I. Introducción

La población en las jurisdicciones lleva consigo en mayor o menor grado un cambio constante según transcurre el tiempo tanto en su composición de rasgos así como en tamaño. Más allá de los estudios de nivel total de una jurisdicción y entre otros posibles acercamientos, las delimitaciones geográficas dentro de la jurisdicción presenta un interesante sendero de estudio cuando se quiere conocer un área en particular. De hecho, entre las principales razones por las cuales se lleva a cabo la enumeración de población oficial o censo se encuentran; conocer la cantidad habitantes para designar sus representantes por áreas geográficas definidas así como levantar información básica de la población la cual es necesaria para fines gubernamentales y aspectos de planificación social y económica. Estas áreas geográficas son delimitadas y actualizadas cada vez que se realiza censo decenal en Puerto Rico de acuerdo los cambios poblacionales que ocurren en la jurisdicción y se le nombran como distritos electorales.

La delimitación de los distritos electorales busca entre sus propósitos principales que exista la mayor igualdad posible en cantidad de población entre los distritos. No obstante, no existe una homogeneidad de características poblacionales dentro de esa semejanza en tamaño poblacional que tienen los distritos electorales. Es decir, existen distintos perfiles de las personas que residen en los distritos definidos el cual hace interesante poder conocer las particularidades de cada distrito.

En vías de proveer la información fundamental de la población por regiones geográficas de interés tales como distritos electorales en Puerto Rico, el Instituto de Estadísticas preparó el Perfil Demográfico por Distritos Electorales. El Perfil provee una fotografía amplia de cada distrito electoral con información esencial para conocer las particularidades de la población que reside en cada uno de ellos. Incluso, la información provista en el Perfil ofrece un punto de partida a personas interesadas en estudios de los distritos electorales que bien pueden estimular a estudios profundos de los distritos.

II. Metodología

La principal fuente de datos de este Perfil proviene del *U.S. Census Bureau*, la cual opera bajo el Título 13 del Código de Derecho de los Estados Unidos¹. La función principal de esta agencia es llevar a cabo el censo decenal de población y vivienda. Además del censo decenal, el *U.S. Census Bureau* también realiza anualmente la Encuesta sobre la Comunidad en los Estados Unidos (*American Community Survey, ACS*) y su contraparte en Puerto Rico (*Puerto Rico Community Survey, PRCS*). Estas encuestas utilizan una muestra aleatoriamente seleccionada de hogares en los Estados Unidos y Puerto Rico.

La Encuesta sobre la Comunidad recopila información sobre diversos temas, incluyendo características demográficas, sociales, económicas y de la vivienda, lo cual permite preparar estimados para distintos periodos desde el año 2005 en adelante. Los distintos periodos para los cuales se producen estimados de La Encuesta sobre la Comunidad son los siguientes según el periodo en el cual se recopiló la información; estimados de un año, estimados de tres años² y estimados En específico, este perfil utiliza los estimados que comprende un periodo de 5 años de la información recopilada por La Encuesta sobre la Comunidad y cubre el periodo del año 2014 al año 2018.

El nivel geográfico de los distritos electorales corresponde a la redistribución electoral realizada luego del censo decenal 2010. Esta comprende 8 distritos senatoriales y 40 distritos representativos los cuales se presentan en los Tomos I y II respectivamente. La próxima redistribución electoral ocurrirá luego del próximo censo decenal en el año 2020. El nivel de pobreza utilizado para los datos de la Encuesta sobre la Comunidad es de acuerdo a los estándares de la Oficina de Manejo y Presupuesto de los Estados Unidos³.

¹ El Título 13 protege la confidencialidad de los encuestados asegurando que la información recopilada solo se utilizará para propósitos estadísticos.

² Los estimados de tres años de La Encuesta sobre la Comunidad fueron descontinuados siendo el último año disponible el 2013. Los periodos de tres años disponibles son: 2005-07, 2006-08, 2007-09, 2008-10, 2009-11, 2010-12 y 2011-13.

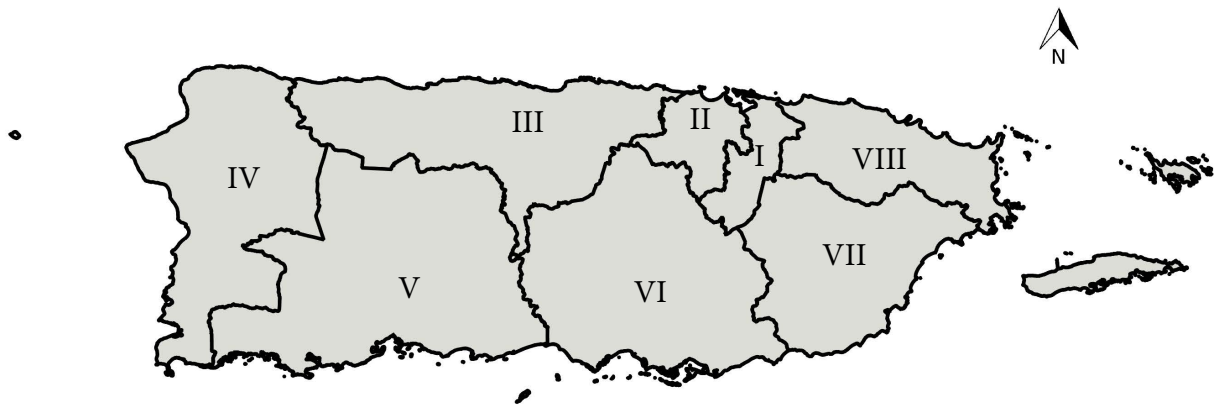

³ El nivel de pobreza utilizado en la Encuesta sobre la Comunidad es a base de los umbrales de ingreso por variantes de tamaño y composición familiar. Ejemplo para el año 2018, unidad familiar de tres miembros donde uno de los miembros es menor de 18 años, de la familia generar ingreso anual menor \$20,231 se consideran que están en situación de pobreza. Umbrales están disponibles en: <https://www.census.gov/data/tables/time-series/demo/income-poverty/historical-poverty-thresholds.html>
