24—25 Mini San Marzano	62—63 Ox Heart
26—31 Midi Plum	64—67 Specialty
32—37 Berry	68—75 Pepper

# We value the natural power

that emanates from the meeting of minds and the meeting of nature. We are proud to offer agility in breeding, a reflection of both taking the road less travelled and a commitment to flavor by design. We have spent years developing advanced technology tools to grow our garden “full seed ahead” together with specialist breeding capabilities to maximize flavor, enhance eating experience, yield consistency, and sustainability.

We create delicious and memorable vegetables that consumers love, available year-round, and create value for growers and retailers sustainably. We drive market demand by combining the expertise of an exceptional seed company with the insights of a food company with a culture of agility, creativity, quality, and excellence in everything we do.

We foster a partnership approach along the value chain to deliver profitable growth for all. Together with our partners, we fully evaluate all our varieties so that when we offer them to you, we do so with absolute confidence. It is a right, not a privilege, to fall in love with the products you bring into your life. Our commitment is to honor that in all we create.

# Popits™

**Popits™** is the true one-bite cucumber, perfectly sized at 4–5 cm with a crisp bite and naturally sweet taste that makes healthy snacking fun anytime, anywhere. Pure, one-bite satisfaction.

Loved by kids and adults alike, its uniform shape delivers strong visual impact and a crunchy texture that invites another bite.

For growers, patented traits deliver high Brix, high yield, harvest flexibility, and low waste, aligning consumer demand with profitable production.

**Popits™** redefines the mini cucumber segment, setting a new standard for fresh, healthy snacking.

**Pop it. Crunch it. Love it.**

# Mini Plum

The fastest-growing snack segment in recent years with a sweet and juicy taste profile. Prized for their sweet flavor, bite-sized shape, and versatility in the kitchen, mini plum is gaining popularity among health-conscious consumers of all ages.

# Elizabeth

Bursting with flavor and perfectly sized, this standout premium cherry tomato OTV combines high yield potential with premium shelf appeal. Its vigorous yet manageable plant delivers consistent 17g fruits with high Brix, shiny red color, a crisp bite, low cracking sensitivity, and excellent shelf life. Ideal for premium market positioning.

# Dulciz

Premium snacking tomatoes and a unique teardrop shape, which defines the segment. Known for their sweet, aromatic flavor and irresistible aroma. Dulciz guarantees a consistent, year-round supply, delivering unmatched freshness and quality every week of the year.

# Dulciz Duo

Brings together rich red and sunny yellow snack baby plum tomatoes in one vibrant, all-season combo. With strong, productive plants and elegant trusses, it delivers consistent setting and glossy fruit with high Brix, sweet aromatic flavor, excellent firmness, and long shelf life, ideal for premium markets year-round.

Tom Ruby

This ToBRFV-resistant berry tomato combines bold flavor with striking visual appeal. Vigorous, compact plants ensure uniform setting and reliable yields, producing glossy, deep dark-red fruits with high Brix, high lycopene, and a rich, savory flavor. Strong cluster attachment and long shelf life deliver an excellent performance.

# Cocktail

Prized for its midi-sized, flavorful fruits, vibrant colors, juicy texture, and rich, sweet taste, the cocktail segment is a growing category providing beautiful clusters of tomatoes for all greenhouse types. Highly valued by consumers for its versatility in the kitchen, this perfectly round vine tomato is not to be missed.

# Rossafina

Rossafina brings back the tomato flavor people have been longing for, while delivering strong agronomic performance and lasting freshness. Its compact, vigorous plant supports dense planting and reliable fruit set, producing uniform, deep-red clusters with high Brix, high lycopene, and a rich, authentic aroma. Excellent firmness, resistance to cracking and BER, and long post-harvest life ensure consistent quality throughout the season.

A large advertisement for the Vereniki tomato. It features a dark purple background. On the right, a single, large, round, red tomato with a green stem is shown. To its left, a large, white, stylized letter 'V' is partially visible. Below the tomato, the word "Vereniki" is written in a large, white, serif font. At the bottom, there is a paragraph of text in a smaller, white, sans-serif font.

Vereniki

A high-quality red beef tomato now being introduced across different markets. It features a beautiful red color with uniform fruit shape and size, delivering reliable quality and strong market appeal. Suitable for early fall and fall transplanting from hot to cold conditions, Vereniki offers good performance with ToBRFV (HR) resistance and a medium-vigor plant.

# Ox Heart

A classic segment valued for large, fleshy fruits and a well-balanced flavor, ideal for fresh consumption, slicing, and light cooking.

Alok\* (70839)  
NEW

Ox Heart | Loose  
● | 230-250 gr

Alok fully expresses these traits, delivering firm fruits with few seeds, good shelf life, and strong market presentation. Well-suited for winter cycles, it ensures uniform size and shape, consistent setting, even coloration, and reliable yields throughout the production cycle.

# Specialty

The tomato specialties segment is a fast-growing category driven by consumer demand for premium quality, bold flavors, and visual appeal. With diverse varieties offering distinctive tastes, colors, and culinary versatility, it goes beyond the standard tomato experience. This segment enables growers and retailers to stand out on the shelf and deliver added value through freshness, authenticity, and memorable eating experiences.

# Midnight Plum

Midnight Plum is a specialty midi plum tomato distinguished by its dark ripening color that develops into striking heirloom tiger hues of purple, red, and golden green. It offers a crisp texture and a complex, fruity flavor with plum-like notes layered with fresh tomato brightness. An heirloom marvel shaped by the vine yet guided by a plum-like soul, designed to stand out on the shelf and deliver a memorable eating experience.

# Bernabel & Bonáyar

Set the standard for vigor, firmness, and consistency in the bell pepper segment. Bonáyar produces bright yellow L-sized fruits, while Bernabel delivers deep red L—XL peppers. Both ensure uniform fruit set, thick walls, and excellent shelf life, maintaining high-quality, homogeneous fruits from first pick to final harvest and supporting strong market value.

# Friggitello pepper

The Friggitello pepper is a traditional Italian sweet pepper, long valued in Mediterranean cuisine and increasingly appreciated in international fresh markets.

*Adensia* combines this authentic character with strong agronomic performance, delivering early, high productivity and uniform, slender fruits with intense green color and excellent firmness. Harvested green, it offers consistent quality, good shelf life, and versatility for frying, sautéing, or grilling whole.

## Adensia

IR = Intermediate Resistance to ToBRFV / HR = Highly resistant to ToBRFV

\* Proposed name pending approval by EU authorities. Final denomination subject to change.

Varieties that show significant reduction in symptoms. Tested for two consecutive seasons under virus pressure in comparison with susceptible varieties.

(ISF-HR definition)  
High Resistance (HR) / the ability of a plant variety to restrict the growth and/or development of the specified pest, and/or the symptoms and/or damage it causes, to a high degree. HR varieties may still exhibit minor symptoms or damage under heavy pest pressure and should not be confused with immune plants that are defined as unable to support any pest growth and development.  
Intermediate Resistance (IR) / plant varieties that restrict the growth and/or development of the specified pest and/or the damage it causes but may exhibit a greater range of symptoms or damage compared to high resistant varieties. Intermediate resistant plant varieties will still show less severe symptoms or damage than susceptible plant varieties when grown under similar environmental conditions and/or pest pressure.
