

Smarter way to water.

World's most advanced irrigation system

Smart Sprinkler Heads

Smart Controller

Irrigreen App

Make it rain.

16 rotating streams simulate rain for better absorption

Intelligently adjusts spray distance in real time

360° rotation – 30ft radius

Built-in self diagnostics

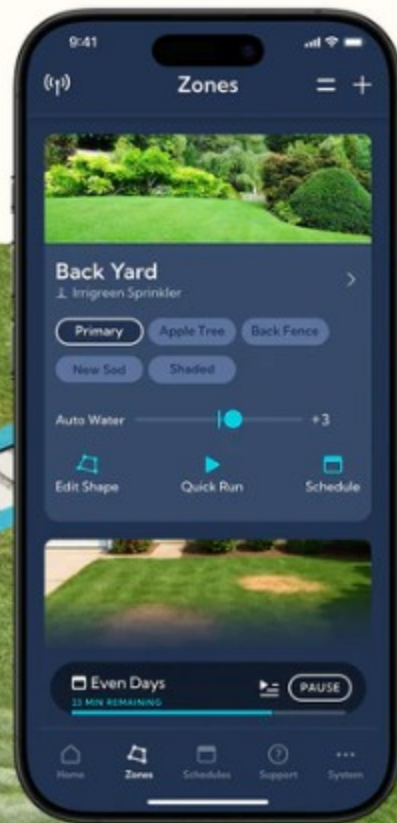

1 head replaces 6-10 traditional heads

2,800 sq ft coverage per sprinkler head

100% zone coverage.

Precision mapped zones with FlexZone™

Water exactly where it's needed and avoid driveways, patios, cars, fence lines, and the house

Greener grass with up to 50% less water than traditional

Set it and forget it.

Weather-Aware automation

Get the best lawn on the block with smart scheduling

 **Morning Skipped** Now
Morning skipped on your Irrigreen system due to the soil having enough moisture.

Control anywhere

Weather aware

Built YardTough.™

Engineered to last

SmartRinse™

Self cleaning.
Clears debris & sand.

16-Spray precision nozzle

More even coverage and
healthier landscapes.

Two motors

Controls rotation & spray distance.

HydroBoost *Optional Upgrade

Improved precision for variable
water sources.

Side water inlet design

Less digging. Cleaner installs.

Mower safe

Durable and
retractable head.

Easily replace parts

Quick-swap components,
without full sprinkler removal.

High-performance materials

Built for harsh environments.

