PUERTO RICO MANUFACTURING PMI REMAINS STEADY AT 49.6 IN MAY

On a Non-Seasonally Adjusted (NSA) basis, the Purchasing Managers Index (PMI) for Puerto Rico's manufacturing sector remained unchanged at 49.6 in April, remaining below the threshold level for the second consecutive month. A reading below the threshold level suggests a contraction in the manufacturing sector with respect to the previous month. The Production sub-index rose to 57.7 in May, remaining at or above the threshold level for the fifth consecutive month. In May, the New Orders sub-index inched down to 48.1, falling below the threshold level after four consecutive months above it. Puerto Rico Manufacturing-Purchasing Managers Index (PRM-PMI) has been at or above the threshold level in 66 of the 109 months since the survey was first undertaken. The PRM-PMI is currently available only on a Non-Seasonally Adjusted (NSA) basis which means that seasonal fluctuations can affect its performance.

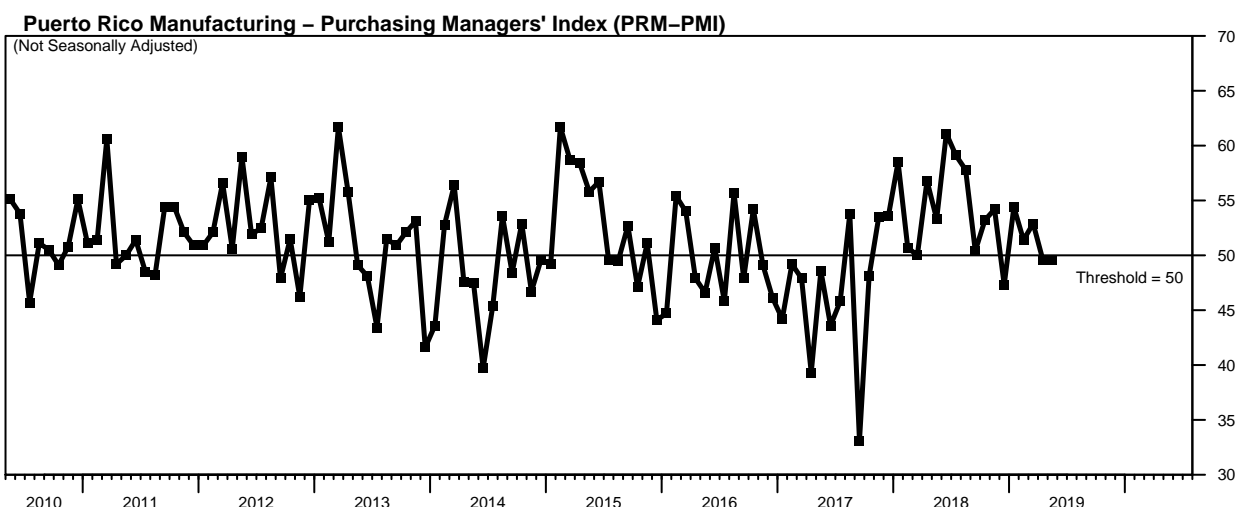

Table 1. Puerto Rico Manufacturing – Purchasing Managers' Index (NSA): May 2019

	Better	Same	Worse	PMI		
Órdenes nuevas	23.1	50	26.9	48.1	Lower	New orders
Producción	26.9	61.5	11.5	57.7	Higher	Production
Empleo	7.7	73.1	19.2	44.2	Lower	Employment
Entregas de suplidores	7.7	88.5	3.8	51.9	Slower	Supplier deliveries
Inventarios de su empresa	15.4	61.5	23.1	46.2	Lower	Own inventories

Puerto Rico Manufacturing – Purchasing Managers Index (NSA) 49.6 Contraction

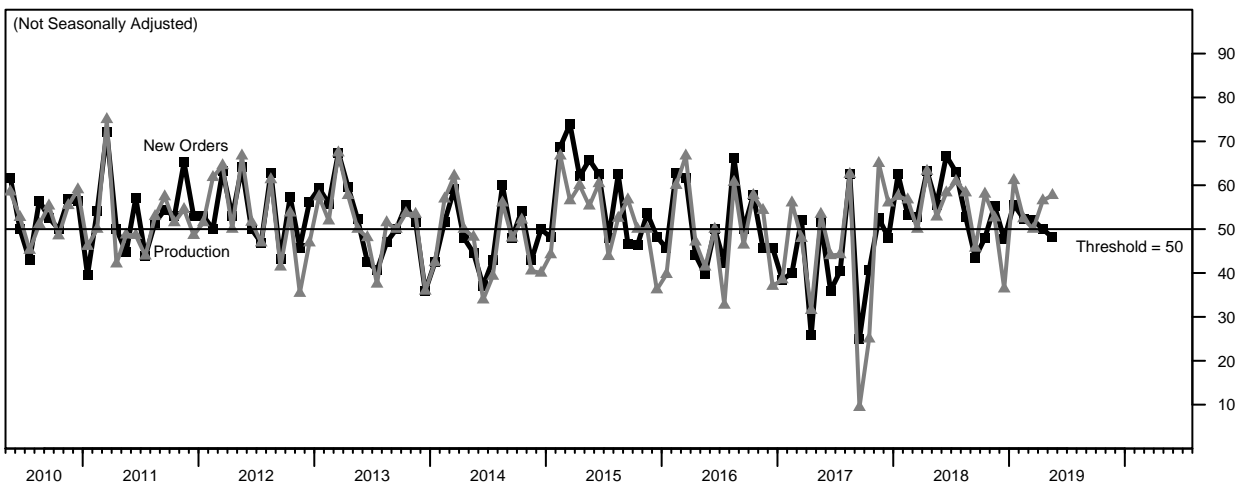

Note: Not Seasonally Adjusted (NSA)

New Orders

In May, the New Orders PMI (NSA) inched down to 48.1, falling below the threshold level after four consecutive months above it. A reading below 50 indicates that on a Non-Seasonally adjusted (NSA) basis, new orders at manufacturing establishments in May were lower than in April.

