

Pro fuel system for motorsports, events or workshop operations

Maximum performance, perfect control – for motorsports, events and workshop operations

The Pro fuel system is the perfect solution for professional use in motorsports, at events or in workshop operations. It combines high performance, precise control and maximum mobility in a robust, rollable flight case – optimised for efficiency and safety.

With a tank capacity of 200 litres, a powerful 400 W pump and a pump delivery rate of up to 76 litres per minute, the fuel system enables fast and clean refuelling of a wide variety of vehicles. Thanks to intelligent app control, the desired fuel quantity can be conveniently preset and each refuelling process can be assigned to a vehicle or event.

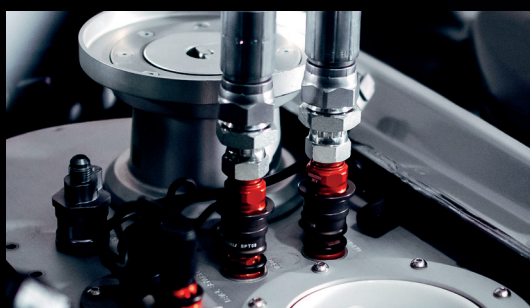

Pro fuel system

Powerful. Mobile. Intuitive.

- App-controlled operation with preset fuel quantity
- Refuelling and draining also possible without app via integrated emergency control
- Level detection via weight and volume for maximum accuracy
- Data recording in app and cloud – transparent and traceable
- Built-in AGM battery (12V) with external charging connection
- Integrated charging concept for tablet, including tablet holder
- Filling possible with standard fuel nozzle
- Compact, rollable flight case with Euro pallet base dimensions for easy transport
- Integrated fuel filter for clean operation

Technical data

TANK CAPACITY	200 LITRE
POWER SUPPLY	12V AGM BATTERY
DIMENSIONS (L X W X H)	120 × 80 × 102 cm
PUMP DELIVERY RATE	76 L/min <i>(actual rate depends on vehicle connection)</i>
PUMP	400 W
CERTIFICATION	TÜV certification in progress

Options & accessories

BARREL SUCTION LANCE
FOR 60–120 LITER BARRELS

BATTERY CHARGER

NOZZLE
WITH STÄUBLI CONNECTOR

VEHICLE
CONNECTION KIT
