IATF 16949 – Training & Auditor Certification

Automotive QMS training with emphasis on core tools, process performance, and customer-specific readiness.

Audience

Automotive suppliers (Tier 1–3): Quality, Manufacturing, Engineering, Supplier Quality, Program/Launch teams.

Typical Duration

Awareness: 1 day | Internal Auditor: 2 days | Lead Auditor: 4–5 days (depending on core tools depth and scope).

Learning Objectives

- Understand IATF 16949 requirements and audit expectations.
- Audit process performance, defects, controls, and customer-specific requirements.
- Use core tools as audit inputs (APQP, PPAP, FMEA, MSA, SPC).
- Write strong NCRs and verify corrective action effectiveness.
- Lead audits and manage audit programs using ISO 19011.

Course Agenda (High-Level)

- IATF structure and key requirements beyond ISO 9001
- Customer-specific requirements (CSR) and evidence collection
- Core tools overview and how to audit them (APQP/PPAP/FMEA/MSA/SPC)
- Control plans, process capability, and monitoring (SPC/KPIs)
- Supplier development and incoming controls
- Audit planning, execution, reporting, and follow-up

What You Receive

- Course slides and participant workbook (PDF)
- IATF audit checklists and CSR review worksheet
- Exam (for certification) and certificate of completion
- Templates: audit plan/report, NCR guide, corrective action verification

Delivery Options

Live virtual | On-site | Hybrid. Optional deep-dive modules: Core Tools (APQP/PPAP/FMEA/MSA/SPC) workshops.
