## First, Decide...

whether you would like the water in your pool to appear blue or green.

---

For water that looks primarily blue, select a finish with white, blue or gray pigment.

For water that appears green, look for green, tan, brown or black pigment.

# Achieve

DEEP, RICH WATER COLOR.

{ 9 Feet Deep }

{ 4 Feet Deep }

**The Darker  
Your Finish,**  
the darker your pool  
water will be.

---

**The deeper the  
water, the darker  
it will appear.**

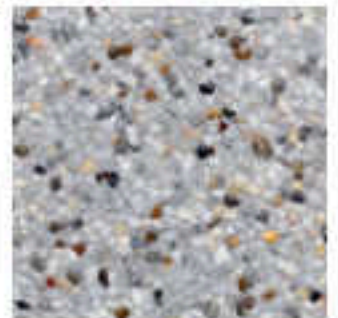

Water will seem lighter in shallower areas like steps, ledges, benches, and beach entries where the finish itself is more visible.

## Beauty, More than Surface Deep...

---

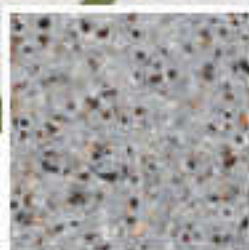

To achieve a deep, rich water color in a pool without a deep end, select a dark colored pool finish.

Your pool's depth has a huge impact on the color of your water.

Your pool may actually appear deeper when you select a finish with a darker pigment.

# Mirror

YOUR SURROUNDINGS.

Since Your Pool Water will mirror its surroundings, many other factors will impact water color.

---

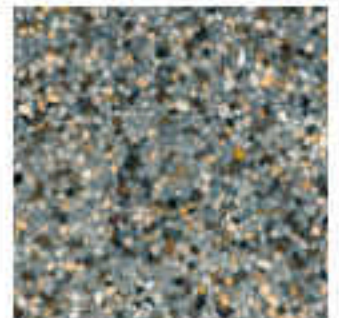

- The design, shape, and depth of your pool
- The time of day and position of the sun
- Whether the sky is sunny, stormy, or overcast
- Your region of the country
- The chemistry of your water
- Landscaping, trees, bushes, and other foliage
- Colors in your home's exterior

- For the sensation of swimming in a pool of rare gems, reflect on the glass beads of JewelScapes®.
- For a remarkably smooth, long-lasting finish, look no further than PolishedScapes®.
- Our most popular, durable finish, StoneScapes®, offers an array of pebble sizes – micro, mini, or regular.
- Combine stunning, smooth glass beads with any size pebbles for a dramatic, custom look all your own.
- For the enduring splendor of a smooth quartz finish, select QuartzScapes® or ColorScapes®.
