PUERTO RICO MANUFACTURING PMI ROSE TO 61.1 IN JUNE

On a Non-Seasonally Adjusted (NSA) basis, the Purchasing Managers Index (PMI) for Puerto Rico's manufacturing sector increased to 61.1 in June, remaining at or above the threshold of 50 for the eighth consecutive month. A reading above the threshold level suggests an expansion in the manufacturing sector with respect to the previous month. All the sub-indexes were at or above the threshold level in June. All the sub-indexes increased in June with respect to the previous month. The Puerto Rico Manufacturing-Purchasing Managers Index (PRM-PMI) has been at or above the threshold level in 58 of the 98 months since the survey was first undertaken. The PRM-PMI is currently available only on a Non-Seasonally Adjusted (NSA) basis which means that seasonal fluctuations can affect its performance.

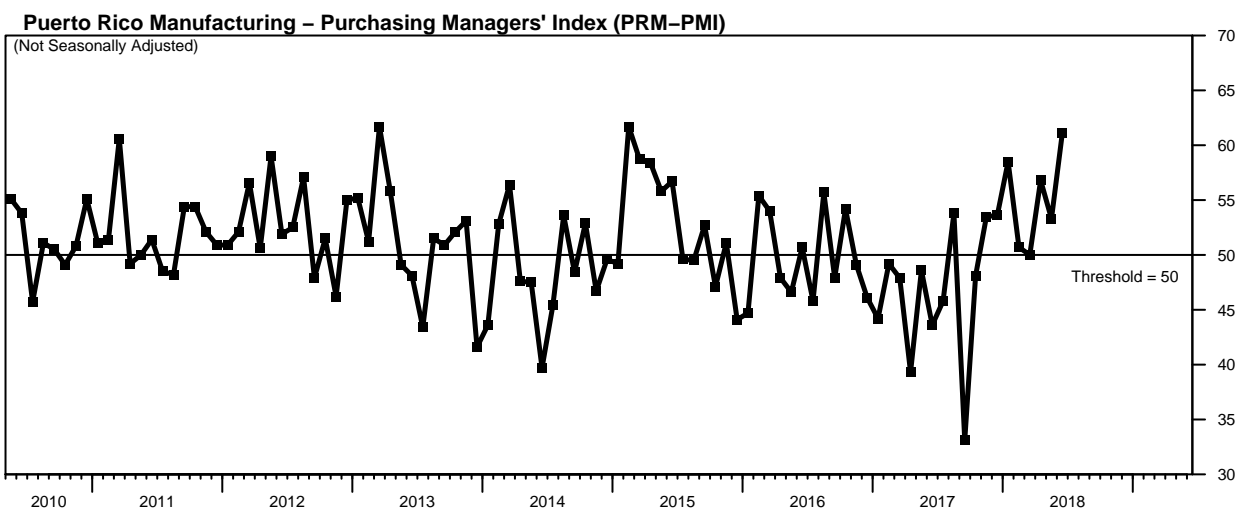

Table 1. Puerto Rico Manufacturing – Purchasing Managers' Index (NSA): June 2018

	Better	Same	Worse	PMI		
Órdenes nuevas	38.9	55.6	5.6	66.7	Higher	New orders
Producción	27.8	61.1	11.1	58.3	Higher	Production
Empleo	27.8	72.2	0	63.9	Higher	Employment
Entregas de suplidores	0	100	0	50	Same	Supplier deliveries
Inventarios de su empresa	44.4	44.4	11.1	66.7	Higher	Own inventories
Puerto Rico Manufacturing – Purchasing Managers Index (NSA)				61.1	Expansion	

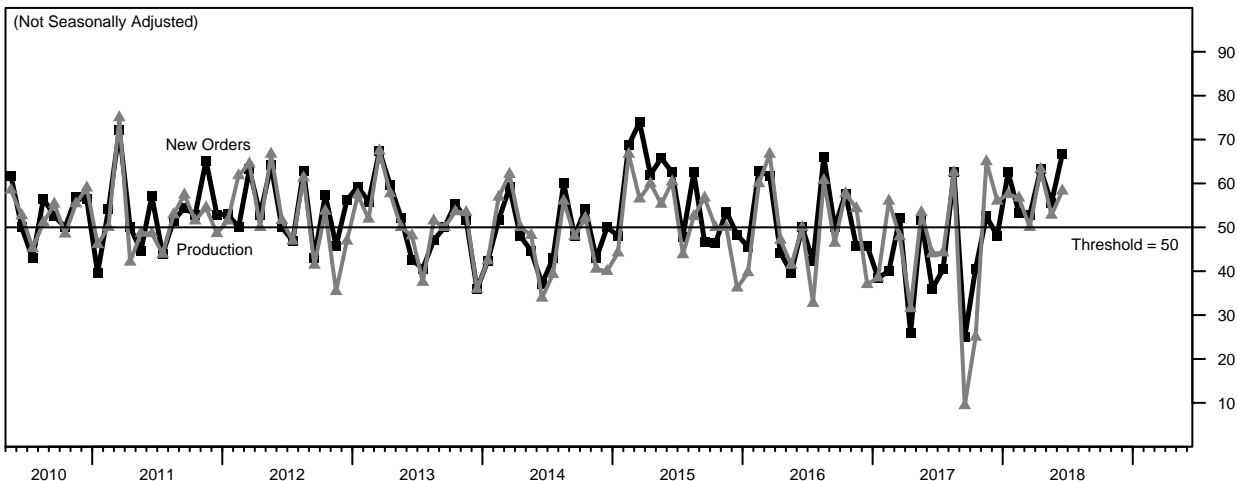

Note: Not Seasonally Adjusted (NSA)

New Orders

In June, the New Orders PMI (NSA) took off to 66.7, remaining over the threshold level for the sixth consecutive month. A reading above 50 indicates that on a Non-Seasonally adjusted (NSA) basis, new orders at manufacturing establishments in June were higher than in May.

