

Powered by Adversarial Intelligence. Built for Secure, Trusted Enterprise AI

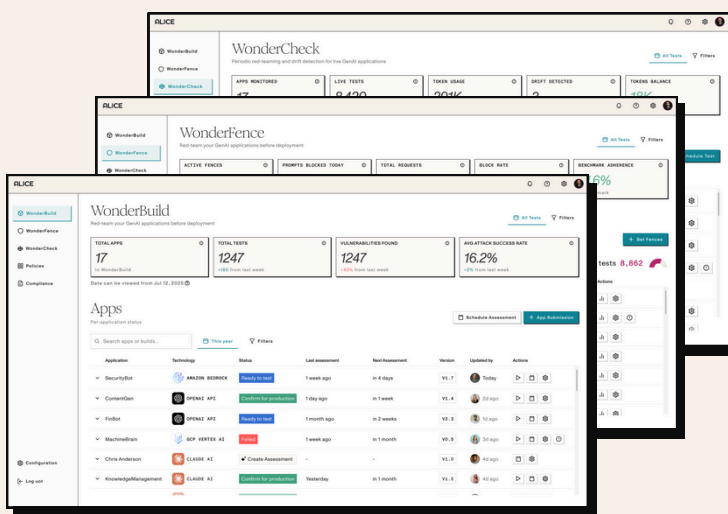

To deploy, scale, and operate GenAI and Agentic technologies safely and responsibly, organizations need assurance that system behavior remains reliable as it evolves. Scripted validation, platform-native guardrails, and manual testing often fail to capture how new prompts, model updates, fine-tuning, shifting user behavior, and emerging threats can introduce subtle vulnerabilities or revive previously mitigated issues.

Without a structured, lifecycle-wide approach to testing, monitoring, and governance, teams struggle to maintain safety, security, reliability, and compliance, limiting their ability to innovate with confidence.

Lifecycle-wide testing, protection, and governance: giving enterprises clarity and assurance as AI evolves at scale

WonderSuite is Alice's unified platform for evaluating, governing, and protecting GenAI and Agentic systems across their entire lifecycle. It combines comprehensive pre-launch stress testing, context-aware real-time protection, and ongoing production evaluation to help teams understand system behavior, harden robustness, and operate AI responsibly.

Powered by *Rabbit Hole*, the intelligence core of Alice, and shaped by a decade of global trust, safety, and security research, **WonderSuite** applies deeply customizable, policy-aligned controls and multimodal, multilingual coverage to surface meaningful risks as AI systems evolve.

With ultra-low-latency protection and clear, prioritized insights, **WonderSuite** gives enterprises the clarity and assurance needed to confidently govern AI as it scales.

Alice is Trusted by the World's Leading Technology Innovators

The unified platform to test, protect, and assess your AI models, agents, and applications

Powered by Rabbit Hole,
Alice's proprietary adversarial threat engine.

<p>Backed by our global in-house security and safety researchers</p> <p>Expertise spanning a vast spectrum of digital threats, risks, and adversarial behaviors</p>	<p>Trained on the world's deepest adversarial dataset</p> <p>Billions of real-world adversarial datapoints across all abuse categories</p>
<p>Learns & adapts to the threat landscape</p> <p>Continuously evolves in real time to identify and anticipate new risks</p>	<p>Feeds & fuels every Alice product</p> <p>Powering everything we do, across detection, protection, and assurance</p>

Navigate the twists and turns of GenAI with WonderSuite
