

Accessibility Statement

Space to Breathe Therapy wants the Support Hub to be accessible, understandable and welcoming.

Our Approach

We aim to use clear structure, readable language, consistent navigation and content that works across common devices. Where practical, we will provide captions, transcripts, meaningful link text, alternative text and documents that can be enlarged or read with assistive technology.

Different Access Needs

We recognise that disability, neurodivergence, sensory needs, literacy, fatigue, concentration and communication differences can affect access. Members can ask for information in another format or for a reasonable adjustment.

Known Limitations

The Hub is growing and some older, contributed or third-party content may not yet meet every accessibility standard. External websites are outside our control. We will prioritise barriers that prevent access to essential information or paid content.

Reporting A Barrier

Tell us the page or resource, the problem, the device or assistive technology used if relevant, and the format or adjustment that may help. You do not need to disclose a diagnosis. Use the contact details at spacetobreathetherapy.co.uk.

What We Will Do

We will acknowledge the request, consider a practical adjustment and explain the available options. If we cannot provide the exact adjustment requested, we will try to offer a reasonable alternative.

Ongoing Improvement

Accessibility is reviewed as content and technology change. Feedback from members is welcomed and will be used to guide improvements.
