# Precious Colors

**invicon**  
chemical solutions

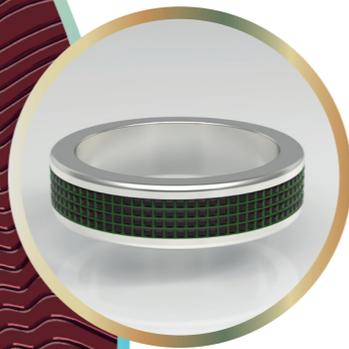

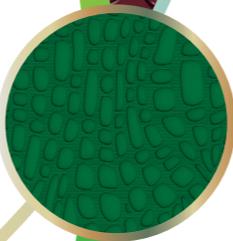

Colors are  
the smiles of nature.

### Noble and Powerful

Precious colors from the **HyCeram®**, **LuxArt®** or **Luxon®** color world are individual, expressive and full of life. They offer unique touch experiences and immediately trigger atmospheric emotions. With solid craftsmanship and together with precious metals and valuable gemstones, watch and jewellery objects full of character and elegance are created.

### Creative Diversity

**HyCeram®**, **LuxArt®** and **Luxon®** are as versatile as their creative ideas. Opaque surfaces, pearl effects, neon character or even day/night designs can be realised in unique top quality. In addition, practically all colors from Pantone or the RAL spectrum can be realised for your individual color requirements.

### Powerful Innovations

#### Bond New

- Significantly better metal wetting
- Increased adhesion
- Reduced smear layer

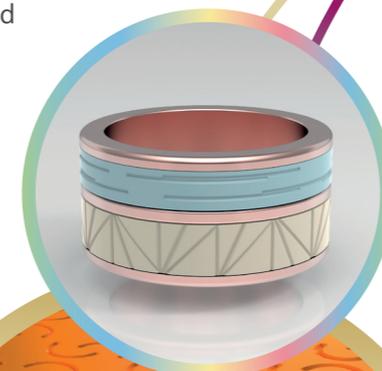

#### HyCeram® Crystal Clear

New creations with clear-transparent or coloured-transparent surfaces

- 60% ultra-fine ground ceramic
- Excellent color stability
- Surfaces can be ground, milled and polished

#### HyCeram® Guilloche Effects

- **HyCeram®** fine engravings
- Diamond polished high gloss
- New textured surfaces

### Freedom of Crafting

**HyCeram®**, **LuxArt®** and **Luxon®** can be processed according to your craft or industrial requirements.

- Classic filling
- Machine grinding, milling or engraving
- Mould application
