

SERENITY PERGOLAS

— BY —

When you want the freedom to relax and entertain outdoors in full shade, **Serenity Pergolas by Outdoor Elements** are the ideal roof structures. Designed and engineered with the same exceptional quality of our Signature line, **Serenity Pergolas** are constructed with 2'-4' wide insulated roof panels that stay in place for a solid covering. They have no motor and no automatic adjustment for wind or rain, leaving the roof in the same position at all times.

Serenity Pergolas are a beautiful and practical element in your outdoor living space. They are particularly popular when installed in balance with other pergolas that have adjustable louvers, giving your outdoor space ultimate adaptability. Do you live in an exceptionally hot area? **Serenity Pergolas** have insulated panels, maximizing the cooling effect of their shade. Make your outdoor space an inviting oasis with a **Serenity Pergola** custom designed to your unique specifications.

Benefits of a Serenity Pergola

- Provide full shade and rain coverage with a solid roof
- Easy to clean and maintain
- Insulated design provides maximum cooling in high temperatures
- Integrated gutter system to filter out the rain
- Engineered to adapt to snow loads and solar panel structures
- Crafted from powder coated aluminum, offering superior quality and durability
- High quality materials give you a beautiful structure that will also standup to weather and resist corrosion
- In addition to custom sizes and shapes, **Serenity Pergolas** are also available in many standard sizes
