### PUERTO RICO MANUFACTURING PMI INCREASED TO 52.4 IN JANUARY

On a Non-Seasonally Adjusted (NSA) basis, the Purchasing Managers Index (PMI) for Puerto Rico's manufacturing sector increased to 52.4 in January. A reading above the threshold level suggests an expansion in the manufacturing sector with respect to the previous month. The Employment, Own Inventories and Suppliers Deliveries sub-indexes increased with respect to the previous month. On a positive note, the Employment, Suppliers Deliveries and Own Inventories sub-indexes were above the threshold level of 50. In a supplemental survey of manufacturing establishments, 4% of the respondents indicated that their operations ceased following the health measurements taken by the government due to the COVID-19 pandemic. Factors affected by the pandemic in the manufacturing sector were: a reduction in suppliers' deliveries (23%), a reduction in demand (38%), a reduction in staff (33%), a reduction in inventory (14%), and others (24%). The Puerto Rico Manufacturing-Purchasing Managers Index (PRM-PMI) has been at or above the threshold level in 73 of the 129 months since the survey was first undertaken. The PRM-PMI is currently available only on a Non- Seasonally Adjusted (NSA) basis which means that seasonal fluctuations can affect its performance.

**Table 1. Puerto Rico Manufacturing – Purchasing Managers' Index (NSA): January 2021**

	Better	Same	Worse	PMI		
Órdenes nuevas	19	57.1	23.8	47.6	Lower	New orders
Producción	23.8	42.9	33.3	45.2	Lower	Production
Empleo	19	66.7	14.3	52.4	Higher	Employment
Entregas de suplidores	14.3	85.7	0	57.1	Slower	Supplier deliveries
Inventarios de su empresa	33.3	52.4	14.3	59.5	Higher	Own inventories

**Puerto Rico Manufacturing – Purchasing Managers Index (NSA) 52.4 Expansion**

Note: Not Seasonally Adjusted (NSA)

## New Orders

In January, the New Orders PMI (NSA) decreased to 47.6, after being above the threshold for the previous month. A reading below 50 suggests that on a Non-Seasonally adjusted (NSA) basis, new orders at manufacturing establishments in January were lower than in December.

## Production

The Production PMI (NSA) decreased to 45.2 in January, after being at the threshold level last month. A reading below 50 indicates that on a Non-Seasonally Adjusted (NSA) basis, manufacturing production in January was lower than in December.

## Employment

In January, the Employment PMI (NSA) increased to 52.4, being at or above the threshold for two consecutive months. A reading above 50 suggests that on a Non-Seasonally Adjusted (NSA) basis, manufacturing employment in January was higher than in December.

## Own Inventories

In January, the Own Inventories PMI (NSA) increased to 59.5, being at or above the threshold for two consecutive months. A reading above 50 indicates that on a Non-Seasonally Adjusted (NSA) basis, inventories in manufacturing establishments in January were higher than in December.

## Supplier Deliveries

The Supplier Deliveries PMI (NSA) increased to 57.1 in January, being above the threshold for the sixth consecutive month. A reading above the threshold of 50 indicates that on a Non-Seasonally Adjusted (NSA) basis, the speed of supplier deliveries in January was slower than in December.

### Methodological note

The Puerto Rico Manufacturing-Purchasing Managers Index (PRM-PMI) is the result of a collaborative project between the Puerto Rico Manufacturers Association and the Puerto Rico Institute of Statistics. The PRM-PMI measures short-run business conditions in Puerto Rico's manufacturing sector and provides a broad-based metric for the productive side of Puerto Rico's economy. It is currently in a testing phase to ensure a reliable methodology. The methodology is similar to PMI surveys conducted elsewhere. The survey questionnaire is available at <https://estadisticas.pr/encuestas/puerto-rico-manufacturing>. The participants include manufacturing establishments with 50 or more employees with membership in the Puerto Rico Manufacturers Association. Currently, results are presented on a Non-Seasonally Adjusted (NSA) basis. In the future, with sufficient data points, a seasonally adjusted version of the PRM-PMI will be prepared, which will smooth away the influence of any seasonal fluctuations.

The PRM-PMI is calculated as the simple average of 5 sub-indexes, representing different business conditions in manufacturing establishments: New Orders PMI, Production PMI, Employment PMI, Supplier Deliveries PMI, Own Inventories PMI. The sub-indexes are computed using a diffusion index methodology. Specifically, for any given month with respect to the previous month, participants are asked to answer whether the business condition of the establishment: (1) improved, (2) remained the same, or (3) deteriorated. Diffusion indexes are calculated as the percentage of responses that indicate the business condition improved plus half of the percentage of responses that indicate the business condition remained the same. Responses that indicate the business condition deteriorated are not taken into account in calculating diffusion indexes. The survey also includes questions on other business conditions. The diffusion indexes that correspond to these questions are currently under evaluation.

This report was prepared by the staff of the Puerto Rico Institute of Statistics and has not been evaluated by the Board of Directors of the Puerto Rico Institute of Statistics. The information contained in this report need not reflect the official opinion of the Board of Directors of the Puerto Rico Institute of Statistics. ## To obtain a copy of this report

(1) Visit <https://estadisticas.pr/encuestas/puerto-rico-manufacturing>, (2) write your request at <https://preguntas.estadisticas.pr/>, (3) call (787) 819-0730, (4) mail your request to the Puerto Rico Institute of Statistics, P.O. Box 195484, San Juan, PR 00919, or (5) visit the offices of the Puerto Rico Institute of Statistics at 57 Quisqueya St., Suite 2000, San Juan, PR 00917, between the hours of 8:00 a.m. and 5:30 p.m. The report is available on paper and in the following electronic formats: pdf and Microsoft Excel. The report is free.

## Publication calendar

The monthly PRM-PMI report is published at 10:00 a.m. on the first business day of the month. In specific, the table below shows the expected publication dates of the PRM-PMI report during calendar year 2020:

Reference month	Publication date
Nov-20	January 4, 2021
Dec-20	February 4, 2021
Jan-21	March 1, 2021
Feb-21	April 5, 2021
Mar-21	May 3, 2021
Apr-21	June 1, 2021

Reference month	Publication date
May-21	July 1, 2021
Jun-21	August 2, 2021
Jul-21	September 1, 2021
Aug-21	October 4, 2021
Sep-21	November 1, 2021
Oct-21	December 6, 2021
