acoustic
design & architecture

Welcome

We are a specialized interior architecture firm that is dedicated to providing exceptional results by blending technical expertise with creative vision. Our goal is to establish a connection between the building industry and the professional audio-light-vision sector, resulting in an innovative and stylish approach to construction projects.

We have completed various projects across the globe, including large-scale auditoriums and education buildings. We take pride in our thorough design process, which involves working closely with clients to understand their needs and desires. This approach allows us to provide personalized, high-quality solutions that surpass expectations.

If you want to bring your vision to life, Acoustic Design and Architecture is the perfect choice.

Our expert design and execution services can help you create a space that is both functional and beautiful. Let us demonstrate our expertise and bring your project to fruition.

Our company, which provides boutique architecture services with the concept of hall architecture and technologies, integrates high- cost structures such as cultural centres, conference, cinema and theatre halls, museums and exhibition areas, foyers and show centres with high-tech equipment and realizes them as livable, contemporary and aesthetic spaces.

Our primary aim is to achieve the highest level of customer satisfaction, not just with the designs we provide, but also with the execution of our projects.

At Acoustic Design and Architecture, we are passionate about what we do, and we are committed to delivering exceptional outcomes for our clients. Whether you're interested in creating an impressive commercial space or a comfortable commercial environment, we have the skills, experience, and expertise to bring your vision to life.

Our primary aim is to achieve the highest level of customer satisfaction, not just with the designs we provide, but also with the execution of our projects.

History

2011

Acoustic Design and Architecture has successfully completed numerous projects since our establishment in 2011, including several in the education sector. Our team took on a major undertaking with our first overseas project, the Turkmenistan TV Tower. We have continued to expand our reach and take on increasingly complex projects since then.

2015

We relocated our main office and reorganized our team to enhance our services by separating the design and execution phases of our projects. Our team completed the Dubai SRS school auditorium project, which had a seating capacity of over 2500 seats, making it one of our most challenging projects to date.

2017

We always seek new opportunities to expand our reach and take on exciting new projects. We opened a new market in Saudi Arabia in 2017 and completed over 30 auditorium projects in a short period. In 2019, we launched our Bulgarian office to better serve our clients in the European market, and we became one of the executive dealers of MONSEAT Bulgaria the same year.

2021

We celebrated a major milestone by launching our first production line, MONACOUSTIC, as a member of the MONGROUP. We are excited to continue expanding our production capabilities in the coming years. We also launched our Stage Mechanics and Technologies production line in the same year.

Acoustic Design and Architecture is dedicated to creating innovative, technology-driven solutions that seamlessly blend with building design and elevate user experience. We believe that acoustics and audio- visual technology are crucial in every space, and our mission is to ensure that they are integrated into every project we undertake.

Our approach goes beyond traditional interior design, as we incorporate cutting-edge audio-visual and acoustic solutions to create visually stunning and acoustically optimized spaces.

We strive to create engaging, immersive, and unforgettable environments for our clients and their customers.

Our Process

01 Preliminary Phase

Our initial meeting and briefing allow us to get to know the client, and for us to evaluate their requirements, likes, and dislikes, all of which are vital in building a trusting relationship where we understand what they're trying to create.

02 Design Concept

We use this time to prepare our initial style concept boards that we use as a visual tool to clarify the style and confirm the brief between the designer and client.

03 Design Development

We work with you until you are happy with our final concept and would like to proceed to specifying / sourcing / products/ materials.

04 Supply Chain

With your approval, we fine-tune the final budgets, tender, and technical documents that will meet your expectations on your target. This can include ordering furnishings, materials, and products.

05 Construction

A part of the supply chain, this final execution period allows us to achieve the desired outcome on your site. We collaborate with builders, trades, suppliers, and manufacturers under the control of onsite engineers and disciplined coordination.

06 Final

The final stage of our design process involves us coming for a final inspection of your project, to ensure that we're both are happy with the final outcome.

Services

01 —————

Design

As part of our project design services, we identify your project's specific architectural needs and norms and create concepts that combine quality and aesthetics. Prior to implementation, we utilize advanced technology and software to design concepts digitally, providing high-quality visuals and presentations that bring your ideas to life.

03 —————

Product Supply

We offer a comprehensive selection of equipment and materials that are designed to enhance the acoustic and visual experience of auditoriums and other public spaces. Our product range includes high-quality seating, carpets, step nosing, and LED lighting, as well as premium acoustic materials like wood panels, baffles, felt and fabric panels, and noise and vibration control units.

All of our materials and equipment are carefully selected from well-known brands and come with long-term warranties to ensure the satisfaction of our clients.

02 —————

Consultancy

Once the project design process is complete, whether you choose to move forward with us or not, our project consultancy services are available to evaluate the application from various perspectives and to identify the necessary materials and resources to align with your needs and preferences.

04 —————

Execution

As a complement to our project design and consultancy services, our project execution process is designed to provide the highest quality services to our clients. Our expert team works diligently to ensure that the design and material selection are in line with projected standards and specifications, helping to minimize the risk of disruptions during project implementation.

Auditorium Interior

— We offer expert design and implementation of unique and functional spaces for cultural and social activities, with attention to acoustics, lighting, and performance requirements.

