Webinar: CMIS vs. ArchiveLink – Which Archiving Interface Matters in 2026?

Neu-Isenburg, February 4, 2026 – The next kgs webinar, taking place on Thursday, February 12 at 11:00 a.m., will explore which SAP interface standard is likely to prevail in the future.

The fact is that the classic ArchiveLink architecture is increasingly reaching its limits in the context of S/4HANA, RISE, the SAP Public Cloud, and growing requirements for performance, compliance, and integration. Increasingly often, the discussion turns to the fundamental question of to what extent CMIS, as an open interface standard, is gaining importance – and how ArchiveLink and CMIS scenarios can be sensibly positioned, with architecturally clean transitions between them.

In the webinar "CMIS vs. ArchiveLink – Which Interface Is Truly Future-Proof in 2026," Benny Schröder, CTO, and Katharina Gerber, Senior Marketing Communications Manager at KGS Software GmbH, will explain when ArchiveLink still makes sense, where CMIS offers clear advantages, and which architectural decisions will make SAP landscapes future-ready. The session will also cover SAP's current CMIS strategy as well as the new kgs feature "Item," which simplifies CMIS usage and enables new scenarios. The webinar is aimed at SAP owners, IT architects, IT managers, and anyone who needs to decide which archiving interface to rely on going forward.

KGS Software GmbH

KGS Software GmbH has been a leader in SAP archiving for over 25 years, offering the highest level of expertise. Leading companies worldwide – such as Lufthansa Group, Procter & Gamble, BMW, and Kärcher – rely on kgs solutions. Data, documents and attachments from SAP, as well as attachments from other leading applications like Microsoft SharePoint, are migrated and archived using cloud-native, high-performance software.

Under the brand "tia®" – the intelligent archive – kgs unites all product modules under a common vision of the intelligent document archive. tia® stands for autonomous archiving, is compatible with any applications, storage solutions, and cloud technologies, and provides companies with a Single Point of Truth (SPoT) for document access. tia® supports the SAP certified interfaces ArchiveLink®, ILM, and CMIS. With the world's first SAP-certified CMIS interface, kgs' technological leadership in document management was once again confirmed in 2022.

kgs is headquartered in Neu-Isenburg near Frankfurt am Main, with a branch in Atlanta, Georgia. www.kgs-software.com
