

How Yield Point attracted \$40M in new DeFi TVL to Avalanche ▲

On May 15th, 2025, Yield Point Labs launched the Unity delta-neutral synthetic dollar (\$UTY) on Avalanche. This new financial primitive brought the possibility of simplified, native AVAX-denominated delta-neutral yield to the Avalanche ecosystem. Within days of launch, the Unity liquidity pool became the largest synthetic dollar exchange pair pool on Pharaoh Markets. Unity quickly became a top 5 synthetic dollar product on Avalanche.

Yield Point Labs introduced the Unity product because there was a clear gap in the market for delta-neutral synthetic dollars designed to benefit native ecosystems, rather than extract liquidity cross-chain. In addition, the Yield Point Labs team had ran the underlying trade strategy for the two years prior to launch on live, family office capital. Through extensive testing prior to launch, the team established protocols for weathering high volatility events, including an extensive risk alerting system, 24/7 human and algorithmic monitoring, and strict borrowing limits.

The Results We Delivered in 2 Months...

+2%

in new DeFi TVL for the Avalanche ecosystem

+14.3%

APY to depositors (trailing 30d APY)

#1

Stable pair pool on Pharaoh Markets

How We Did It

Our co-founders had previously founded Algorand and reached over \$20 billion in market cap through 0 to 1 growth and aggressive ecosystem development. Given that experience, the Yield Point Labs team has a network of industry OGs and DeFi connections relevant to growing and attracting capital to an L1 DeFi ecosystem.

The Yield Point Labs trading team has nearly a decade of experience trading billions in monthly volume throughout multiple crypto cycles. The delta-neutral strategy deployed by Yield Point Labs is incorporates funding rate yield from nine different crypto assets.

We tailored the Unity strategy launched on Avalanche to the needs of the ecosystem with the support of Ava Labs.

What's Next

Yield Point Labs actively explores and tests new frontier yield strategies. Any L1 or L2 foundations interested in collaborating with our team to develop custom products to support DeFi ecosystem growth should contact us at info@xsy.fi