Auditoriums, cinema halls, concert halls, ball halls, and show centers are places where cultural and social activities take place, and each of them requires different architectural designs and technical qualities in accordance with their intended use. These spaces are designed according to their functions, and elements such as architectural acoustics, architectural design, interior architectural visibility, direct and indirect lighting units, regulations, standards, performance requirements, professional system equipment, sound, and light visual system can vary significantly.

At Acoustic Design & Architecture, we have the expertise and experience to provide you with a tailored service that meets your unique needs. Our team of experts is well-versed in the design and installation of high-quality systems that deliver exceptional performance, reliability, and flexibility. From acoustic design and lighting units to sound and visual systems, we carefully select the best equipment for each project to ensure optimal performance.

Scope of Works

Room & Electro Acoustic

— Our team of professionals is well-versed in the disciplines of room and electro-acoustic design, and we utilize a variety of high-quality equipment to ensure optimal sound quality for every project.

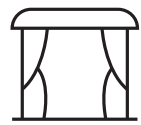

With years of experience, we understand the importance of achieving the perfect acoustic performance for each space, regardless of the technical details or complexity of the project. Our expertise in room and electro-acoustic design allows us to utilize a variety of high-quality equipment to ensure exceptional sound quality.

Additionally, we offer architectural acoustic project design and reporting services for a range of spaces, such as studios, shopping malls, restaurants, bars, and other areas frequently used in daily and social life.

We carefully select the best materials for each project to ensure optimal sound reflection, insulation, and reverberation. Our range of equipment includes everything from wood panels to advanced sound systems. By combining our knowledge and experience, we provide exceptional service that meets your unique needs.

Stage Mechanic & Technology

From the simplest wooden platform to the most complex stage automation systems, our team of experts designs and integrates every aspect of your stage technology needs, ensuring seamless and efficient performance for your productions.

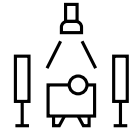

We design and integrate every aspect of your stage technology needs, from the simplest wooden platform to the most complex stage automation systems. Our team of experts works closely with architects, engineers, and theater consultants to create comprehensive solutions that will meet your specific requirements. We provide a wide range of stage equipment, including stage textiles, control and automation, above stage mechanics, on stage mechanics, under stage mechanics, and stage flooring.

With our Stage Mechanic & Technology services, you can rest assured that your stage technology is designed and integrated to function seamlessly and efficiently. Our high-quality equipment and expert technical design will ensure that your productions run smoothly and without interruption. Whether it's a small local theater or a large-scale production, we will provide you with a stage that meets your exact needs.

Scope of Works

Professional AVL

We provide top-of-the-line audio, video, and lighting solutions tailored to your specific needs, designed and installed by experienced professionals who are dedicated to excellence.

With our professional Audio-Video-Lighting solutions, we strive to provide a seamless and immersive experience for our clients. We understand that lighting, sound, and video play an integral role in setting the mood, capturing the attention of the audience, and creating the desired atmosphere. Our team of experienced professionals works to design and install high-quality, professional-grade systems that deliver outstanding performance, reliability, and flexibility.

Whether you need to set the tone for a theatrical production, engage your audience in a corporate presentation, or create a mesmerizing experience at a concert, our solutions are tailored to meet your unique needs. From professional audio systems and video projection equipment to lighting fixtures and control systems, we have the expertise and experience to deliver top-notch solutions.

We are dedicated to using the latest technology and working with top-of-the-line equipment to ensure that every detail is executed to perfection. Our commitment to excellence ensures that our solutions will exceed your expectations, providing a seamless and engaging experience for your audience. Let us help you create an unforgettable event with our professional Audio-Video-Lighting solutions.

Products

— Welcome to Acoustic Design & Architecture, where excellence meets innovation.

Our carefully curated collection features top-tier products from renowned brands, seamlessly blending aesthetics and acoustic performance to elevate your spaces. Explore our catalog to discover the perfect elements for a harmonious fusion of form and function.

We're dedicated to turning your vision into breathtaking realities. Whether it's seating, lighting, premium acoustic solutions, or personalized orders, our products go beyond the ordinary to meet your diverse project needs.

Auditorium Equipment's Auditorium Seats

Elevate your event with our comfortable and stylish auditorium seats!

Our carefully designed chairs are not only comfortable and stylish but also versatile enough to transform any large public space into a world-class venue.

Whether you're planning a conference, a performance, or a lecture, our auditorium seats will provide maximum comfort and support for extended periods of sitting, ensuring your guests can fully enjoy the event.

We offer a wide range of seating options to fit your specific needs and budget. From fixed seating to retractable or removable seating, we have the expertise and experience to deliver the best solution for your space.

Our innovative design and installation services ensure that your seating arrangement maximizes the available space and enhances the overall ambiance of your venue.

Our auditorium seats are designed with cushioned seats and backrests, armrests, and cup holders, making them perfect for any event where comfort is a priority. And with our commitment to using high-quality materials and expert craftsmanship, our chairs are built to last for years to come.

So whether you're hosting a small or large event, our auditorium seats are the perfect choice to create an unforgettable experience for your audience.

Contact us today to learn more and discover how we can help you transform your venue!

Products

Auditorium Equipment's Cinema Seats

— Enjoy a new level of comfort and relaxation with our motorized recliner cinema seats.

Cinema seats are an essential part of creating a memorable and enjoyable movie-going experience. Not only do they offer comfort, but they can also add style to the overall ambiance of your theater. Our cinema seats are specifically designed to provide maximum comfort and support, featuring plush cushioning, ergonomic backrests, and cup holders.

