QUICK ON-SITE ASSEMBLY

READY-TO-FINISH KITCHENS

Reduce Labor, Maximize Profits

- Fast Installation:** Designed for quick assembly, ready to be finished in the same day. All panels are pre-labeled and appliance openings done for you. No foundation needed, perfect for existing pavers.
- Heavy-Duty & Durable:** Our frames are made from hardcore 1x1 Heavy-Gauge Aluminum that guarantees no rusting, no warping, and maintains structural integrity for a lifetime. This is combined with Oxi-Fiber Board, a lightweight, structural board that's inherently fire, water, rot and insect resistant, providing an incredibly durable and stable core for any finish.

PRO-FIT OUTDOOR KITCHENS

FAST INSTALLATION

Can be assembled quick. No foundation needed perfect for existing pavers you don't want to disturb.

PIONEER DESIGN SOFTWARE

Get accurate, detailed project layouts and lists of components. Bull Equipment Pricing & NPT Finishes.

VERSATILE FINISHES

Accepts various finishes like cladding, stacked stone, tile, textured acrylic etc. Pre-finished kits available.

CLEAN CONSTRUCTION PROCESS

No need for mixing concrete or mortar.

UPFRONT VS. LONG-TERM COST

Predictable upfront cost for a finished product. Potential savings if buying in bulk.

CONSTRUCTION

Rigid aluminum frame - designed to never rust, set, or break. Magnesium Oxide (Mgo) Boards -resistant to mildew, mold, and rot, flame spread rating of 0.

OTHER OPTIONS

TIME-CONSUMING & LABOR-INTENSIVE

Requires significant footings (digging, pouring concrete). Can take a couple days to complete.

OUTDATED OR COMPLICATED DESIGN SYSTEMS

Requires advanced design skills or tedious back-and-forth design communication.

LIMITED FINISH OPTIONS

Primarily suited for stone veneer or stucco.

MESSY CONSTRUCTION PROCESS

Requires digging, mixing concrete, cutting blocks.

UPFRONT VS. LONG-TERM COST

Potentially upfront cost, but high mistake probability. Mistakes in cutting blocks or foundation issues can lead to wasted materials, re-work, and additional costs.

CONSTRUCTION

Welded tubular steel, which is prone to rust and can bleed orange onto pavers. Fiber Cement Board is heavyweight susceptible to cracking

vs.

To further simplify and enhance outdoor living projects, Pro-Fit offers innovative water and fire feature kits. These pre-engineered solutions are designed to:

STREAMLINE COMPLEX INSTALLATIONS

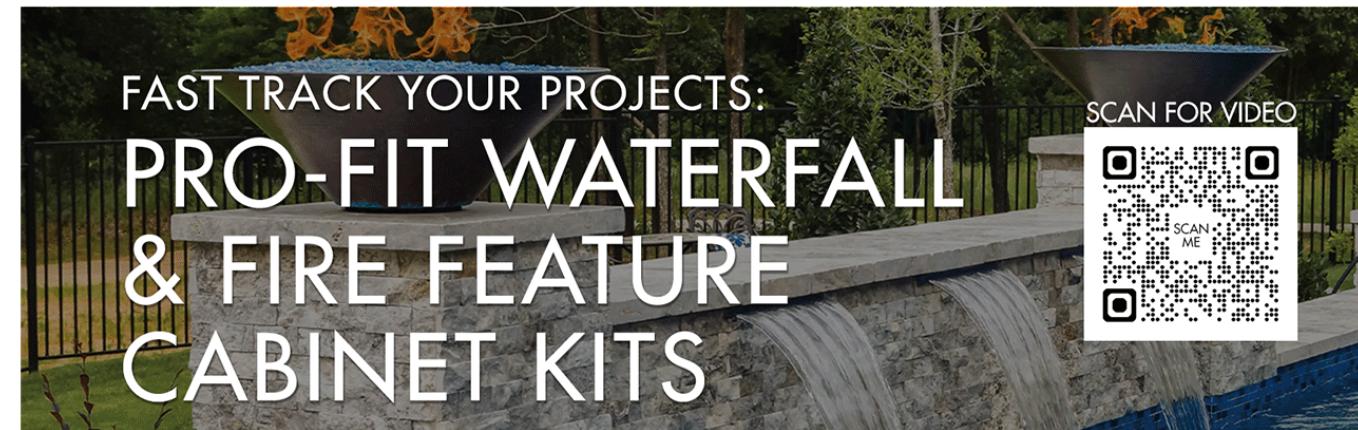

Eliminate the need for extensive, custom on-site fabrication.

REDUCE PROJECT TIMELINES & LABOR COSTS

Our kits allow for quicker, more efficient integration, significantly cutting down on project duration and labor expenses.

BROADEN PROJECT SCOPE:

Enable your partners to offer sophisticated, high-value features to their clients with less effort and risk.
