

**FOR IMMEDIATE RELEASE**

## PranaX Corporation Appoints Dr. Richard H. LeConey, MD as Chief Medical Officer

**HOUSTON, TX — April 1, 2026** — PranaX Corporation, a biotechnology company focused on regenerative biologics, today announced the appointment of **Dr. Richard H. LeConey, MD**, as Chief Medical Officer. Dr. LeConey will be instrumental in guiding the strategic direction of the PranaX exosome product portfolio. He will oversee clinical development, support physician education and engagement, and help ensure alignment with the evolving standards in aesthetic medicine, wellness, and healthy aging.

Dr. LeConey brings extensive clinical experience spanning emergency medicine, preventive care, and regenerative wellness. He is the founder of AntiAge MedSpa in Houston, where he developed patient-centered approaches to longevity, aesthetics, and overall wellness. He earned his medical degree from the University of Texas Medical Branch at Galveston, providing a strong clinical foundation that informs him of his work in advancing evidence-based regenerative treatments.

“Richard brings a uniquely comprehensive medical perspective, spanning acute care, preventive medicine, and wellness therapies,” said Dr. Steven J. Greco, PhD, COO of PranaX. “As we continue to expand our clinical footprint and strengthen partnerships across the med spa and physician community, his leadership will be instrumental in advancing our strategy and supporting the responsible adoption of our products.”

Dr. LeConey added, “I am excited to join PranaX at a pivotal time in the evolution of regenerative medicine. The company’s focus on scientifically grounded, clinically relevant biologics represents an important step forward for both physicians and patients. I look forward to contributing to the development of solutions that support healthier aging and elevate standards of care across the aesthetic and wellness landscape.”

### **About PranaX**

PranaX is a regenerative biotechnology company dedicated to harnessing stem cell-derived exosomes through evidence-based science. The company’s overarching mission is to unlock the properties of exosomes to promote wellness and lead individuals towards healthier, more fulfilling lives. The company’s development and manufacturing operations are headquartered within the Levit Green Life Sciences campus in Houston, Texas.