We offer a wide range of cinema seating options, including traditional fixed seating, motorized recliners, and more.

Our customizable styles and colors allow you to create a unique cinema seating arrangement that perfectly suits your space and audience.

With a wide range of colors, patterns, and sizes to choose from, our tiles provide endless possibilities for customization, allowing you to create a look that perfectly complements your space and personal style. Installation is quick and easy, and the tiles can be easily replaced, providing a cost-effective and practical flooring solution.

Experience the benefits of Acoustic Squared Carpet Tiles for yourself and transform your room into a serene and stylish oasis.

Our team is dedicated to providing excellent customer service, ensuring that you are completely satisfied with your purchase. Order now and take your space to the next level.

Products

Auditorium Equipment's Floor Materials

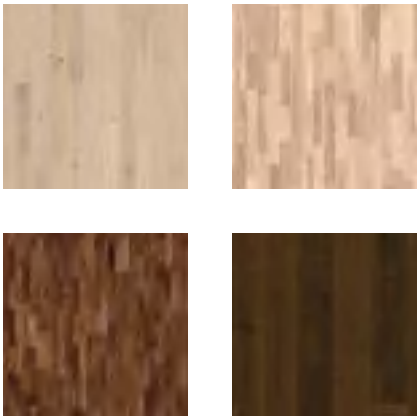

— Carpet Tiles

Transform your space with our premium quality carpet tiles, designed to offer exceptional sound insulation and aesthetic appeal.

— Stage Floor

We know that every performance space is unique, which is why we offer customizable stage flooring solutions that can be easily adjusted to suit your venue's needs.

— Step Nosing

Aluminum step nosing is a durable strip of material applied to the edge of a stair tread to provide extra traction and prevent slips and falls.

Auditorium Equipment's Led & Ambiance Lighting

Elevate the atmosphere of your auditorium with our top-of-the-line RGB LED strips and panels, perfect for creating a memorable experience that your audience won't forget.

Our RGB LED strips and panels are designed with versatility in mind, making them suitable for a wide range of applications. Whether you're looking to create a striking visual display or simply add some ambiance to a space, our LED lighting can help you achieve your goals.

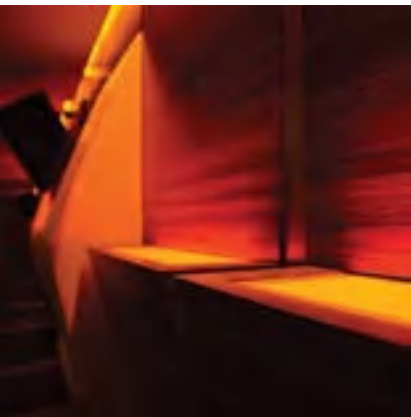

They can also be used to highlight specific areas of the stage or auditorium, drawing attention to important elements of the performance.

Our LED lighting is also ideal for architectural applications.

Whether you're designing a new building or renovating an existing one, our universal profiles can help you create a stylish and elegant atmosphere. Our lighting is safe, long-lasting, and evenly distributed, providing the perfect accent to any space.

With a wide range of colors and effects to choose from, you can customize the lighting to suit your needs and preferences.

In addition to their aesthetic appeal, our LED lighting solutions are also highly practical. They provide low-level lighting during performances, making it easier for performers to see and move around the stage.

Wood Panels

— Enjoy optimal sound quality and an enhanced ambiance with our premium acoustic wood panels.

Acoustic wood panels are an excellent solution for controlling sound and enhancing the acoustic quality of a space.