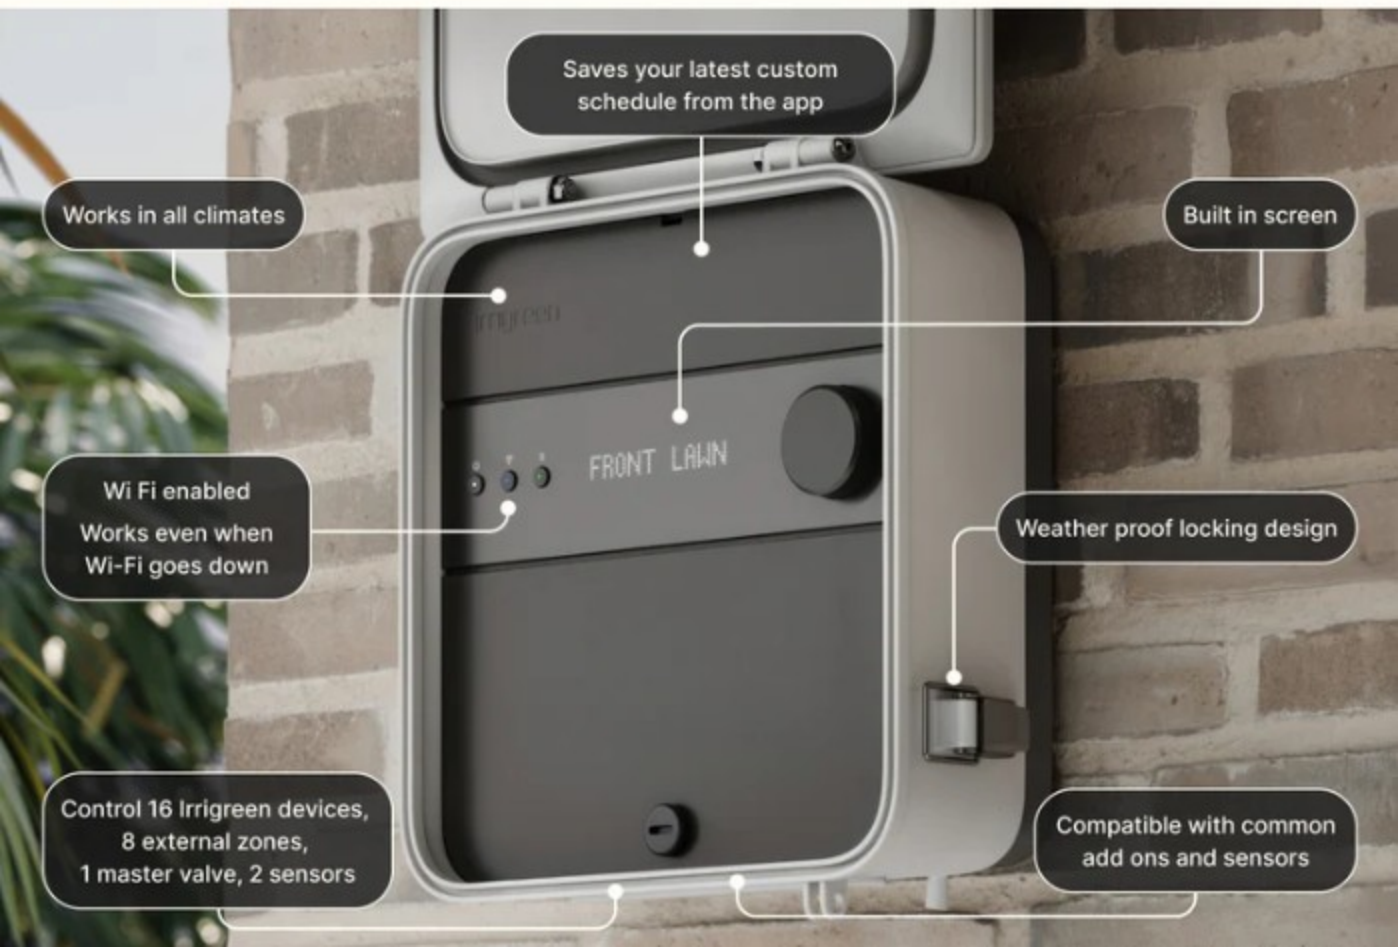

Power + data cables

Weatherproof cables to each head

Designed to disappear.

A sleek, smart controller that looks at home in any space

Saves your latest custom schedule from the app

Works in all climates

Built in screen

Wi-Fi enabled
Works even when Wi-Fi goes down

Weather proof locking design

Control 16 Irrigreen devices,
8 external zones,
1 master valve, 2 sensors

Compatible with common
add-ons and sensors

Greenest lawn on the block.

Make them wonder with up to 50% less water

See the difference.

Greener yards with up to 50% less water than traditional

Features

Heads per zone

1 smart sprinkler head per zone covers up to 2,800 sq ft.

6-10 sprinkler heads per zone.

Maintenance

Fewer heads and pipes. Less maintenance. App notifications for any errors.

More heads and pipes. More maintenance. Limited visibility.

Watering pattern

Arc360™ + RainSim™ with 16 rotating streams for even, rain-like watering for better absorption.

Irregular spray from single stream or mist which evaporates

Zone shape

FlexZone™ mapping to fit real lawn shapes in the app.

Fixed patterns and overlapping arcs that are hard to dial in manually.

Coverage

100% even coverage, less overspray & accurate mapping within 12" or 6" with HydroBoost.

Uneven coverage: dry spots and overspray onto sidewalks, driveways, and homes.

Clogs & debris

Self-cleaning with SmartRinse technology.

Prone to clogging.

Scheduling

Smart Weather-Aware scheduling from the app.

Basic scheduling.

Installation

Up to 80% less pipe, fewer heads, and fewer trenches for a simpler install.

More pipe, more heads, and more trenching with more connections to install.

Cost over time

Uses 50% less water and pays for itself in about 3 to 5 years through water savings.

Uses more water and can cost more over time due to overspray, uneven coverage, and waste.
