

# Flor de Andalucía

Midi-plum | Cluster

ToBRFV  
[HR]

High-yielding and ToBRFV-resistant, with glossy-red clusters full of Mediterranean flavor. Reliable for growers, irresistible for consumers.

Oval | Cluster | Non-Heated

34 gr | °Bx 7-8

**HR:** Fol:0/ToMV/ToBRFV

**IR:** TYLCV

## Agronomic Performance

Vigorous, generative, and well-balanced plant with short internodes.

Uniform clusters of 8–10 fruits per truss and steady fruit setting across the entire production cycle.

Excellent firmness and on-plant durability, supporting long post-harvest life.

High, consistent yields of premium-quality fruits right through to the last harvest.

## Commercial Value

Uniform midi-plum tomatoes with glossy deep-red skin and a juicy, pleasant texture.

High Brix (>7) and rich aromatic profile for an exceptional eating experience.

Compact, elegant clusters with thick green parts for extended durability.

Long shelf life and strong tolerance to cracking, ideal for extended logistics.