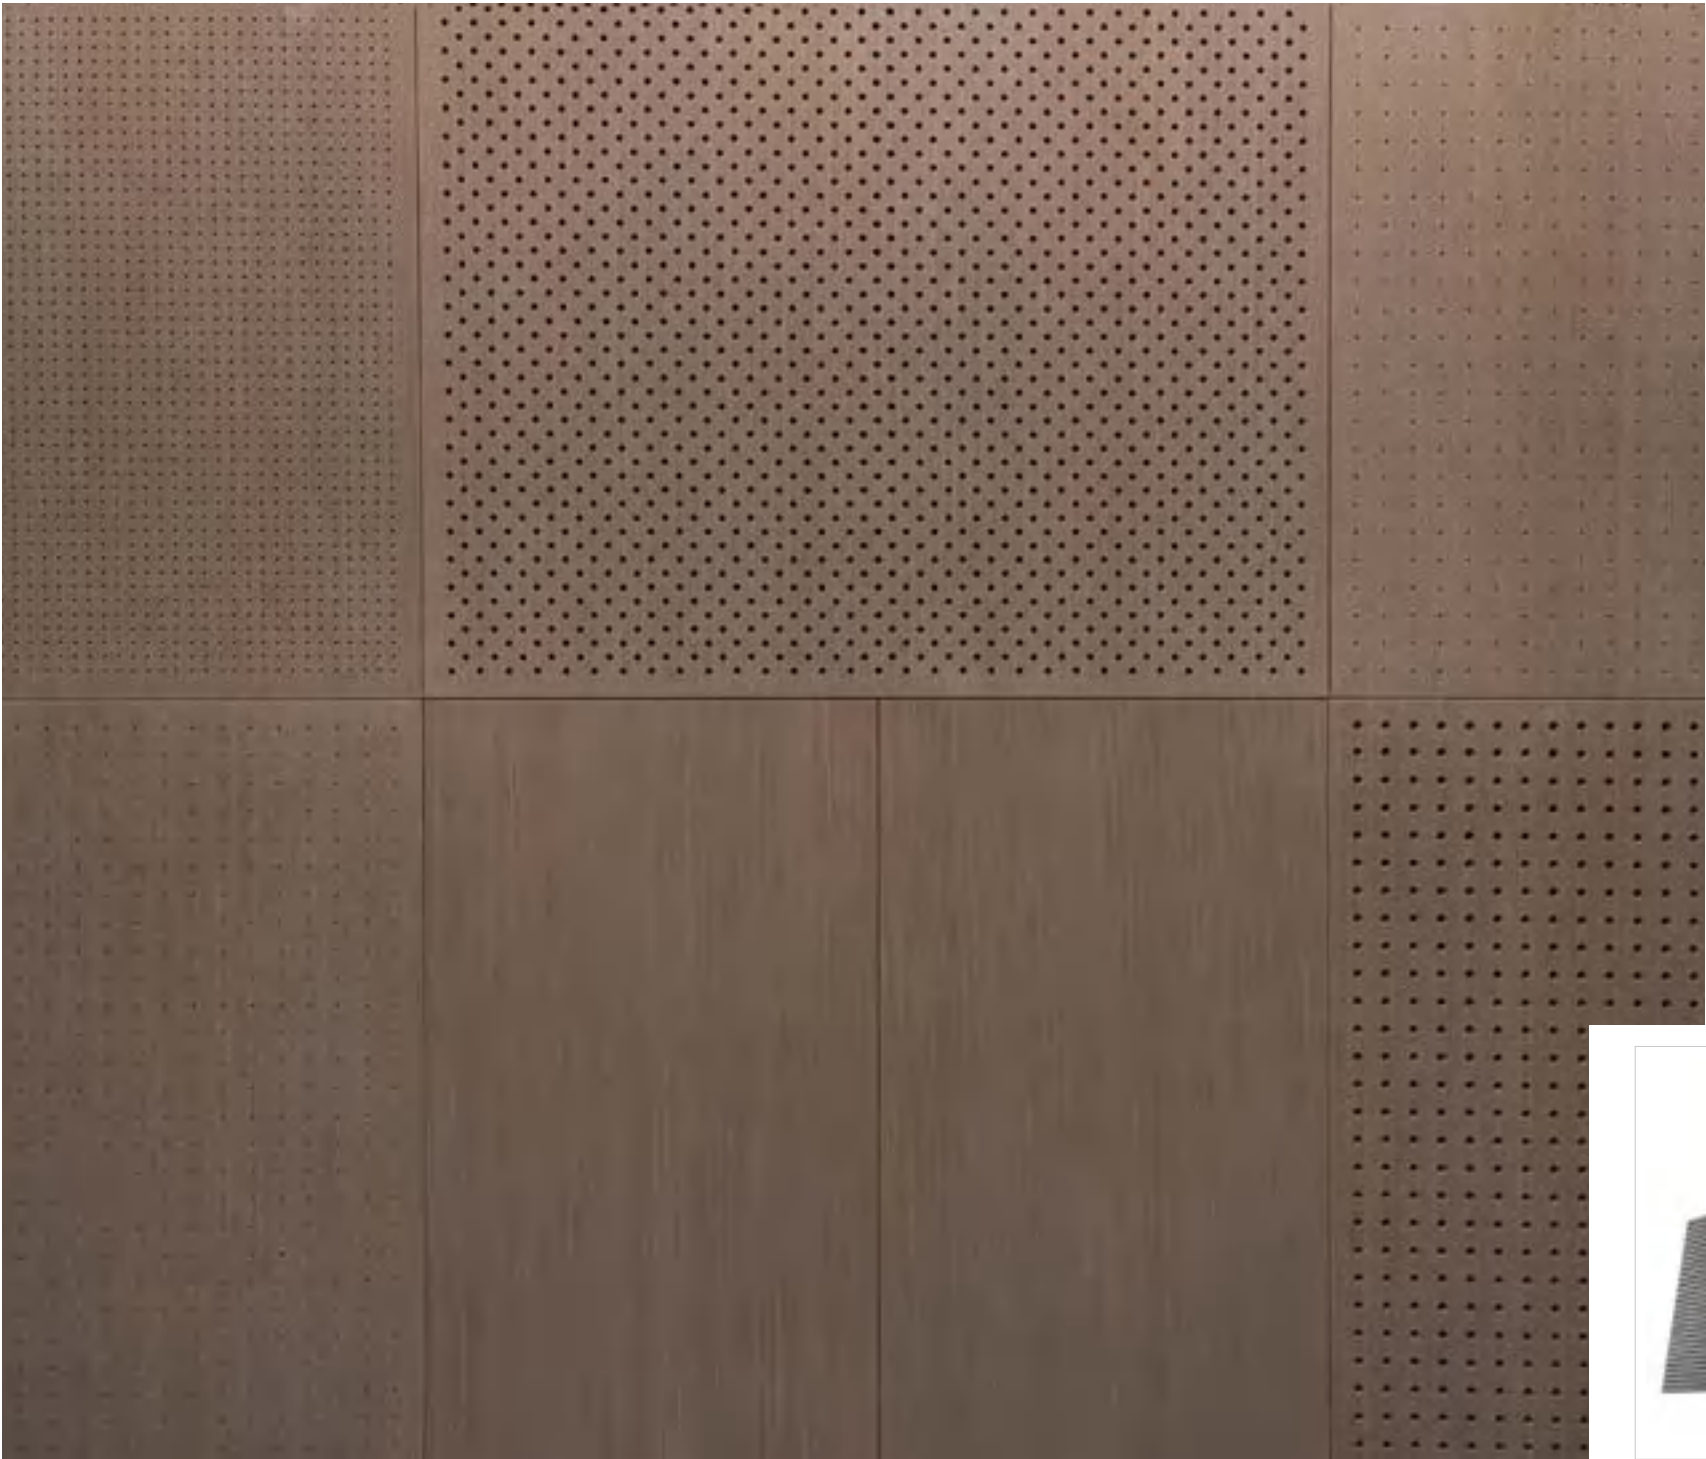

Their benefits are not limited to just concert halls, recording studios, and conference rooms.

They can be used in a variety of settings, including restaurants, classrooms, libraries, and even homes.

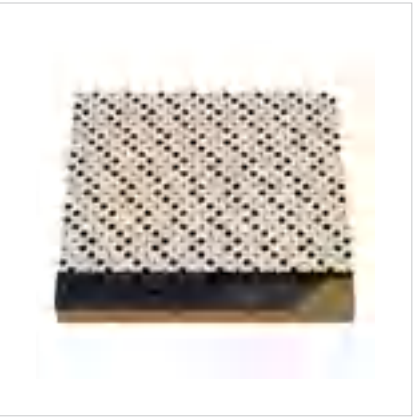

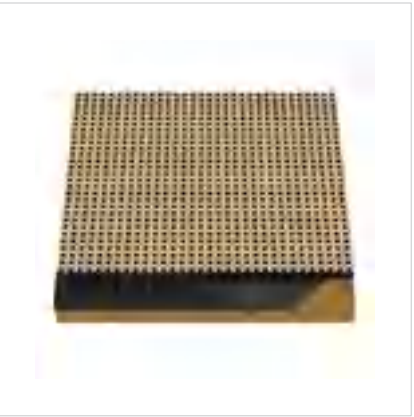

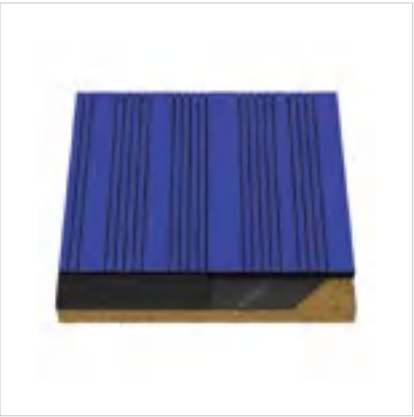

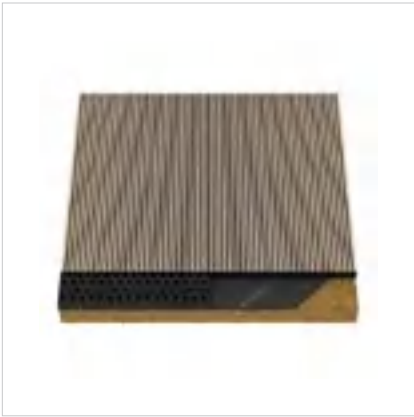

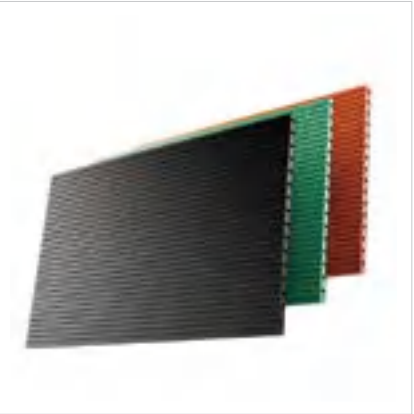

One of the advantages of acoustic wood panels is that they are made of natural materials, which are eco-friendly and sustainable. They offer a warm and inviting look, creating a comfortable environment that promotes focus and relaxation.

Acoustic wood panels can also be easily integrated into existing design schemes or used as a focal point to create a unique aesthetic.

When selecting acoustic wood panels, it is essential to consider their acoustic properties, such as their sound absorption coefficient, and to choose a type that matches the specific needs of the space. The location and size of the panels also play an important role in optimizing their effectiveness. It is recommended to work with a professional acoustic consultant or installer to ensure the proper installation and maximum acoustic benefit.

Overall, acoustic wood panels offer a versatile and effective solution for controlling sound and enhancing the acoustic quality of a space, while also providing an aesthetically pleasing design element.

Products

Acoustic Materials

Felt & Fabric Panels

— Improve acoustics by reducing echo and improving speech clarity.

Our felt panels come in a range of colors and sizes, allowing you to customize them to your space’s specific needs and aesthetic preferences. With easy installation options, including direct mounting or suspension from ceilings, felt panels are a flexible and effective solution for any room.

If you are looking for a durable and long-lasting solution, our acoustic fabric panels are an excellent choice. Made from high-quality acoustic fabric, these panels are designed to absorb sound energy and reduce echo, improving speech clarity and overall sound quality. The acoustic fabric also resists fading, ensuring that your panels will maintain their appearance and performance over time.

