

# Kido

**Before Kido**

**After Kido**

## Why we built this

Kido was built after a heartbreaking tragedy in our community, when a child was forgotten in a hot car on the way to playgroup. We created it to help playgroups and parents stay connected, and to make sure every child's arrival is accounted for.

# Make Daycare Safer for Everyone.

Kido bridges the gap between daycare and parent, keeping everyone on the same page. Each child is checked in with a quick tap, and if a child hasn't arrived by the expected time, parents are notified right away.

## Step 1

Each child has a small keychain on their briefcase.

## Step 2

When the child comes in, the teacher taps it.

## Step 3

If a child wasn't tapped in, the parent is told.

# Give Parents the Peace of Mind They Expect

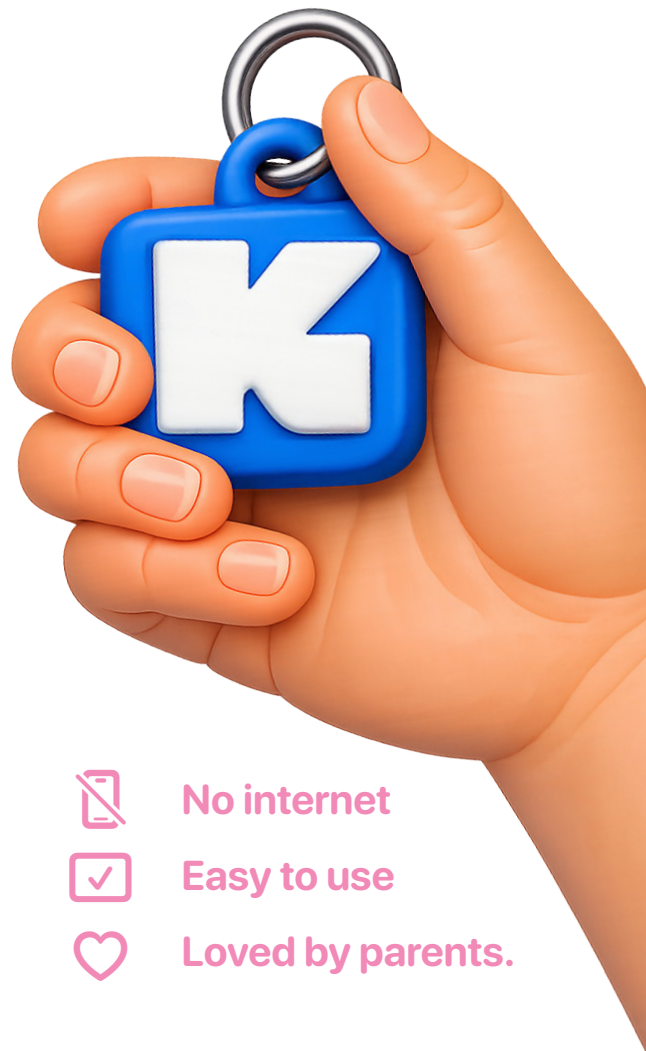

Mothers want peace of mind, and Kido gives your center a clear edge by offering the extra layer of safety parents are looking for.

## Affordable Peace of Mind

**\$429** one-time per device (includes connectivity)

**\$3/month** per active child.

Running a large center? Unlock special pricing

No internet

Easy to use

Loved by parents.
