

## Douglas Fir Cladding

- **Natural Durability** – Resists decay and insects.
- **Strong & Stable** – Holds shape in harsh weather.
- **Beautiful Grain** – Warm colour, ages gracefully.
- **Sustainable** – Locally sourced, FSC-certified.

## Ground Screws

- **No Concrete, No Mess** – Screws go straight into soil, no digging or curing.
- **Fast Install** – All screws in under an hour; build in a day.
- **Strong & Stable** – Handles heavy loads, level on uneven ground.
- **Eco-Friendly & Reusable** – Lower carbon footprint, screws can be removed and reused.

## Glass Dome Skylight

- **Natural Light** – Floods the interior with daylight.
- **Open, Airy Feel** – Creates a bright, spacious atmosphere.
- **Energy Efficient** – Reduces need for artificial lighting.
- **Beautiful Focal Point** – Highlights the yurt's central design.

## Liquid Polyurethane Roof

- **Waterproof Seal** – Protects timber from moisture.
- **UV & Weather Resistant** – No cracking or peeling.
- **Durable Finish** – Tough, scratch-resistant layer.
- **Flexible** – Adapts to wood movement over time.

## Birch Plywood Frame

- **High Strength** – Dense hardwood layers for rigidity.
- **Heavily Insulated** – Stays cool in summer and warm in winter.
- **Secure Fixings** – Excellent screw grip for joints.
- **Eco-Friendly** – FSC-certified, efficient material use.

## Dual Layered Floor

- **Extra Strength** – Composite deck resists flexing.
- **Smooth Surface** – Staggered joints for stability.
- **Better Insulation** – Warmer, quieter underfoot.
- **Long-Lasting** – Moisture-resistant, replaceable top layer

## Octagonal Timber Frame

- **Easy Build** – Straight timber, simple joinery.
- **Strong & Balanced** – Even load distribution, stable base.
- **Efficient Layout** – Clear screw positions, minimal waste.
- **Looks Great** – Symmetrical, blends with gardens.