Our acoustic fabric panels come in a range of customizable options, including color, pattern, and size. With easy installation options, including direct mounting or suspended from ceilings, our acoustic fabric panels are a versatile and effective solution for any space.

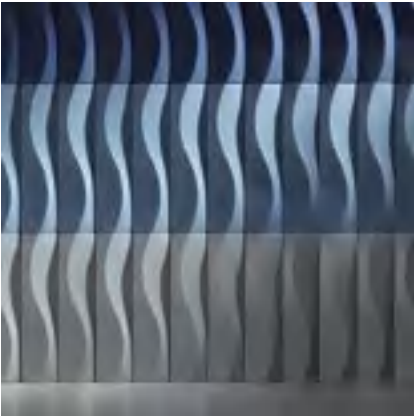

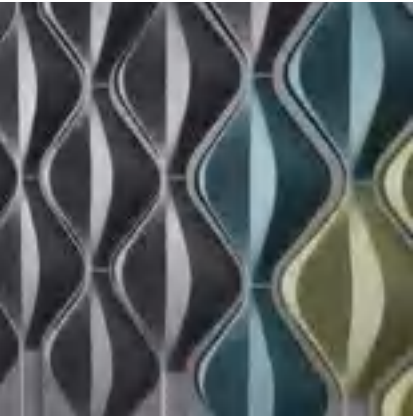

Both felt panels and acoustic fabric panels offer a visually appealing design feature that can enhance the overall aesthetic of your space while improving its acoustics.

Contact us today to learn more about how our customizable options can help you create the perfect listening environment in your space.

Products

Baffle Panels

— Reduce echo and improve speech clarity with our effective sound-absorbing materials.

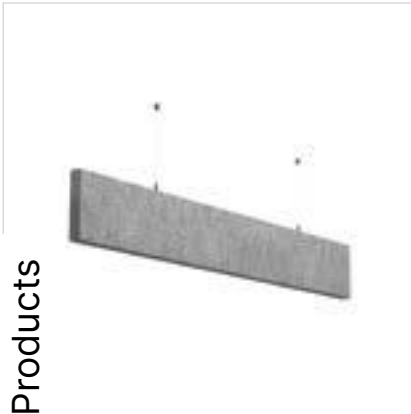

Acoustic baffle panels are a flexible and efficient solution for enhancing the sound quality of any area. These panels are built to absorb and diffuse sound, lowering echoes and increasing speech clarity.

Our premium acoustic baffle panels are accessible in various options to suit your particular preferences and requirements.

Our standard acoustic baffle panels are made of sound-absorbing materials such as fiberglass, mineral wool, or acoustic foam, and enclosed in a cover made of acoustically transparent fabric. They can be hung from ceilings, mounted on walls, or used as partitions to create private or semi-private areas.

We also offer diverse options for our standard acoustic baffle panels, including curved panels, patterned panels, and even custom-printed panels. These panels not only enhance the acoustics of a space but also add visual interest and aesthetic appeal.

Our acoustic baffle panels are built to last, with high-quality materials and construction. They can help you create the ideal listening environment, whether you need to improve the acoustics of a large auditorium, a small conference room, or a home theater.

Products

Noise & Vibration Control

— Achieve peace and quiet: Reduce noise and vibrations in any environment with our range of control equipment and materials.

Reducing noise and vibrations can make a big difference in creating a comfortable and peaceful environment. At our company, we offer a range of noise and vibration control equipment and materials that can help you achieve this goal.

Our noise control products include sound barriers, acoustic curtains, acoustic doors and windows, and sound-absorbing materials such as acoustic foam panels and bass traps.

These products can be customized to fit your specific needs and are designed to reduce the transmission of sound waves, effectively blocking out unwanted noise.

In addition, our vibration control products include vibration isolators, mounts, and pads, which are designed to absorb and isolate vibrations caused by machinery, HVAC systems, and other sources.

