

## INFORMACION TECNICA

### BHJ-02

#### MOTOR CATERPILAR INDUSTRIAL 3406

|                                     |                  |
|-------------------------------------|------------------|
| SERIE                               | 2MZ01181         |
| PRESION MAXIMA DE TRABAJO PERMITIDA | 240 HP @1800 rpm |
| AÑO                                 | 2014             |

|           |          |
|-----------|----------|
| HOROMETRO | 5175 HRS |
|-----------|----------|

### BHJ-02

|                     |        |
|---------------------|--------|
| MARCA               | FULLER |
| MODELO              | T905   |
| RADIO               | A      |
| TIPO DE ACEITE      | SAE 90 |
| CAPACIDAD DE ACEITE | 5 GLS  |

#### BOMBA QUINTUPLEX

|                     |                     |
|---------------------|---------------------|
| MARCA               | NOV                 |
| MODELO              | 3000-5              |
| SERIE               | 200111-2            |
| RATE MAXIMUN INPUT  | 300HP/ AT: 400 RPM  |
| RATE MAXIMUN OUTPUT | 270HP / AT: 400 RPM |
| MAXIMUN BFPD        | 4100 BFPD           |
| MAXIMUN RATED       | 3400 PSI            |

|                                                                                   |                         |                |
|-----------------------------------------------------------------------------------|-------------------------|----------------|
|  | RECORRIDO DE PLUNGERS   | 5"             |
|                                                                                   | PLUNGER                 | 1" 7/8         |
|                                                                                   | CAPACIDAD DE ACEITE     | 12 GLS         |
|                                                                                   | AÑO DE FABRICACION      | 2014           |
|                                                                                   | DESCRIPCION/REDUCTOR    |                |
|                                                                                   | MARCA                   | NOV 300Q       |
|                                                                                   | MODELO                  | W300H          |
|                                                                                   | SERIE                   | 20111-2        |
|                                                                                   | CAPACIDAD DE ACEITE     | 3.5 GLS        |
|                                                                                   | RELACION DE TRANSMISION | 4.38 : 1       |
|                                                                                   | HP                      | 300 A 1750 RPM |

| BHJ-02                                                                              |                                                                                  |
