

OVOM affiliate **Rise4Life** in the Netherlands started an initiative to bring **Article 33** of the UN Convention on the Rights of the Child back to the attention it deserves.

Addiction rarely begins with something that looks dangerous. It often starts with a promise: belonging, feeling better, believing it is harmless. Many people say at the beginning: I can stop whenever I want. Until the moment comes when stopping is no longer so simple. It is from that reality that **The Garden** was created, not only as a story, but as a mirror. For young people who do not yet recognize the warning signs. For parents who feel that something is happening, but do not always have the words for it. **The Eindhoven Declaration** makes visible what should have received attention much sooner. It stands for prevention, support, and timely intervention. We stand alongside this mission, with full conviction. Will you join us? rise4life.eu
