MIXING INSTRUCTIONS

Serving suggestions only

SOFT SERVE

Step 1: Pour 3.5 liters of cool, clean drinking water into Frosty Boy Mixing Bucket (food-grade mixing container) suitable for preparing food.

Step 2: Open a 1.5 kg bag of Frosty Boy YoFrost Powder and pour into the water while mixing with a wire whisk. Keep mixing for about 30 seconds or until all the sugar has dissolved.

Step 3: Allow to stand for 10 minutes. Whisk vigorously before putting into soft serve machine and freeze down.

NOTE: Utensils used for preparing Frosty Boy YoFrost Powder must not be used to prepare or store other food products.

For an extra burst of flavour, add Frosty Boy Flavour Sachets.

Available in Dark Cocoa, Caramel and Milk Chocolate, these flavour sachets enhance both soft serve and yoghurt.

- Serving suggestions only.
- The colours may vary depending on the base and overrun of the mix.