Production

The Production PMI (NSA) rose to 58.3 in June, remaining at or above the threshold level for the eighth consecutive month. A reading above 50 indicates that on a Non-Seasonally Adjusted (NSA) basis, manufacturing production in June was higher than in May.

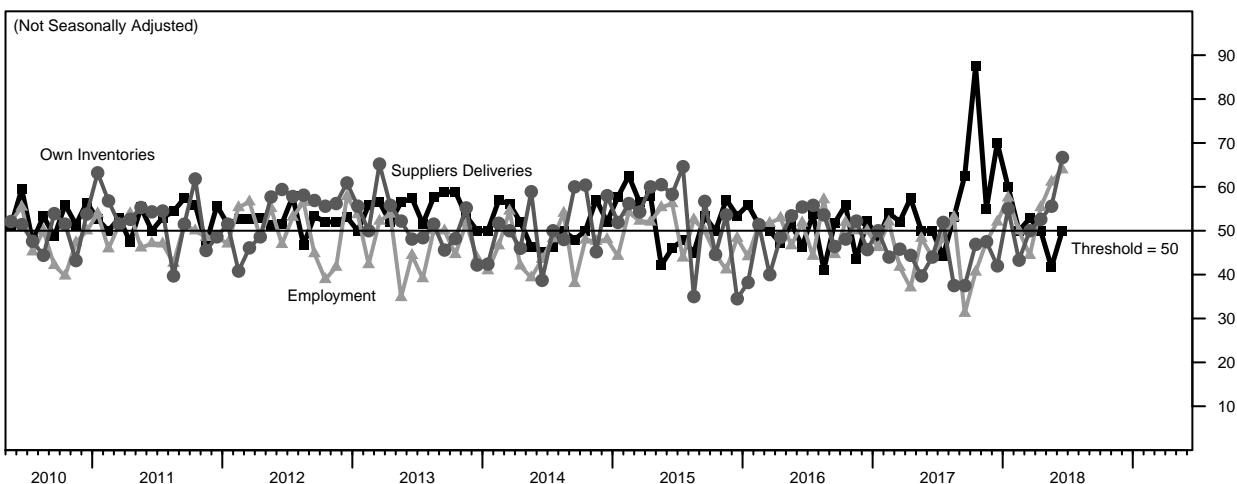

Employment

In June, the Employment PMI (NSA) edged up to 63.9, remaining over the threshold level for the third consecutive month. A reading above 50 indicates that on a Non-Seasonally Adjusted (NSA) basis, manufacturing employment in June was higher than in May.

Supplier Deliveries

The Supplier Deliveries PMI (NSA) leapt to the threshold level of 50.0 in June. A reading of 50 indicates that on a Non-Seasonally Adjusted (NSA) basis, the speed of supply deliveries in June was the same as in May.

Own Inventories

In June, the Own Inventories PMI (NSA) climbed to 66.7, remaining at or above the threshold level for the fourth consecutive month. A reading above 50 indicates that on a Non-Seasonally Adjusted (NSA) basis, inventories in manufacturing establishments in June were higher than in May.

Methodological note

The Puerto Rico Manufacturing-Purchasing Managers Index (PRM-PMI) is the result of a collaborative project between the Puerto Rico Manufacturers Association and the Puerto Rico Institute of Statistics. The PRM-PMI measures short-run business conditions in Puerto Rico's manufacturing sector, and provides a broad-based metric for the productive side of Puerto Rico's economy. It is currently in a testing phase to ensure a reliable methodology. The methodology is similar to PMI surveys conducted elsewhere. The survey questionnaire is available at <https://estadisticas.pr/encuestas/puerto-rico-manufacturing>. The participants include manufacturing establishments with 50 or more employees with membership in the Puerto Rico Manufacturers Association. Currently, results are presented on a Non-Seasonally Adjusted (NSA) basis. In the future, with sufficient data points, a seasonally adjusted version of the PRM-PMI will be prepared, which will smooth away the influence of seasonal fluctuations.

The PRM-PMI is calculated as the simple average of 5 sub-indexes, representing different business conditions in manufacturing establishments: New Orders PMI, Production PMI, Employment PMI, Supplier Deliveries PMI, Own Inventories PMI. The sub-indexes are computed using a diffusion index methodology. In specific, for any given month with respect to the previous month, participants are asked to answer whether the business condition of the establishment: (1) improved, (2) remained the same, or (3) deteriorated. Diffusion indexes are calculated as the percentage of responses that indicate the business condition improved plus half of the percentage of responses that indicate the business condition remained the same. The survey also includes questions on other business conditions. The diffusion indexes that correspond to these questions are currently under evaluation.

This report was prepared by the staff of the Puerto Rico Institute of Statistics and has not been evaluated by the Board of Directors of the Puerto Rico Institute of Statistics. The information contained in this report need not reflect the official opinion of the Board of Directors of the Puerto Rico Institute of Statistics. The report is free.

Publication calendar

The monthly PRM-PMI report is published at 10:00 a.m. on the first business day of the month. In specific, the table below shows the expected publication dates of the PRM-PMI report during calendar year 2018:

Reference month	Publication date
Nov-17	January 2, 2018
Dec-17	February 1, 2018
Jan-18	March 1, 2018
Feb-18	April 2, 2018
Mar-18	May 1, 2018
Apr-18	June 1, 2018

Reference month	Publication date
May-18	July 2, 2018
Jun-18	August 1, 2018
Jul-18	September 4, 2018
Aug-18	October 1, 2018
Sep-18	November 1, 2018
Oct-18	December 3, 2018
