation. Shipments by all methods of conveyance from the 50 States are included here. Shipments from Virgin Islands and other territories and possessions to Puerto Rico are included in data on shipments to United States from those areas as published by the U.S. Department of Commerce.

Shipments of military and naval equipment and supplies for the United States Armed Forces and shipments by U.S. Government agencies of office furniture, equipment and supplies for the use of such agencies are not included in the statistics.

Data on shipments from United States are presented according to the commodity classifications provided in Schedule B (Statistical Classification of Domestic and Foreign Commodities Exported from the United States). There is no commodity detail available on individual shipments valued under \$500. The total value of these shipments is estimated based on established percentages of overall totals and shown under Schedule B commodity classification 8189000 effective with the January, 1978 statistics (under 9310040 prior to that date).

II - IMPORTS INTO PUERTO RICO FROM FOREIGN COUNTRIES

These import statistics are based on regular U.S. Customs entries of merchandise filed by importers through the Customs District of Puerto Rico. The series presented here refer to "Imports for Consumption", that is, it includes imports for direct consumption plus withdrawals from bonded warehouses. These statistics include government as well as nongovernment shipments of merchandise from foreign countries. However, U.S. goods returned by the U.S. Armed Forces for their own use are excluded. Effective January 1982, import data are presented in terms of Customs value. The Customs value is generally defined as the price actually paid or payable for merchandise when sold for exportation to the United States, excluding U.S. import duties, freight, insurance, and other charges incurred in bringing the merchandise to the United States. Prior to 1982, the import data were presented in terms of f.a.s. (free alongside ship) value. The f.a.s. value was defined as the transaction value of imports at the foreign port of exportation.

The country of origin is defined as the country where the merchandise was grown, mined or manufactured. Where the country of origin is not known, the country of shipment is shown. Data on imports from foreign countries are presented according to the seven digit commodity descriptions established in Schedule T.S.U.S.A. (Tariff Schedules of the United States Annotated), published by U.S. Department of Commerce.

III - SHIPMENTS OF MERCHANDISE FROM VIRGIN ISLANDS TO PUERTO RICO

These import statistics are based on the import entry, which importers are required to file at the Customs District of Puerto Rico.

The value shown is the Customs value, which is the value of imports as appraised by the U.S. Customs Service. Commodity information is reported according to the classifications established in T.S.U.S.A. (Tariff Schedules of the United States Annotated).

IV - SHIPMENTS FROM PUERTO RICO TO THE UNITED STATES

These are based on Shipper's Export Declarations filed with the U.S. Customs in Puerto Rico. The principle governing the filing of these declarations and the coverage of these statistics are the same of those on shipments from the United States to Puerto Rico. The shipments to United States up to December, 1977 were tabulated according to the commodity classifications published by the U.S. Bureau of the Census in Schedule P (Commodity Classification for Reporting Shipments from Puerto Rico to the United States). Since January, 1978 these shipments are presented according to the commodity classifications provided in the Schedule B (Statistical Classification of Domestic and Foreign Commodities Exported from the United States).

V - EXPORTS FROM PUERTO RICO TO FOREIGN COUNTRIES

These are likewise based on Shipper's Export Declarations filed by the exporters at the port of exportation in Puerto Rico. The value of shipments is based on the transaction price including inland freight, insurance and other charges to the place of export. Merchandise shipped through Puerto Rico in transit from one foreign country to another is not reported as export, but imported merchandise which has cleared through Customs and which is re-exported without processing is covered separately as exports of foreign merchandise and included in this table in the corresponding commodity classifications. Exports from Puerto Rico to foreign countries are classified according to Schedule B (Statistical Classification of Domestic and Foreign Commodities Exported from the United States). There is no commodity detail available for shipments valued under \$500 and the total value of such exports appears under commodity number 8189000 effective with the January, 1978 statistics (under 9310040 prior to that date).

The country of destination is defined as the place where merchandise is to be consumed, further processed or manufactured. In the event the exporter does not have definite information as to the country of ultimate destination for a shipment, it is credited for statistical purposes to the country to which it is consigned.

VI - SHIPMENTS OF MERCHANDISE FROM PUERTO RICO TO VIRGIN ISLANDS

These statistics are based on Shipper's Export Declarations, filed with collector of Customs at the time the merchandise is shipped from Puerto Rico to Virgin Islands. Shipments by all methods of transportation are included. The value is based on the transaction price including inland freight, insurance and other charges to the place of shipment.

The figures shown in this report are presented according to the commodity classification provided in Schedule B (Statistical Classification of Domestic and Foreign Commodities Exported from the United States). Detailed information on individual shipments valued under \$500 are excluded. Statistics covering such shipments are combined under Schedule B commodity number 8189000 effective with the January, 1978 statistics (under 9310040 prior to that date).
