## PREFACE

The publication, **Puerto Rico External Trade Statistics 1989**, presents detailed information by commodities regarding the Island's external trade for the fiscal year 1989. It consist of two volumes: the first, contains the statistics from July to December 1988; the second, those from January to June 1989.

This presentation obeys to the adoption of new schedules under the Harmonized System, effective January 1989. The differences between these schedules and those used until December 1988, at commodity level made it very difficult to accumulate the statistics on a fiscal year basis. In fact, the previous Schedule B and Tariff Schedules Annotated consisted of eight (8) major commodity groups. By the other way, the new schedules are composed of 22 sections and approximately 98 chapters.

We acknowledge the collaboration received from the Foreign Trade Division of the U. S. Bureau of the Census that under an agreement has been providing the monthly external trade statistics used to prepare this publication. Also, we appreciate the cooperation granted by the Area of Information Systems, by other units of the Area of Economic and Social Planning and the Division of Auxiliary Services of the Puerto Rico Planning Board.

This document will be of help to those interested on Puerto Rico's external trade activity.

## EXPLANATION OF STATISTICS

The data on the external trade of Puerto Rico are compiled by the Bureau of the Census of the United States Department of Commerce. The Planning Board is the recipient of monthly magnetic tapes and other media containing detailed statistics on external trade by commodities and by countries. The source used to prepare the data as presented here consists of monthly statistics maintained in the Bureau of Economic Analysis and will be furnished to any interest person upon request.

Puerto Rico is a customs district within the U. S. Customs territory. The statistics on trade of Puerto Rico with foreign countries represent exports and imports through the Puerto Rico Customs District and do not necessarily represent exports of commodities originating in Puerto Rico or imports of commodities for direct consumption in Puerto Rico. Data on trade between Puerto Rico and the United States are also published by the U. S. Bureau of the Census in the monthly report number FT800 until December 1988 and continue to January 1989, with the new monthly report number FT895 (U. S. Trade with Puerto Rico and U. S. Possessions).

The reader may refer to publications of the United States Bureau of the Census for specific definitions and statements of what is included in these statistics. However, the following summary description of the data may be helpful:

### I- SHIPMENTS OF MERCHANDISE FROM THE UNITED STATES TO PUERTO RICO

These statistics are based on Shipper's Export Declarations filed at the time of shipment from the United States. The value is based on the transaction price including inland freight, insurance and other charges to border point or seaport. It is f.a.s. (free alongside ship) in the port of embarkation. It should not include ocean freight, marine insurance or other charges incurred beyond the port of exportation. Shipments by all methods of conveyance from the 50 states are included here. Shipments from Virgin Islands and other territories and possessions to Puerto Rico are included in data on shipments to United States from those areas as published by the U. S. Department of Commerce.

### II- IMPORTS INTO PUERTO RICO FROM FOREIGN COUNTRIES

These import statistics are based on regular U. S. Customs entries of merchandise filed by importers through the Customs District of Puerto Rico. The series presented here refer to "Imports for Consumption", that is, it includes imports for direct consumption plus withdrawals from bonded warehouses. These statistics include government as well as nongovernment shipments of merchandise from foreign countries. However, U. S. goods returned by the U. S. Armed Forces for their own use are excluded. Effective January 1982, import data are presented in terms of customs value. The customs value is generally defined as the price actually paid or payable for merchandise when sold for exportation to the United States, excluding U. S. import duties, freight, insurance, and

other charges incurred in bringing the merchandise to the United States. Prior to 1982, the import data were presented in terms of f.a.s. (free alongside ship) value. The f.a.s. value was defined as the transaction value of imports at the foreign port of exportation.

### **III- SHIPMENTS OF MERCHANDISE FROM VIRGIN ISLANDS TO PUERTO RICO**

These import statistics are based on the import entry, which importers are required to file the Customs District of Puerto Rico. The value shown is the customs value, which is the value of imports as appraised by the U. S. Customs Service. Commodity information is reported according to the classifications established in the Schedules.

### **IV- SHIPMENTS FROM PUERTO RICO TO THE UNITED STATES**

These are based on Shipper's Export Declaration filed with the U. S. Customs in Puerto Rico. The principle governing the filing of these declarations and the coverage of these statistics are the same of these on shipments from the United States to Puerto Rico.

### **V- EXPORTS FROM PUERTO RICO TO FOREIGN COUNTRIES**

These are likewise based on Shipper's Export Declaration filed by the exporters at the port of exportation in Puerto Rico. The value of shipments is based on the transaction price including inland freight, insurance and other charges to the place of export. Merchandise shipped through Puerto Rico in transit from one foreign country to another is not reported as export, but imported merchandise which has cleared through customs and which is re-exported without processing is covered separately as exports of foreign merchandise and included in this table in the corresponding commodity classifications. Export from Puerto Rico to Foreign Countries are classified according your respective Schedule.

The country of destination is defined as the place where merchandise is to be consumed, further processed or manufactured. In the event the exporter does not have definite information as to the country of ultimate destination for a shipment, it is credited for statistical purposes to the country to which it is consigned.

### **VI- SHIPMENTS OF MERCHANDISE FROM PUERTO RICO TO VIRGIN ISLANDS.**

These statistics are based on Shipper's Export Declarations, filed with collector of customs at the time the merchandise is shipped from Puerto Rico to Virgin Islands. Shipments by all methods of transportation are included. The value is based on the transaction price including inland freight, insurance and other charges to the place of shipment.

The figures shown in this report are presented according to the commodity classification provided in the corresponding Schedule.
