

Q: What sizes are the SolarGuard™ windshield covers?

A: SolarGuard™ comes in two sizes: Standard and XL to accommodate most vehicle windshields.

- Standard measures 59" W x 41" L
- XL measures 68" W x 41" L

The width is measured across the bottom seam of the wiper cover.

Both sizes have been modified for 2021 to provide a better fit on vehicles.

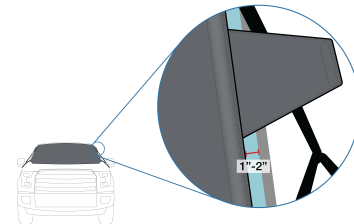

Q: What size should I buy for my vehicle?

A: We recommend reviewing the SolarGuard™ sizing charts to find the best size for your vehicle

type. Standard is recommended for Compact Cars, Sedans, Small Crossovers and Small SI

- X-Large is recommended for Minivans, Medium and Large SUVs, and Large Pickup Tr

Buying too large a size can result in a loose fit. This may impair the product's effectiveness.

Q: How does it fit vehicles of different sizes?

A: SolarGuard's™ Fit-Fast® attachment system is a 3-loop elastic system that allows for an adjustable fit. The Fit-Fast system secures the windshield cover to the side-view mirrors on either side of the vehicle. Our patent pending design will accommodate mirror sizes of both older and newer vehicles, big and small.

Q: How do I install my SolarGuard™ windshield cover?

A: We recommend these simple steps:

- Place it on your windshield and open the passenger door and insert the security panel.
- Choose the elastic loop that will best fit over your vehicle's mirrors and loop it over your passenger's side-view mirror.
- Unroll it as you walk around the front of your vehicle to the driver's door.
- Lightly tug on the cover to ensure it is centered and flat against your windshield.
- Open the driver's side door and slide the security panel into your car.
- Slide the elastic loop over opposite side-view mirror.
- Ensure the wiper cover is laying over your covers for added protection.

Note: A 1-2" of exposed windshield on each side is normal.

FAQs

Q: Can the SolarGuard™ be used on the back windshield of my vehicle?

A: The product is designed for use on the front windshield only.

Q: How do I protect from wind getting underneath my SolarGuard™?

A: Always choose the loop pairings that provide the most secure fit against the front of your windshield. The fit should be taught and flat. This will prevent sudden gusts of wind from getting underneath your SolarGuard™ windshield cover.

Q: What is the best way to clean my SolarGuard™?

A: Spot-clean with soap and cold water.

Q: Can the SolarGuard™ be used to block frost, snow and ice in cold weather?

A: The SolarGuard™ is designed for warm weather use only. It will not protect your windshield from ice, snow, or frost.
