ARTEVO

The power of composite

ARTEVO represents the pinnacle of the evolution of window systems. Premium composite material, superior design, and maximum performance – all in a single perfect solution for your demanding projects. ARTEVO combines technology, aesthetics, and sustainability in a single system without compromise.

- ✓ RAU-FIPRO X composite
- ✓ LowE variant for passive houses
- ✓ Frame depth: 80 mm
- ✓ Element height up to 2.8 m
- ✓ Sound insulation up to 48 dB
- ✓ Design with aluminium appearance

Care in every frame

ARTEVO

Premium design

A flush-fitting sash with aluminium-like appearance and mattex paint for a contemporary architectural look. Minimalist lines, thin profiles, and precise workmanship make ARTEVO a stylish highlight of modern buildings.

Revolutionary material

The RAU-FIPRO X composite with fibreglass ensures exceptional strength, dimensional stability, and a long service life. Thanks to the strength of the composite material, no steel reinforcements are usually needed, eliminating thermal bridges and improving the efficiency of the system.

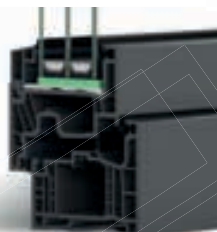

More light, more space

ARTEVO allows for windows up to 2.8 metres high with narrow profiles and a larger glazing area for more daylight and an elegant transition between the interior and the exterior.

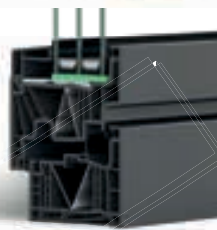

Energy efficiency

The combination of triple glazing and the REHAU LowE technology provides superior thermal insulation and maximum energy savings. Thermal insulation with Uf values of up to 0.82 W/m²K meets the requirements of passive houses.

ARTEVO

ARTEVO is available with a flush-fitting or offset sash.

ARTEVO MAX

A premium variant with the REHAU LowE technology - meeting passive house standards (Uf of up to 0.82 W/m²K).

TECHNICAL INFORMATION

Frame depth	80 mm
Number of chambers with the Z sash	7
Number of chambers with a flush-fitting sash	8
Glazing width with the Z sash	55 mm
Glazing width with a flush-fitting sash	71 mm

THERMAL INSULATION

with triple glazing of 0.5	Uw of up to 0.73
with triple glazing of 0.5 and LowE	Uw of up to 0.68

COLOUR VERSION

Decors	58 foils including mattex
RAL colours	yes
Coloured carrier	<input type="checkbox"/> <input type="checkbox"/> <input type="checkbox"/>

SUSTAINABLE MANUFACTURE

Recycled materials are used in the manufacture of the ARTEVO line. The annual savings are equivalent to seven times the weight of the Eiffel Tower.