Stage Mechanics & Engineering

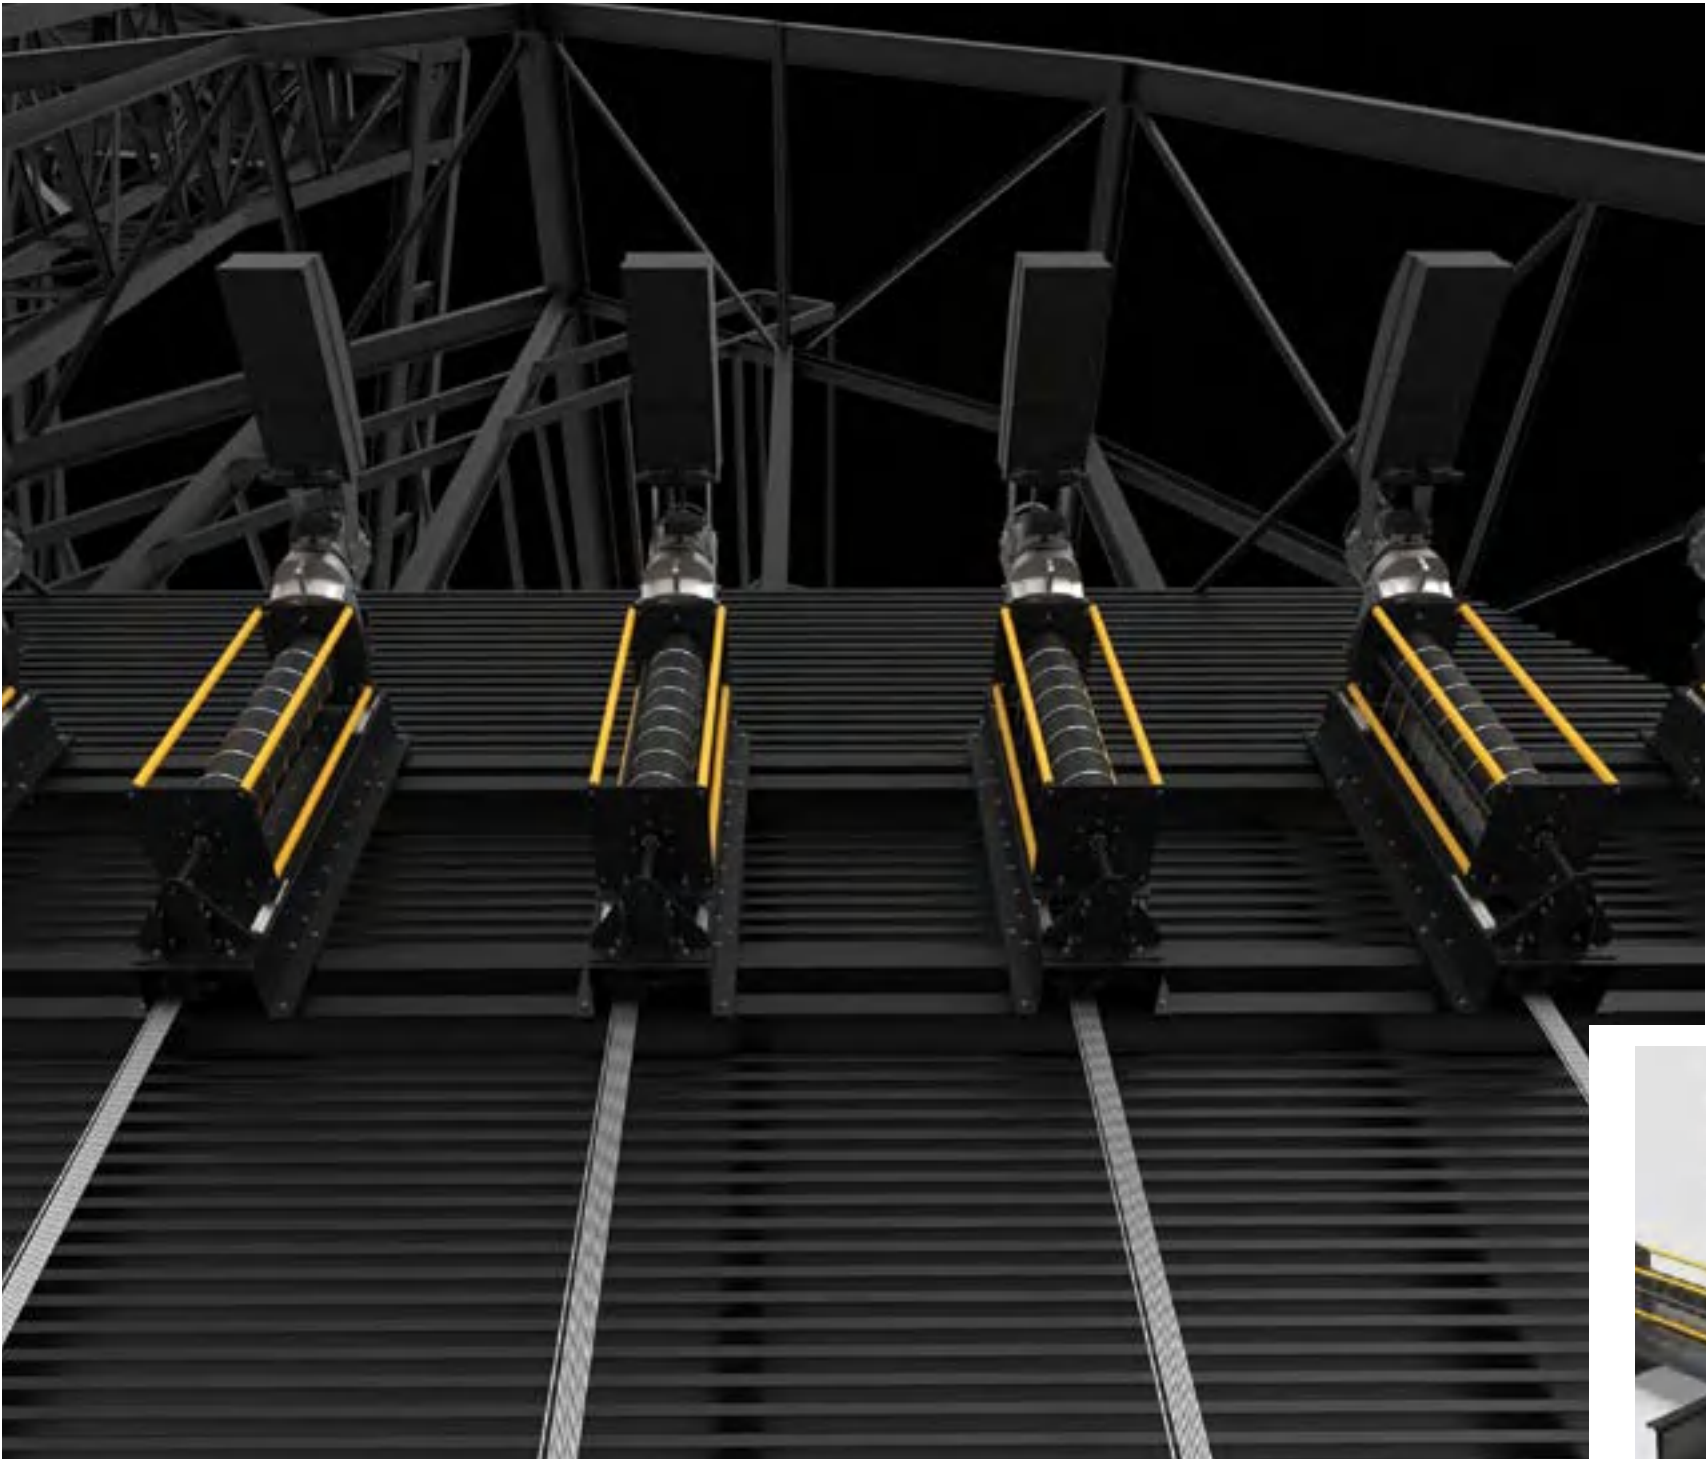

Stage Curtains & Automation Controls

— From the simplest wooden platform to the most complex stage automation systems, our team of experts designs and integrates every aspect of your stage technology needs, ensuring seamless and efficient performance for your productions.

We design and integrate every aspect of your stage technology needs, from the simplest wooden platform to the most complex stage automation systems. Our team of experts works closely with architects, engineers, and theater consultants to create comprehensive solutions that will meet your specific requirements.

We provide a wide range of stage equipment, including stage textiles, control and automation, above stage mechanics, on stage mechanics, under stage mechanics, and stage flooring.

With our Stage Mechanic & Technology services, you can rest assured that your stage technology is designed and integrated to function seamlessly and efficiently.

Our high-quality equipment and expert technical design will ensure that your productions run smoothly and without interruption.

Whether it's a small local theater or a large-scale production, we will provide you with a stage that meets your exact needs.

Products

Professional AVL

Professional Audiovisual Systems

— We have the technical expertise and installation know-how to bring even the most complex projects to life.

When it comes to professional audiovisual systems for large venues, trust is key to achieving exceptional results. That’s where we come in. With over 20 years of experience in the field, we have the technical expertise and installation know-how to bring even the most complex projects to life.

Our team of experts specializes in technical design, equipment selection, and producing multiple scenarios tailored to the unique requirements of each project.

We work closely with our clients to deliver custom audiovisual solutions that meet their specific needs and exceed their expectations.

However, we understand that creating an immersive audiovisual experience is about more than just the equipment. That’s why we also consider the architecture and acoustics of the venue to ensure the best possible sound and visual quality.

If you’re looking for a partner who is passionate about creating unforgettable audiovisual experiences and is committed to delivering exceptional results, look no further than our team.

Products

Stage & Theatre Lightings

— We are equipped to handle projects of all sizes, from small community theatre productions to large-scale shows and beyond.

