FOREWORD

This publication presents detailed information on the external trade of the Commonwealth of Puerto Rico for fiscal year 1957. Comparative data for previous years appear in earlier volumes and, in less detail, in the Statistical Yearbook. The current edition of the Statistical Yearbook, which will contain summary information up to fiscal year 1957, is still in preparation.

The data on the external trade of Puerto Rico are compiled by the Bureau of the Census of the United States Department of Commerce. The Planning Board is the recipient of monthly summary machine tabulations and the respective punched cards containing detailed statistics on foreign trade by commodities and by countries. The fiscal year data here presented are prepared from these cards. The work on foreign trade statistics is under the direct supervision of Mr. Angel R. Peraza Vega.

The tables in this publication are presented only in English because the commodity classification manuals are in that language only and it is impracticable to prepare the detailed commodity description in Spanish with the resources available for this work.

The reader may refer to publications of the United States Bureau of the Census for specific definitions and statements of what is included in these statistics. However, the following summary description of the data may be helpful:

1- SHIPMENTS OF MERCHANDISE FROM UNITED STATES TO PUERTO RICO

These statistics are based on shippers' export declarations filed at the time of export from the United States. The value is based on the selling price (or on cost if not sold) including inland freight, insurance and other charges to the place of shipment. It is f.a.s. (free alongside ship) in the port of embarkation; transportation and other costs beyond the port of shipment are excluded. Shipments by all methods of conveyance are included. However, parcel post shipments are included only if they are made from one business concern to another and valued over \$25. Only shipments from continental United States are included; shipments from Virgin Islands and Guam to Puerto Rico are included in data on shipments to United States from those areas, as published by the U.S. Department of Commerce, but are not shown separately. Data are not available on shipments to Puerto Rico from Alaska, Hawaii, Samoa and other U.S. territories.

Shipments of military and naval equipment and supplies for the use of the United States Armed Forces and shipments by U.S. Government agencies of office furniture, equipment and supplies for the use of such agencies are not included in the statistics.

Data on shipments from the United States are presented according to the commodity classifications provided in Schedule B, Classification for Domestic and Foreign Commodities exported from the United States, which contains about 2,900 commodity classifications. There is no commodity detail available on individual shipments valued at less than \$100. The total value of these shipments, estimated on a sample basis, is shown under Schedule B commodity classification 999910.

2- IMPORTS INTO PUERTO RICO FROM FOREIGN COUNTRIES

These import statistics are based on regular U.S. Custom entries of merchandise filed by importers through the Customs District of Puerto Rico. The series presented here is "imports for consumption", that is, it includes imports for direct consumption plus withdrawals from bonded warehouses. These statistics include government as well as nongovernment shipments of merchandise from foreign countries. However, American goods returned by the U.S. Armed Forces for their own use are excluded. The values are in general based on market or selling prices, f.o.b. the exporting country. United States import duties are excluded.

Data on imports from foreign countries are available at the Planning Board according to the seven digit commodity descriptions established in Schedule A, Statistical Classification of Commodities Imported into the United States, published by the U.S. Department of Commerce. However, the commodity data presented herein are classified only to the first four digits of the commodity code numbers as shown in the current issue of Schedule A. Reference to Schedule A will provide an exact definition of the merchandise included in categories not strictly defined in the table.

There is no commodity detail available for entries of shipments valued at \$250 or less. Estimates of the total value of such imports, based on a sample procedure, appear in the table as commodity number 9999.

5

The country of origin is defined as the country where the merchandise was grown, mined or manufactured. It may happen that the importer cannot readily give information as to the country of origin for a shipment in which case it is credited for statistical purposes to the country of shipment.

3- SHIPMENTS FROM PUERTO RICO TO THE UNITED STATES

These are based on shippers' exports declarations filed with the U.S. Customs in Puerto Rico. The principles governing the filing of these declarations and the coverage of these statistics are the same of those on shipments from the United States to Puerto Rico. Shipments from Puerto Rico to U. S. territories and possessions, except Alaska, Hawaii and the Virgin Islands are included. The shipments to the United States are tabulated according to the commodity classifications published by the U. S. Bureau of the Census in Schedule P. Schedule P is a special condensation of Schedule B, Statistical Classification for Domestic and Foreign commodities Exported from the United States.

4- EXPORTS FROM PUERTO RICO TO FOREIGN COUNTRIES

These are likewise based on shippers' export declarations filed by the exporters at the port of embarkation in Puerto Rico. The value of shipments is based on the selling price (or on the cost if not sold) including inland freight, insurance, and other charges to the place of export. Merchandise shipped through Puerto Rico in transit from one foreign country to another is not reported as exports, but imported merchandise which has cleared through Customs and which is reexported without processing is covered separately as exports of foreign merchandise and included in this table in the corresponding commodity classifications. Puerto Rican exports to foreign countries are classified by commodities according to schedule B, which is the schedule regularly used to classify United States exports. Shipment individually valued at less than \$100 are not included in this statistics. There is no commodity detailed available for shipments valued from \$100 to \$499 and estimated of the total valued of such exports based on a sample procedures, appears under commodity classification 999998 as part of group 9.

The country of destination is defined as the country of ultimate destination or where the merchandise is to be consumed, further processed or manufactured. In the event the exporter does not have definite information as to the country of ultimate destination for a shipment, it is credited for statistical purposes to the country to which it is consigned.

Monthly statistics are maintained in the Economic Indices Section, Division of Statistics, Bureau of Economic and Statistics of the Planning Board and will be furnished to any interested person on request. Monthly summaries are published in Spanish and English in the bulletin Current Business Statistics. Data on trade between Puerto Rico and the United States are also published by the U. S. Bureau of the Census in the monthly report number FT800, U. S. Trade in merchandise and Gold and Silver with U. S. Territories and Possessions (except Alaska and Hawaii).
