

Tyre heating tent - Maximum performance from the first lap

The tyre heating tent is the perfect solution for bringing racing tyres to the optimum operating temperature. Specially developed for motorsport, it provides even, controlled heat and guarantees grip and performance from the first lap.

With three separately adjustable chambers, the tent offers space for several sets of tyres and enables precise temperature control for each tyre. The system is conveniently operated via a touch display, with up to three heating programmes and an additional boost function for fast warm-up times.

Tyre heating tent: Advantages at a glance

- Even heat distribution for maximum performance
- Individual temperature control for each chamber
- Efficient storage in a space-saving flight case
- Optionally expandable to 4 chambers
- Optional: Tyre roller board for easy handling

▬ With the tyre heating tent, your tyres are perfectly prepared – at any time, reliably and efficiently.

Features:

3 separately adjustable chambers

Operation via touch display

Up to three-phase heating programme and additional boost function

Even heat distribution

Individual temperature control

Space-saving flight case for safe transport of components