With years of experience designing and installing professional lighting systems, our team has the technical expertise and creative vision necessary to take your production to the next level.

We specialize in creating customized lighting solutions that take into account the unique needs and requirements of each production.

We work closely with our clients to ensure that every aspect of the lighting design is tailored to enhance the performance, from subtle washes of color to bold, dramatic lighting effects that command attention.

Whether you need stage lighting, architectural lighting, or a combination of both, our team of experts can deliver a customized solution that meets your specific needs and exceeds your expectations. At our core, we are passionate about creating immersive and visually stunning experiences for our clients and their audiences.

Our team of experts is dedicated to ensuring that every lighting system we install is optimized for the unique demands of the venue and the production. With our unwavering commitment to quality, technical expertise, and creative vision, you can rest assured that your production will be unforgettable.

Products

Meeting & Simultaneous Interpreter Systems

— Meeting discussion systems are designed to ensure clear, crisp sound quality in even the most challenging acoustic environments.

Effective communication is vital for success, especially in large-scale events like auditorium presentations, multi-purpose hall events, or meeting hall discussions. That's why our team of experts specializes in designing and installing professional meeting discussion systems and simultaneous interpreter systems that cater to the specific needs of such spaces.

Professional AVL

Cinema Pro Audio & Video

Our team of experts specializes in creating custom Integrated AV solutions that are tailored to the specific needs of our clients.

We specialize in creating custom integrated AV solutions that seamlessly combine audio and visual components to deliver engaging multimedia experiences.

Our team has the expertise and experience to exceed expectations, whether it's a simple setup for a small conference room or a complex installation for a large auditorium.

Our integrated systems of lighting and staging are designed to enhance the user experience at events by providing a seamless integration of lighting and staging elements for dynamic and engaging performances.

With our expertise and custom solutions, we help event producers create captivating experiences that leave lasting impressions on their audiences.

We also specialize in creating custom integrated systems of content production and distribution for a variety of settings, including auditoriums, cinemas, theaters, universities, and corporate rooms.