Production

The Production PMI (NSA) rose to 57.7 in May, remaining at or above the threshold level for the fifth consecutive month. A reading above 50 indicates that on a Non-Seasonally Adjusted (NSA) basis, manufacturing production in May was higher than in April.

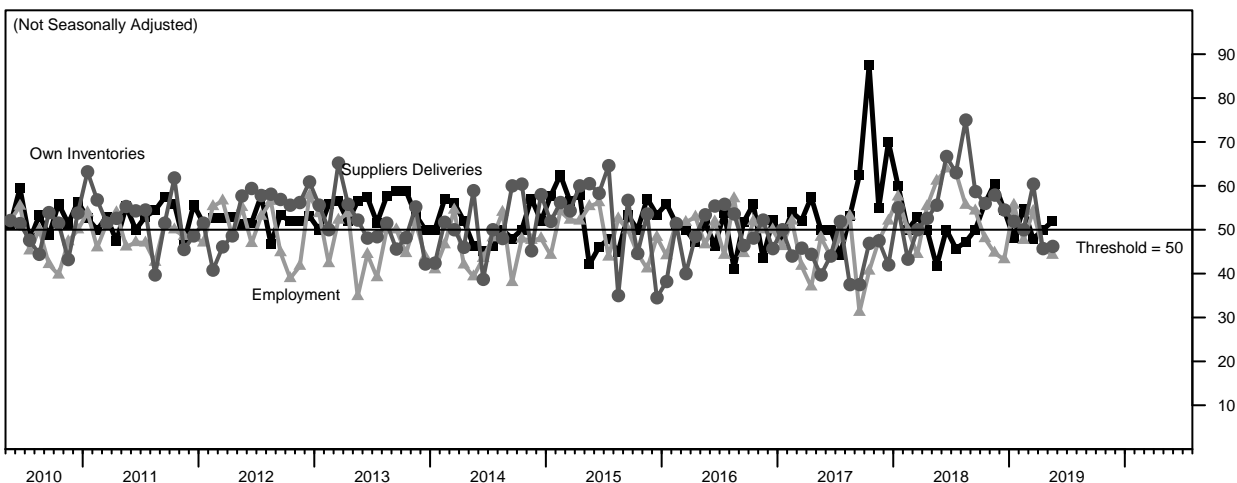

Employment

In May, the Employment PMI (NSA) edged down to 44.2, remaining below the threshold level for the second consecutive month. A reading below 50 indicates that on a Non-Seasonally Adjusted (NSA) basis, manufacturing employment in May was lower than in April.

Supplier Deliveries

The Supplier Deliveries PMI (NSA) increased to 51.9 in May, remaining at or above the threshold level for the second consecutive month. A reading above 50 indicates that on a Non-Seasonally Adjusted (NSA) basis, the speed of supply deliveries in May was slower than in April, suggesting a higher demand for intermediate goods.

Own Inventories

In May, the Own Inventories PMI (NSA) ticked up to 46.2, but remained below the threshold level for the second consecutive month. A reading below 50 indicates that on a Non-Seasonally Adjusted (NSA) basis, inventories in manufacturing establishments in May were lower than in April.

Methodological note

The Puerto Rico Manufacturing-Purchasing Managers Index (PRM-PMI) is the result of a collaborative project between the Puerto Rico Manufacturers Association and the Puerto Rico Institute of Statistics. The PRM-PMI measures short-run business conditions in Puerto Rico's manufacturing sector, and provides a broad-based metric for the productive side of Puerto Rico's economy. It is currently in a testing phase to ensure a reliable methodology. The methodology is similar to PMI surveys conducted elsewhere. The survey questionnaire is available at <https://estadisticas.pr/encuestas/puerto-rico-manufacturing>. The participants include manufacturing establishments with 50 or more employees with membership in the Puerto Rico Manufacturers Association. Currently, results are presented on a Non-Seasonally Adjusted (NSA) basis. In the future, with sufficient data points, a seasonally adjusted version of the PRM-PMI will be prepared, which will smooth away the influence of any seasonal fluctuations.

The PRM-PMI is calculated as the simple average of 5 sub-indexes, representing different business conditions in manufacturing establishments: New Orders PMI, Production PMI, Employment PMI, Supplier Deliveries PMI, Own Inventories PMI. The sub-indexes are computed using a diffusion index methodology. In specific, for any given month with respect to the previous month, participants are asked to answer whether the business condition of the establishment: (1) improved, (2) remained the same, or (3) deteriorated. Diffusion indexes are calculated as the percentage of responses that indicate the business condition improved plus half of the percentage of responses that indicate the business condition remained the same. Responses that indicate the business condition deteriorated are not taken into account in calculating diffusion indexes. The survey also includes questions on other business conditions. The diffusion indexes that correspond to these questions are currently under evaluation.

Publication calendar

The monthly PRM-PMI report is published at 10:00 a.m. on the first business day of the month. In specific, the table below shows the expected publication dates of the PRM-PMI report during calendar year 2019:

Reference month	Publication date
Nov-18	January 4, 2019
Dec-18	February 1, 2019
Jan-19	March 1, 2019
Feb-19	April 1, 2019
Mar-19	May 1, 2019
Apr-19	June 3, 2019

Reference month	Publication date
May-19	July 1, 2019
Jun-19	August 1, 2019
Jul-19	September 3, 2019
Aug-19	October 1, 2019
Sep-19	November 1, 2019
Oct-19	December 2, 2019
