foureyes

Get your Claude account ready for the builder workshops

Claude is the LLM we will build with in the workshops, so it's what we recommend for the trial (you may use another, like ChatGPT, with the Foureyes MCP). **It's a separate subscription from your Foureyes trial**, paid to Anthropic, the company that makes Claude. Pick a plan, sign up and connect Foureyes, and you're ready.

Which plan fits you?

IF IT'S JUST YOU

Claude Pro

$20 a month

Or $200 for the year (about $17 a month)

Plenty of credits to build reports, call sheets and dashboards in the workshops, with the Foureyes connector and everything else you'll use.

Sign up for Pro (claude.ai)

IF YOU'RE SETTING UP 2 OR MORE PEOPLE

Claude Team, standard seats

$25 per person a month

Or $20 per person a month, billed yearly. Works for 2 to 150 people.

One bill, one admin, and you add Foureyes once for the whole team. Your team's chats aren't used to train Claude.

Sign up for Team (claude.ai/upgrade)

Skip the Free plan for the Foureyes workshops. It's free, and fine for a test drive, but you'll hit the credit limit fast while building. The Max plan ($100 a month) gives you 5 times Pro's usage, so upgrade only if you keep running out.

Get set up in 3 steps

1 Sign up on a computer.

Click your plan's button above, sign up with your work email and add a credit card.

Use a web browser, not the phone app. Phone-app plans get billed through Apple or Google.

2 Keep your chats private.

On Pro, open Settings, then Privacy, and turn off the setting that lets Anthropic use your chats to improve Claude.

On Team, this is already off.

3 Connect Foureyes.

Follow our guide: **How to connect to the Foureyes MCP**

On Team, the account owner adds Foureyes first. Then everyone else clicks Connect.

Make your usage last through the workshop

Every plan has a usage limit that resets every 5 hours, plus a weekly limit. Building tools uses more than asking a quick question, and long chats and big files use it faster.

- **Start a new chat for each new build.** Shorter chats stretch your usage further.
- **Check where you stand** in Settings, then Usage, before the workshop starts.
- **Turn on usage credits as a backup.** In that same Usage screen, this lets you keep building if you hit your limit. You only pay for the extra you use, at Anthropic's standard rates.

Prices as of October 30, 2026, in US dollars before tax. Plans can change, so check claude.com/pricing for the latest.
